RE: Met Council Interceptor Rehab Project

Dear Property Owner:

Metropolitan Council Environmental Services (MCES) is currently planning a regional sanitary sewer rehabilitation project in Roseville around Dale St. N and County Road B. The project will include rehabilitation of their sanitary sewer pipe. Construction will start as early as October 2016.

MCES has hired TKDA Engineering as their consulting engineer and surveyor for the work. Preliminary surveying may have already begun in your area. This surveying is required for the project design as well as to measure the tree impacts in the area. At this time we know that some trees may be removed but we will not know the entire extent of the impact until the survey is complete. An open house for this project will be held later this year.

We appreciate your cooperation. If you have any questions about the project, please contact MCES staff Tim O'Donnell at 651-602-1269 or Dan Chouinard at 651-602-4564 .

If you have additional questions please contact me at 651-792-7042 or Jesse.Freihammer@cityofroseville.com.

Sincerely,

Jesse Freihammer
City Engineer/Asst. Public Works Director
