Roseville Public Works, Environment and Transportation Commission Meeting Minutes

Tuesday, January 24, 2023, at 6:30 p.m.
City Council Chambers, 2660 Civic Center Drive
Roseville, Minnesota 55113

DRAFT

1. **Introduction / Roll Call**
Chair Ficek called the meeting to order at approximately 6:30 p.m. and at his request, Public Works Director Jesse Freihammer called the roll.

Present: Chair Bryant Ficek; and Members Michael Joyce, Jarrod Cicha, Nancy Misra, Mike Collins, and Edwin Hodder

Absent: Member Allison Luongo (Excused)

Staff Present: Public Works Director Jesse Freihammer; Environmental Manager Ryan Johnson and Sustainability Intern Noelle Bakken

2. **Public Comments**
None.

3. **Approval of November 22, 2022 Meeting Minutes**
Comments and corrections to draft minutes had been submitted by PWETC commissioners prior to tonight's meeting and those revisions incorporated into the draft presented in meeting materials.

Motion
Member Hodder moved, Member Collins seconded, approval of the November 22, 2022 meeting minutes as presented.

Ayes: 6
Nays: 0
Motion carried.

4. **Communication Items**
Public Works Director Jesse Freihammer provided a brief review and update on projects and maintenance activities listed in the staff report dated January 24, 2023.

Chair Ficek asked with the above average snow there are a lot of piles building up by the corners and he wondered how that affects sight distances. He was not sure if there is a plan for this or if there should be because there is a lot of accumulation occurring.

Mr. Freihammer explained staff has, in most areas, tried to bench back, plowing over the curb to create more storage space for the next event and in most cases that does help to clear up sight visibility. If there are complaints staff does go and blow snow to open things up. He indicated he has not heard much regarding sight visibility on any particular corner.

Chair Ficek thought all of the plow drivers are doing excellent work. He noted he has been happy with it but does see it on some of the corners, but he thought that might be on County roads.

Chair Ficek asked on the Dale Street project if there is a layout because he is particularly interested in some of the areas of Roseville where there is not a whole lot of access.

Mr. Freihammer indicated there is a layout. The last layout he saw there is a center lane left turn running the length of the project.

Mr. Freihammer indicated he will provide the Commission with an Envision Roseville update at the next meeting.

5. Green Team Update

Environmental Manager Ryan Johnson and Sustainability Intern Noelle Bakken provided the annual Green Team update to the Commission.

Member Misra asked how the 2040 Comp Plan energy goals graph will change once the project goes through in Washington County.

Mr. Johnson explained that the graph, the fifty-eight percent produced in 2021 will jump up at least to three million. That will jump up almost ninety percent renewable just for City operations. This is really only looking at City Hall Campus and where the big draw is for electricity all of the time.

Mr. Johnson continued with his presentation on EV charging and Less Mow May.

Chair Ficek asked if there are going to be signs that people can pick up for Less Mow May.

Mr. Johnson indicated there will be signs available at City Hall and will be a limited number for residents.

DRAFT

6. 2023 Sustainability Update

Ms. Noelle Bakken made a presentation on sustainability program accomplishments that the City has worked on over the year.

Member Misra loved the list of goals for 2023 and all topics being talked about. One topic she was curious about was a presentation the Commission received a few years ago about sod and irrigation and changes in lawn management to diminish water use and she wondered if that was anything staff talked about in terms of a goal to have residents look at their irrigation practices and look at maybe different types of sod that might be more sustainable.

Ms. Bakken thought Less Mow May would be a great opportunity to bring that in. She thought it would be an interesting engagement to have the U of M representatives come on site for some education to talk to people about different water-friendly lawn care practices as well as having some pollinator plant information alongside that as well.

Mr. Dale Howey, 911 Parker Avenue, explained he has a native lawn in their front yard and did not have to water it at all this past year. He also noted this brings in the pollinators and wildlife as well. He explained there are about six pollinator yards on Parker Avenue between Victoria and Lexington. It might be interesting to take a field trip to see what is going on.

Ms. Bakken explained that is kind of the point of the City's sustainable steward program. It recognizes these people who are doing these kinds of things and the ultimate goal with that is to create a little community map of where all of these resources are so if people wanted to go out and see an example of a pollinator yard or rain garden or solar on the roof or something like that, people can walk around and see them.

Member Collins asked regarding stormwater runoff near gas stations and filling stations, there is an excessive amount of fuel and spillage running right into the gutter and he wondered if there has ever been a study done upstream and downstream of that and if there has ever been any correlation between the business and the City.

Ms. Bakken did not think there has actually been a study done as far as specifically runoff from gas stations but she did know there are water quality checks that are done regularly.

Mr. Johnson indicated at some point in time there would have been some report done from the PCA or somebody similar. He knew that the City has not done anything specific.

Member Hodder indicated he did not hear anything in the report about geothermal and he wondered if the City tracks how their geothermal facilities are doing. He

DRAFT

also would be really curious to see if the City is getting what was promised, as far as savings, on the solar campus and how this can be expanded. He thought it would also be nice for residents to get some education on financing of solar.

Ms. Bakken thought those are some good suggestions for staff.

Member Cicha explained he was curious if the City or Green Team has done any research on the mono-pollution or mono-road wear that would be prevented by switching to organized trash collection. He would really appreciate a pursuit of that.

Ms. Bakken knew there was a lot of support in the community so staff will do more digging on that this year.

Ms. Carol Marshall, 2976 High Court, indicated she was making a plug for the Urban Forestry topic, and she hoped Roseville will pay attention to some of the low income areas in the City that lack trees and actually support tree canopy growth, perhaps with grant money.

Chair Ficek explained he was excited to see how staff is going to get the information out to the residents. He thanked staff for the update.

7. Items for Next Meeting – February 2023

Discussion ensued regarding the February PWETC agenda:

- Deeper dive into a sustainability item
- Utility service: water and sewer services

Mr. Freihammer noted Jennifer Lowry is going to be the City's new City Engineer. He reviewed her background with the Commission. He would like to move the update on speed limits to March in order for the new City Engineer to be at the meeting and get her perspective on that.

Member Hodder thought the Commission might want to look further at the sustainability in the City.

Member Joyce thought maybe have information on the Metro Transit ridership routes.

Mr. Freihammer thought that might be a good topic to try to get someone from Metro Transit to come in and make a presentation to the Commission.

Chair Ficek thought another thing to talk about regarding sustainability is how to get information out to residents and businesses for the inflation reduction act and how it translates down to individuals.

Member Joyce thought food containers could also be discussed.

DRAFT

Mr. Freihammer noted the food container topic will be going to the City Council at a future meeting for a recommendation.

8. Adjourn

Motion
Member Cicha moved, Member Hodder seconded, adjournment of the meeting at approximately 8:23 p.m.

Ayes: 6
Nays: 0
Motion carried.

ROSEVILLE

Public Works Department

Memo

To: Public Works Environmental and Transportation Commission Members

From: Jesse Freihammer, Public Works Director

Date: February 28, 2023

Re: Communications Items

The following are updates to projects and other activities happening in Roseville since the last commission meeting.

Public Works Project updates:

- Villa Storm Water Improvements
  - The project was awarded to Kevitt Companies.
  - Work consists of replacing the inlets and the outlet to the upper basin. Dredging has been delayed until next year.
  - Work is anticipated to be completed in early spring, including restoration.

Ramsey County Updates:

- Ramsey County Mill and Overlays & ADA Upgrades
  - Work in Roseville is on three County Roads:
    - Rice Street, County Road B2 to I-694
    - County Road B, Dale Street to Rice Street
    - Lexington Avenue, TH 36 - County Road C2
  - Permanent pavement markings will be installed in the spring.
- Ramsey County Dale Street Safety Improvements
  - County held an open house on January 10 to discuss converting Dale Street to a three-lane section from Como Avenue to TH 36 in 2024. (Attachment F)

Miscellaneous Updates:

- Staff Updates
  - Jennifer Lowry, our new Assistant Public Works Director/City Engineer, starts February 27.
- Parks Department
  - Tree maintenance. They use tree bags or use a watering truck for all newly planted trees. They are hoping to hire an additional seasonal or an AmeriCorps member to provide additional help to solely focus on water trees in the summer.

- Xcel Gas Project
    - All major work is completed. Some minor restoration remains, but will have no impacts to the public.
- Xcel Pole Project
    - Xcel Energy will replace or paint large transmission poles in early March between Lake Bennett and Rice Street. Most poles run along the north side of South Owasso Boulevard.

Council Update:

- Below is a highlight of items recently presented to and/or acted on by the City Council. More information can be found in the agenda packets and minutes for the referenced Council meetings:
    - January 30:
        - Approved changing Pocahontas Park to Keya Park, which means turtle in the Dakota language.
        - Discussed potential Phase II Zoning Code amendments regarding shoreland and sustainability regulations.
    - February 13:
        - Approved ordinance to stop issuance of new Short-Term Rental licenses.
        - Adopted a Resolution Approving MnDOT Cooperative Construction Agreement No. 1051804 – TH 36 & Fairview Avenue Ramps Improvement.

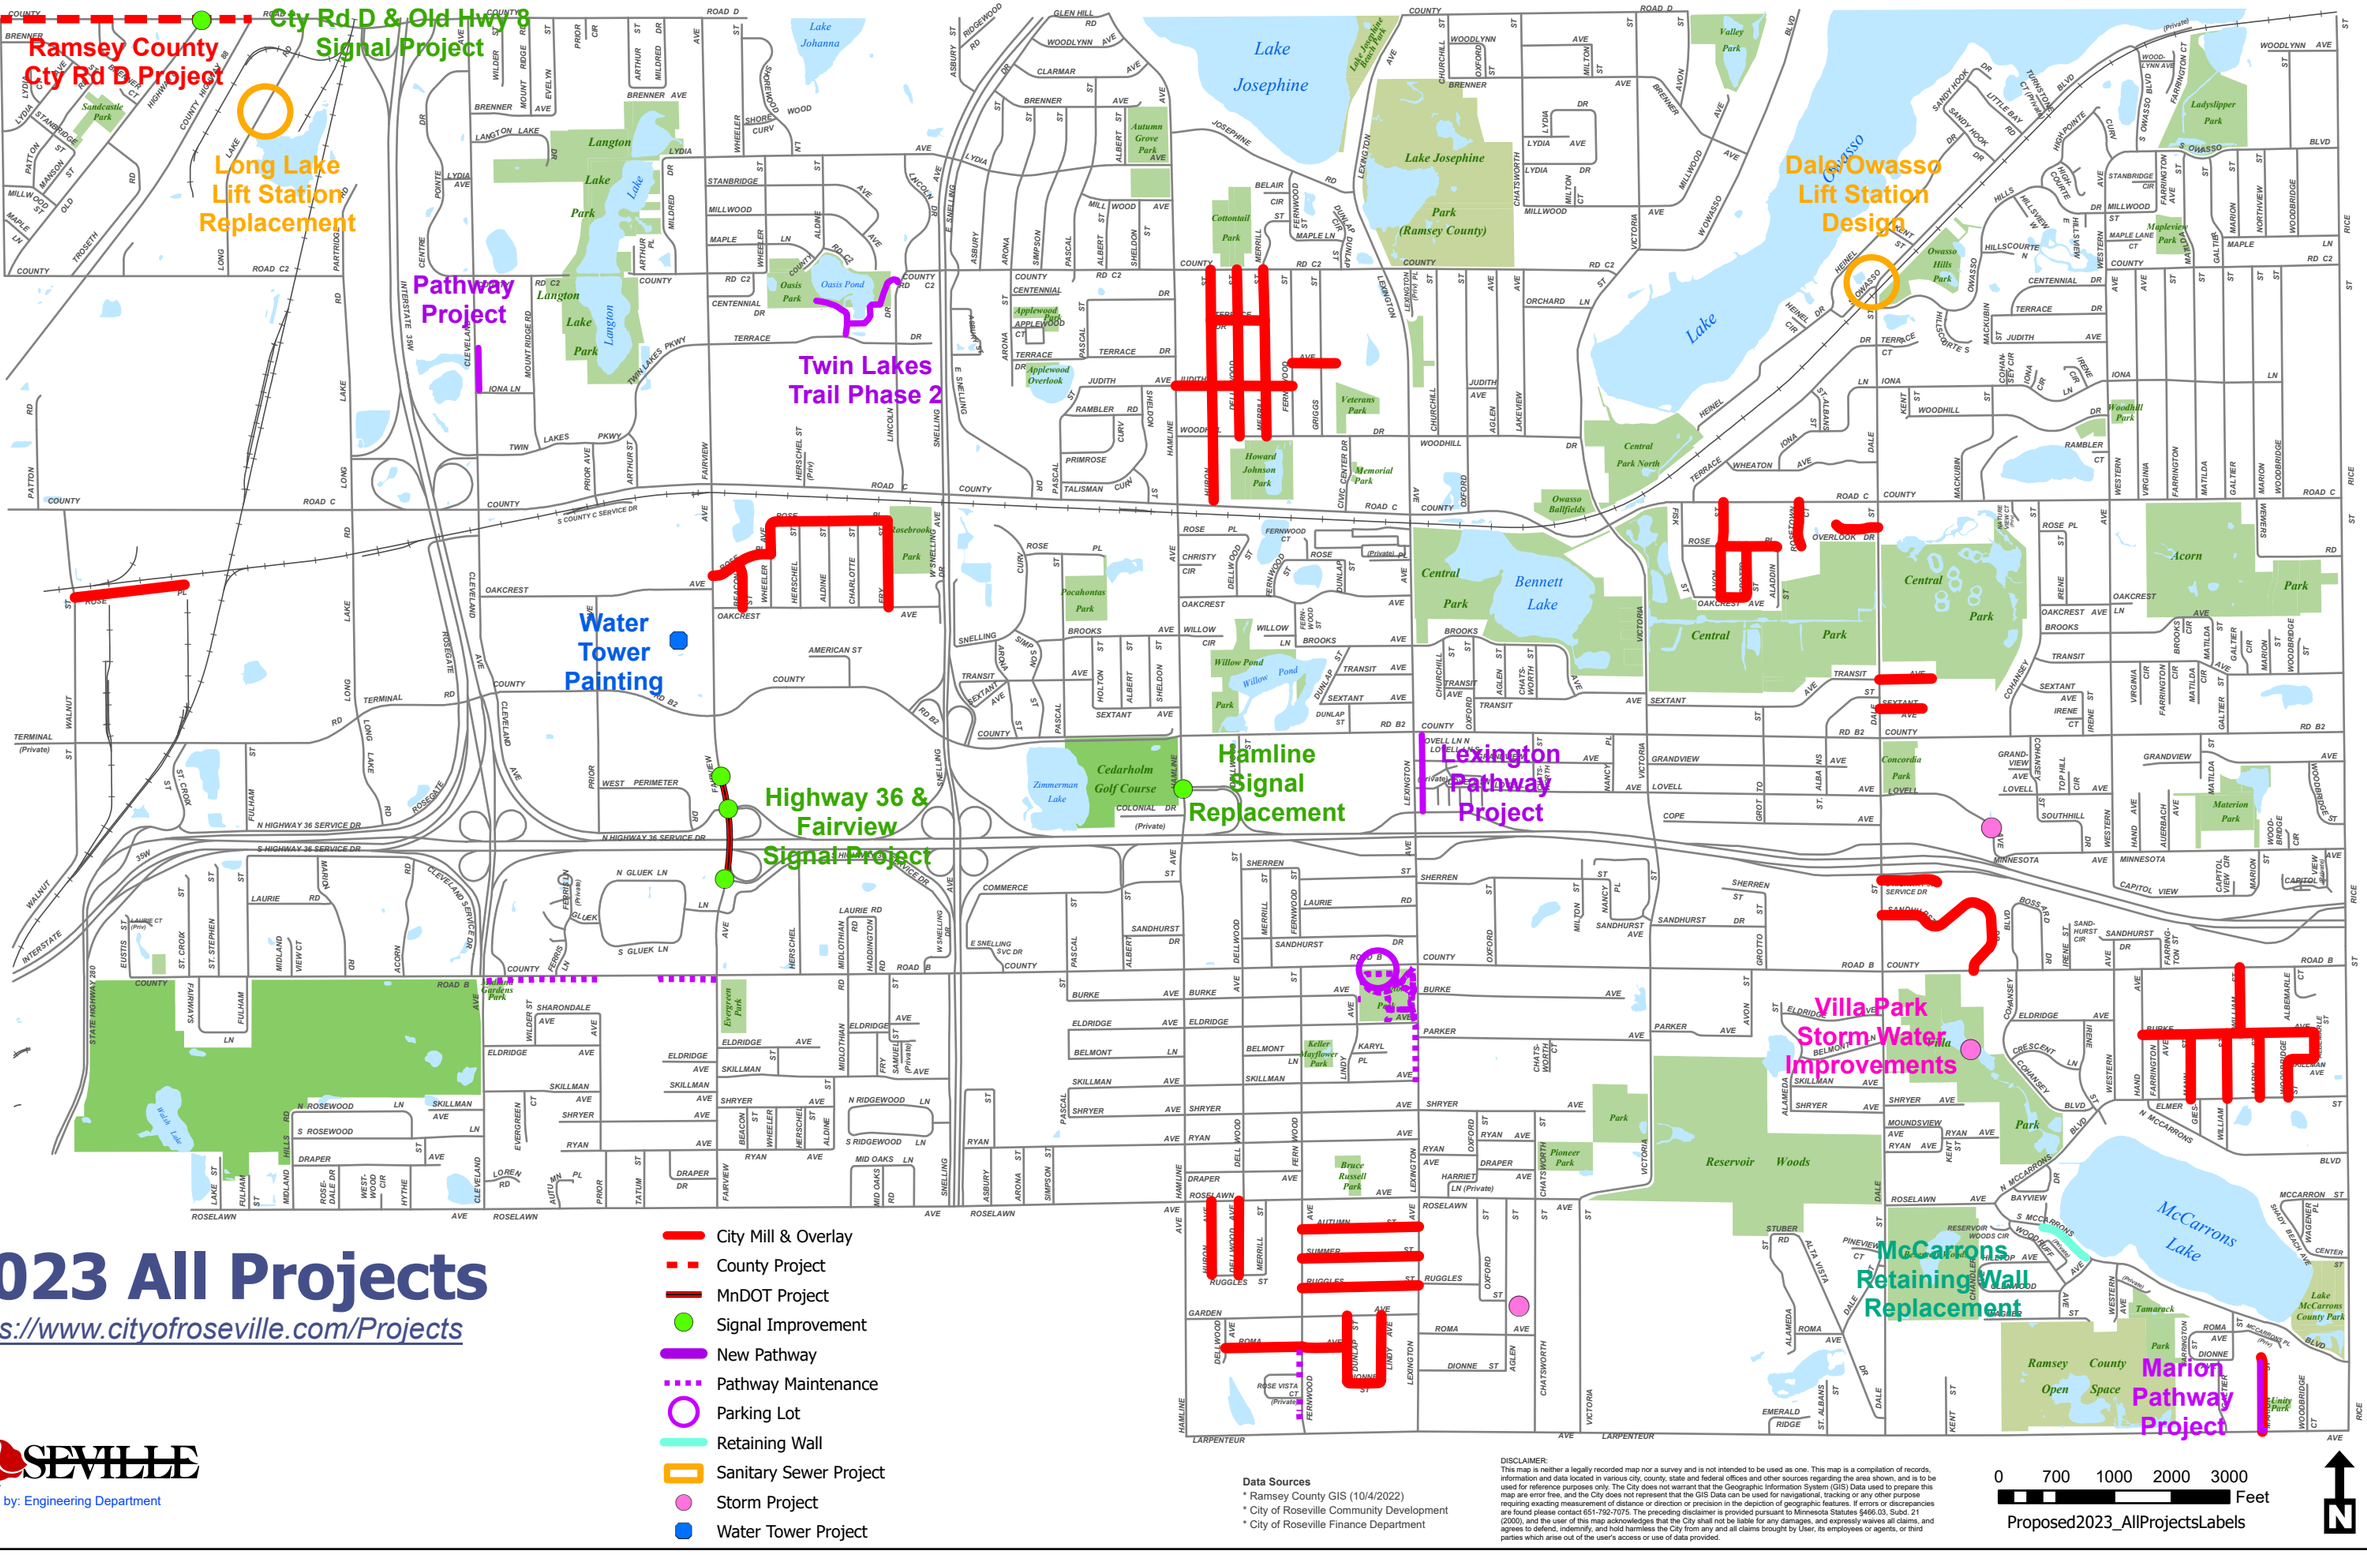

Sustainability Update

- City Council approved the Sustainability Specialist position for 2023, and staff interviewed 5 candidates in mid-February. Ms. Noelle Bakken was selected for the role and she will officially be the Sustainability Specialist in mid-May after she finishes her grad school program.
- Roseville was announced as one of the 2022 winners for the Intercity Home Energy Squad challenge, with the highest percentage of Home Energy Squad visits per capita out of 26 competing cities. The city will be celebrated at an award ceremony in March.
- Community outreach:
    - Staff spoke at New Life Presbyterian Church on February 4 at the request of their Earth Care Committee about the Roseville Sustainable Steward program, Roseville's sustainability efforts, and the Environmental Service Center planned to be built in Roseville by 2025.
    - Staff met with residents at Greenhouse Village on February 3 to answer questions about community solar subscriptions as they relate to co-op condominium communities.
    - Staff met three residents at a local coffee shop in January to talk about their sustainability priorities and how volunteers could help the City achieve its goals.
- Staff began work with the Gold Leaf pilot program over the last month, meeting with the other participating communities to brainstorm potential action items.

- Staff is working with an undergraduate student team from the University of Minnesota through May to help implement a Gold Leaf action item.
- As part of the resiliency planning team, staff has been helping the Rice Creek Watershed District plan for two upcoming Community Resilience Building workshops on February 28 and March 22.
- Roseville applied for and was selected to take part in the EV Smart Cities program through the Great Plains Institute, with the first kick-off meeting taking place on February 28. This free program provides cities with technical assistance and a roadmap to electric vehicle readiness, including how to secure funding and implement projects.
- Staff completed applications for an MPCA Community Resilience Planning grant, requesting funds for implementing a Climate Action Plan, and an MPCA Level 2 EV Charging grant to install two dual-port EV charging stations at City Hall.

Major Maintenance Activities:

- Street and Storm
    - We have had an additional 21" and 7 additional plow callouts since the time period of 11/29/22 thru 1/17/23. Season total to date is pushing 70".
    - Ongoing benching, snow blowing and hauling will continue.
    - Ongoing sign work related to winter conditions will continue.
    - Six additional water breaks that Street Maintenance hauled and put temporary patches on. Ongoing monitoring of patch conditions until staff can replace with permanent patches Spring 2023.
    -
- Water and Sanitary Sewer
    - Located City-owned facilities for Gopher State One Call locate requests.
    - Made weekly site visits to all lift stations.
    - Continued repairing water meters and MIUs.
    - Ten (10) repairs on our water main system since the first of the year.
    - New utility worker started on February 22.
    - Removed ice dams at the License Center and at the Maintenance Facility.
    - Took delivery of new F-350 with plow and lift gate.
    - New crane truck is expected to be delivered in six weeks. This will be used to perform maintenance on lift station pumps.
    - Annual fire system testing at City facilities.

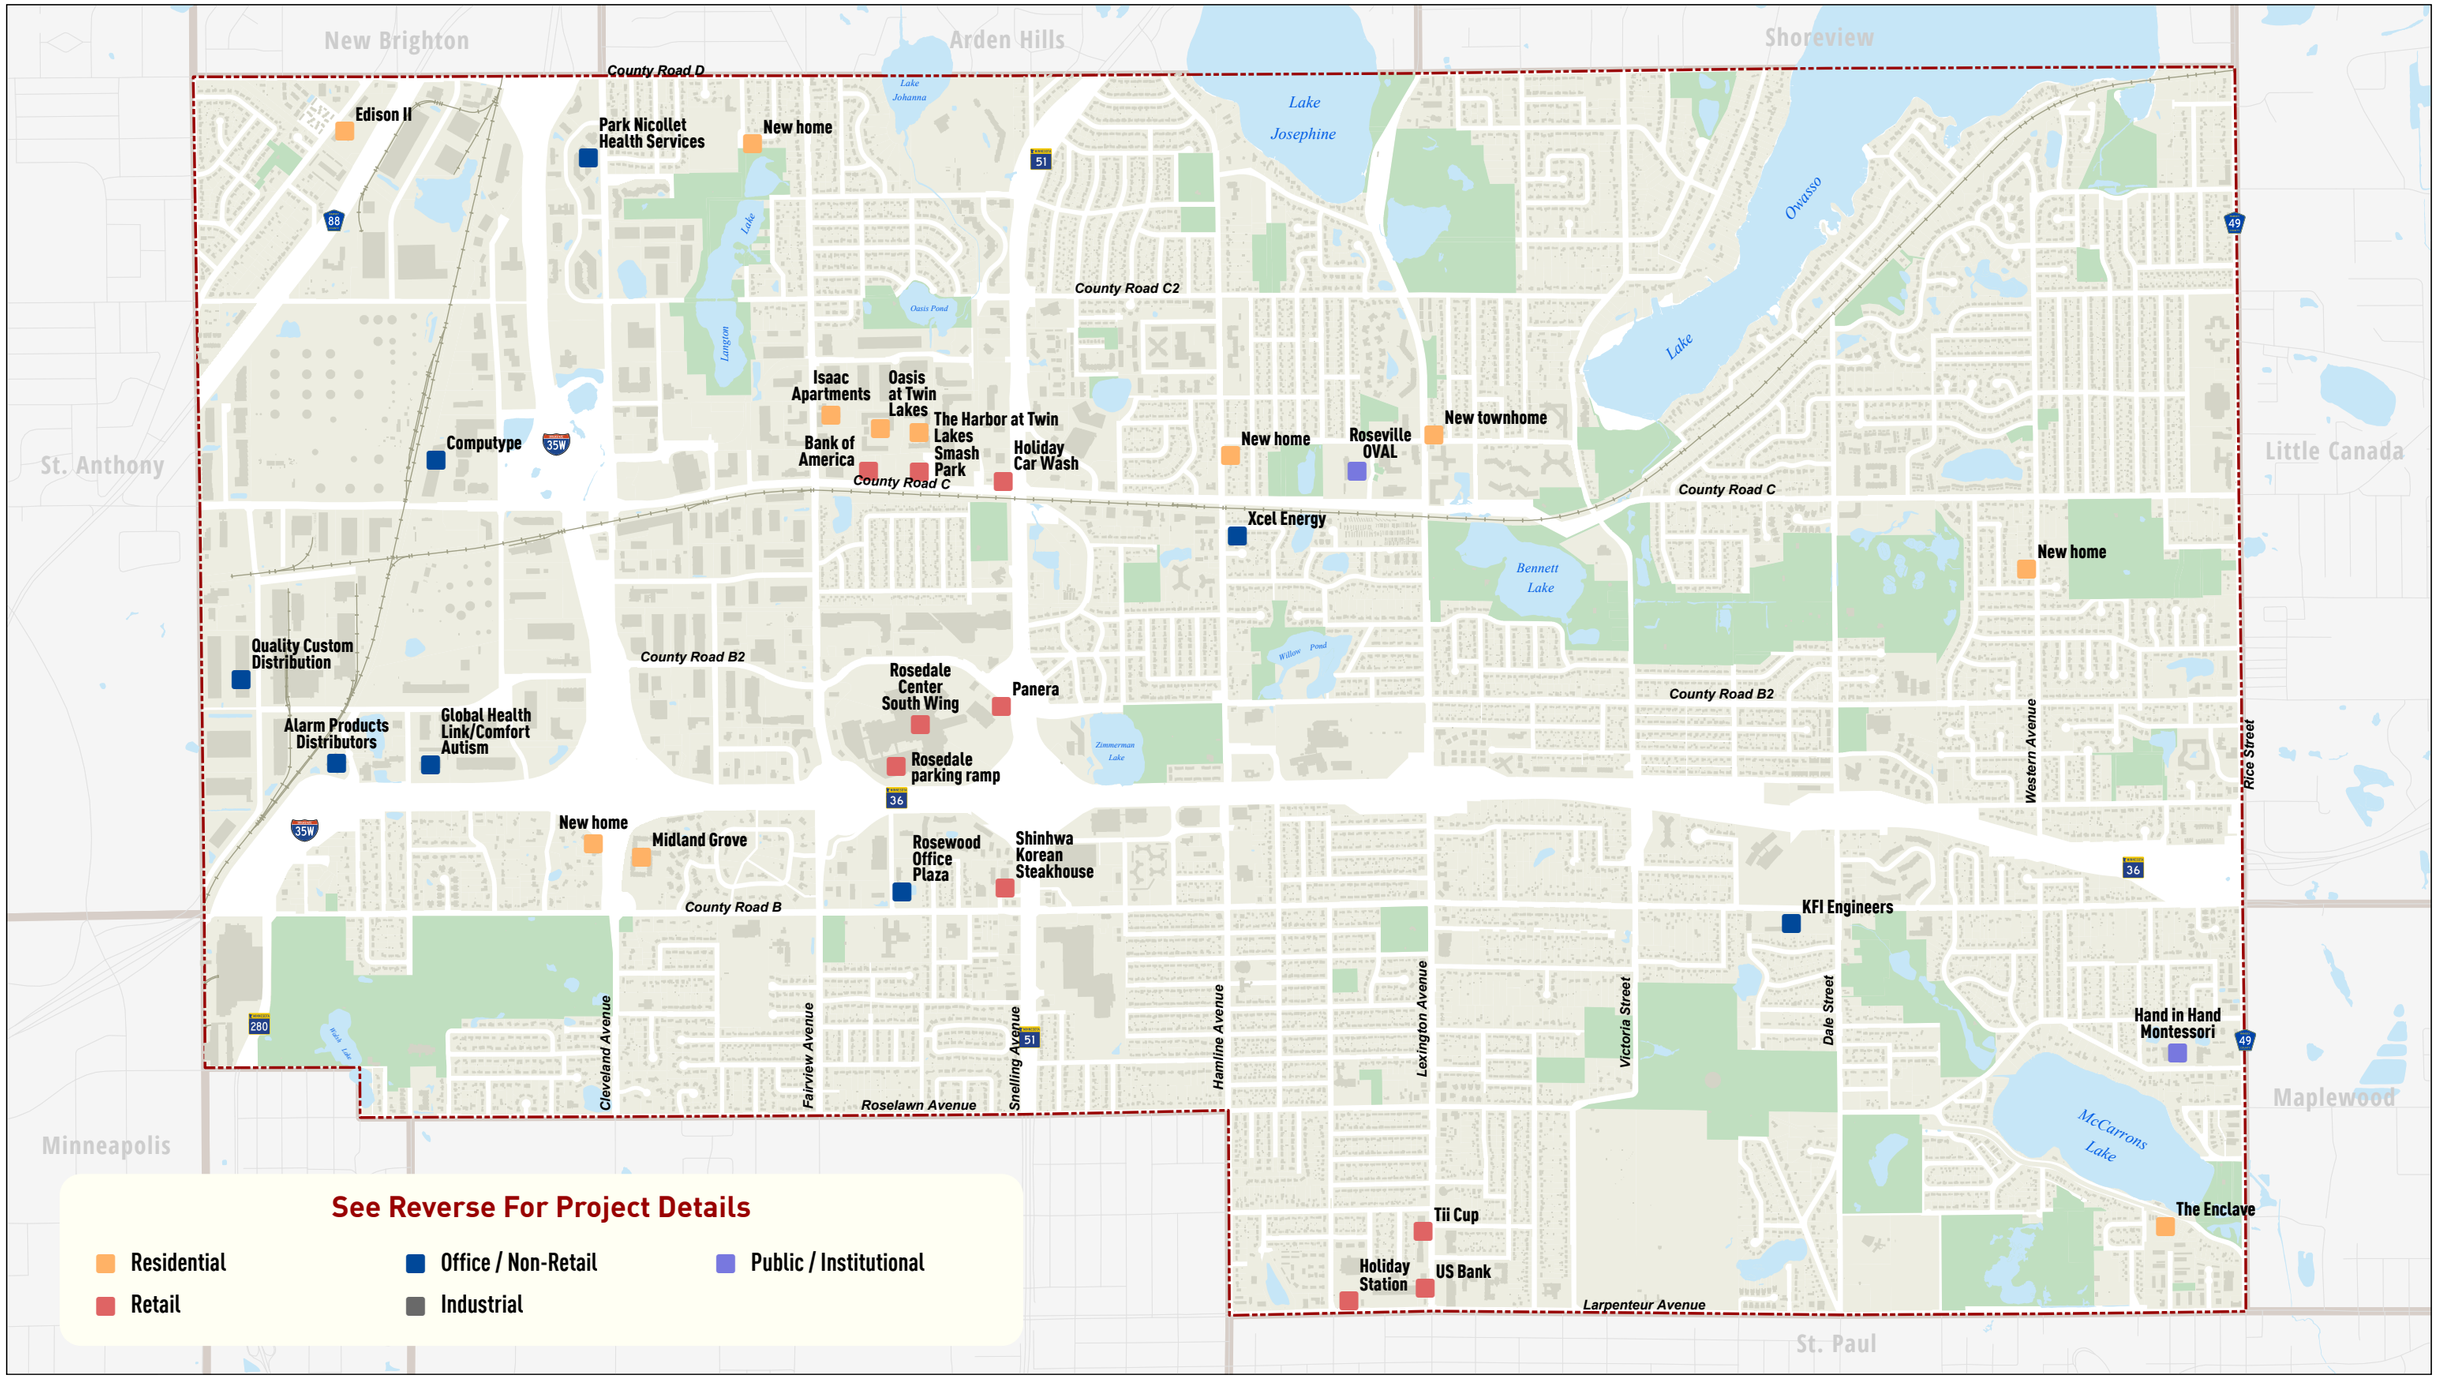

2023 All Projects

Sustainability Tip of the Month

Between gifts, lots of food, and excess decorations, the holidays can be a time full of fun—and extra waste. Here's how to deal with different types of holiday-related materials:

- Most wrapping paper should be put in the trash, unless it's 100% paper. No foil or glitter!
- Other cards and boxes that are 100% paper can be recycled.
- Old holiday lights should go to the Hazardous Waste site in St. Paul. **If you are disposing of a pre-lit artificial tree,** be sure to remove the lights first and dispose of them separately. (And switch to LEDs, since they use 80% less energy and generate less heat!)
- E-waste (cell phones, computers, keyboards, televisions, etc.) can be recycled for FREE by Ramsey County residents at Repowered in St. Paul.
- Have other things to toss but don't know how? Check out Ramsey County's A-Z Disposal guide to learn how to properly get rid of all sorts of items!

Roseville graduates from Partners in Energy

In partnership with our Energy Action Team, the City of Roseville developed an Energy Action Plan that was adopted in June 2020 by City Council. From 2021-2022, city staff worked to implement that Energy Action Plan and meet our four goals: reduce energy burden, increase residential energy efficiency, increase small & medium business energy efficiency, and increase adoption of renewable energy citywide.

Roseville is proud to count itself among the many accomplished cities who are graduates of the Partners in Energy program! Special thanks to Xcel Energy and the Center for Energy & Environment for their partnership throughout the past two years.

Smart Salting Practices

Winter has already put us through several sloppy storm systems this season. While salt is often necessary to keep our roadways and sidewalks safe, it also causes damage to local waterways and is dangerous to many plants and animals. **Here are some tips for smart salting:**

1. **Shovel** and scrape snow and ice from the pavement surface, as much as you can.
2. **Use less salt** - a 12 ounce coffee cup full is enough for a 20 foot driveway
3. **Check the temperature**—salt will not work below 15 degrees F.
4. **Consider using sand or lava grit** as alternatives, which can help provide traction on icy surfaces when the temperature is below the threshold where salt won't work.
5. **Sweep up extra salt and grit** once conditions have dried.

Renewable Energy Subscriptions

Are you a fan of renewable energy? The easiest way to support renewable electricity sources is to sign up for Windsource® or Solar*Rewards® Community from Xcel Energy!

These subscription services allow you to source some or all of your home electricity usage from renewable sources for a small monthly fee.

Check out **current renewable options available** from Xcel Energy and sign up today.

Positive Climate News

England will ban some single-use plastics. Following their 2020 ban on plastic straws, cotton swabs, and drink stirrers, England will ban plastic cutlery, plates, trays and other polystyrene cups and food containers starting October 2023.

Hole in the ozone layer on track to heal. Despite some setbacks from Chinese CFC emissions, the ozone layer is on track to return to pre-1980 conditions by 2066.

USDA approves first vaccine for honeybees. Scientists have developed a vaccine that encourages a prophylactic response in bees to prevent foulbrood, one bacterial threat to hives. The vaccine is injected into royal jelly, which the queen ingests, acquiring immunity and passing it onto her offspring.

Upcoming Sustainability Events

Sustainability Super Meeting — Tuesday, January 24th, 6:30pm. Hear Ryan Johnson and Noelle Bakken give an overview of 2022 sustainability work at the Public Works, Environment, and Transportation Commission meeting. Meetings are held at City Hall, 2660 Civic Center Drive in Roseville, and **on Zoom.**

Drive Electric MN Member Social — Thursday, January 26th, 4:30-6:30pm. Join other Electric Vehicle enthusiasts for a pint and appetizers provided by Drive Electric Minnesota at Minneapolis Cider Company! 701 SE 9th St Minneapolis, MN 55414**. Register here.**

New Life Presbyterian Sustainability Talk —Sunday, February 5th, 11:00am-12:00pm. New Life Presbyterian holds adult education sessions after their Sunday services. Noelle will be talking about Roseville's sustainability efforts, the new Roseville Sustainable Steward program, and the proposed Environmental Service Center coming to Roseville. New Life Presbyterian is located at 965 Larpenteur Avenue W., Roseville, MN 55113.

Thank you from your Roseville Sustainability Team!

ENVISION ROSEVILLE

MEMO

TO: Rebecca Olson and Corey Yunke, City of Roseville

FROM: Dan Edgerton and Brigitte Bjorklund, Zan Associates

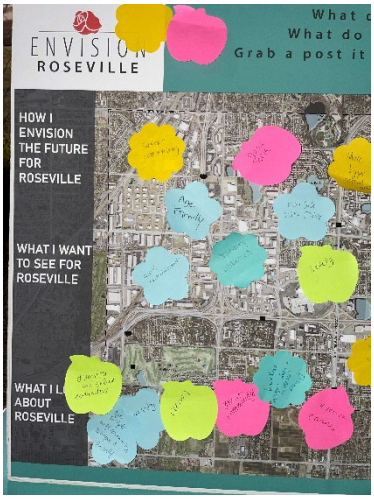

DATE: January 4, 2023

RE: Envision Roseville, Progress Report

The following includes a summary of the project status and next steps as of January 4, 2023. Fall/early-winter 2022 has been a big time for the Envision Roseville project! We successfully launched our Hello Lamp Post campaign and the project survey, we've continued meeting with community organizations, done several events, and are now gearing up to begin business engagement. Looking forward, things will slow down over the winter as we wrap up phase 1, before beginning phase 2 engagement activities in the spring.

The sections that follow show the status of major project tasks, including:

- Advisory Committees
- Promotional Content and Deliverables
- Community Partnerships
- Events and Activities
- Digital Engagement
- Business Engagement

Engagement activity, Homecoming Game

Project Committees

There are two standing project advisory committees – the Project Management Team (PMT) and the Community Advisory Group (CAG).

PMT

We anticipate at least three PMT workshops. The first workshop is complete. The next workshop is tentatively planned for late January 2023. The final workshop will happen in summer 2023. PMT discussion topics are shown below.

- PMT 1 (Complete): Review engagement plan and equity analysis and complete initial visioning activities
- PMT 2 (Late January): Review business engagement approach and dig into Phase 1 engagement results
- PMT 3 (Early summer): Review Phase 2 engagement results and dig into findings and recommendations

CAG

We anticipate at least two workshops. The first is complete and the next is tentatively planned for Spring 2023.

- CAG 1 (Complete); Review engagement plan and equity analysis and complete initial visioning activities
- CAG 2 (Spring 2023): Review business engagement approach and dig into Phase 1 engagement results

Promotional Content and Deliverables

The following is a summary of the status for Phase 1 material development.

Item	Status
Engagement and Communications Plan	Complete
Equity analysis, phase 1	Complete
Project branding	Complete
Project promotional flyer (multiple languages)	Complete

Item	Status
Engagement activity design and production (multiple languages)	Complete
Project website launch/mapping and visioning activities	Complete
Online survey launch (multiple languages)	Complete
Social media campaign launch	Complete
Hello Lamp Post launch (multiple languages)	Complete
Print surveys (multiple languages)	Complete
Community event handout (multiple languages)	Complete
Video interview for city communications	Complete
Equity Analysis, phase 2	Underway
Business engagement survey and focus group recruitment	Underway
Phase 1 results analysis	Underway
Phase 2 engagement activities - Events - Community partnerships - HLP	Pending
Final report	Pending

Community Partnerships

A key component of this work is to foster relationships with community-based organizations, community leaders, and other culturally specific organizations – based on the stakeholder analysis included in the communications and engagement plan – to connect with people who otherwise might not participate in the process.

Our initial intent was to participate in at least 10 meetings or events with community partner groups over the course of the project. As part of Phase 1, we engaged 10 community organizations and have had initial communications with more than 20 additional organizations. Engagement has included information sharing, phone interviews, and presentations at organization meetings. As part of phase 2, we will reconnect with each of the organizations contacted to close the loop and meet strategically with specific groups, depending on the tabulation of phase 1 results.

Organization	Initial Meeting Date & Time
Visit Roseville	Wednesday, 9/28, 3:00 p-3:30p
Roseville Area Schools	Friday, 9/30, 12:30p-1:00p
Resilient Roseville	Wednesday, 10/05, 3:30p-4:00p
Man Up Club	Thursday, 10/06, 12:00p-12:30p
Roseville Area High School: Cultural Liaisons	Wednesday, 10/12, 10:00a-11:00a
Monthly HRIEC Meeting on Community	Wednesday, 10/19, 6:30p-8:30p
Do Good Roseville	Tuesday, 10/25 at 10:00a
King of Kings Lutheran	Wednesday, 10/26 at 11:30a
Roseville Area High School: Cultural Liaisons	Wednesday, 10/12, 10:00a-11:00a
Roseville Area Schools: Cultural Liaisons (all schools)	Thursday, 11/17, 1 to 3p
Travelers with Disabilities Committee – Metropolitan Airport Commission TSA Disability & Medical Condition Coalition	Multiple contacts made and hoping to plan engagement activities

Kids in Need	Shared information and provided a promotional flyer
Every Meal	Shared information and provided a promotional flyer

Events and Activities

Another component of the project is meeting people in the community at high activity locations, in the places they already go. Our initial intent was to participate in at least 15 events or activities over the course of the project. As part of Phase 1, we participated in five (5) events and have plans to complete 3 more, as summarized in the table below.

Date	Event	Status
Saturday, September 17, 2022 10-4 pm	Wild Rice Festival	Complete
Thursday, September 22: 4:30-6 pm	Tenant Notification	Complete
Friday, September 23, 6-10 pm	Tapped and uncorked	Complete (no staff attended, but flyers were placed at the registration table)
Friday, September 30, 6-10 pm	Roseville HS Homecoming	Complete
Saturday, October 29, 1-4 pm	Spooktacular	Complete
Thursday, December 15, 5:30 – 7:30	Community Fiesta (at the Oval)	Complete
Tuesday, January 10, 6:30 – 7:30	Community Open House - Library	Confirmed

Virtual Engagement

Virtual engagement activities are a great way to expand the reach of our project. Virtual engagement options to-date have included a project engagement platform (website) with a project overview page, survey (multiple languages), wiki map to leave location specific comments, and an ideas wall to post free form comments. In addition, Hello Lamp Post objects (e.g., yard signs, posters, etc.) were placed in over 65 throughout the community and shared virtually through city communication channels to all people to engage using text messages. The engagement platform and Hello Lamp Post objects were promoted using multiple city communication channels including the citywide newsletter, email updates, and social media.

Virtual engagement platform

(includes landing page, survey, wiki map, and ideas wall)

- 3,579 visits
- 959 unique users
- 98 pins
- 73 survey responses (let's bump that up!)
- 20+ comment wall posts

Hello Lamp Post – Key Words

Hello Lamp Post

- 103 conversations

- 436 interactions
- Top object locations: virtual, bus stops, rose sculptures, Rosedale

Business Engagement

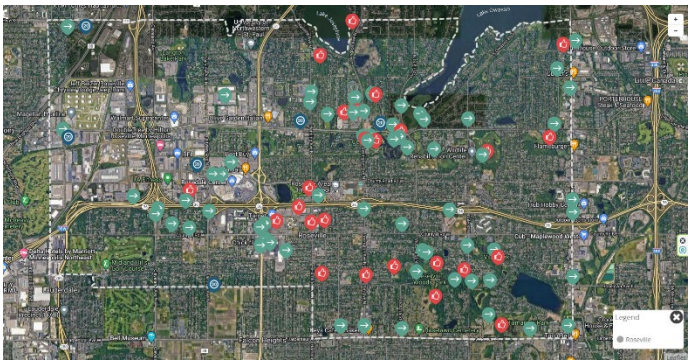

The final category of engagement is with key Roseville businesses and industry groups. This task is just getting started and will include a business survey and up to 15 interviews or listening sessions with stakeholders. We have prepared an initial contact list and launched the survey in December 2022. We anticipate conducting the listening sessions in spring 2023, in conjunction with Phase 2 engagement activities.

Results Sample

We are just beginning to tabulate results from Phase 1 engagement activities, and we have a lot to work with, which is great! The following is a sample of some of the themes and outcomes emerging. Disclaimer: This is just a sampling and should be considered draft. It is by no means complete or all inclusive.

Themes and Outcomes

- Parks (most prevalent theme)
  - Ongoing funding
  - Regular programming
  - Preservation and green space
  - Splash pad
  - More access to nature
- Transportation (streets, sidewalks, and trails)
  - Better transit access (busses and light rail)
  - Traffic and congestions mitigation
  - Prioritize people who walk/walkable development/more sidewalks
  - Active transportation
- Community engagement/neighborhood unity
  - Know your neighbors
  - Encourage block parties
  - New community center
  - Townhalls/accessible leaders
  - Meet people in the community
  - People like the library
- Local businesses
  - Promotional websites for small businesses/social media
  - Events
  - Zoning/tax breaks
  - Mixed use development
- Housing and Development
  - Multigenerational
  - Affordable
  - More amenities for young people/housing for young people/more condos
  - Less dense housing
  - Change nothing
  - More restaurants and night life
- Sustainability/environment
  - Incentivize energy conservation

Wikimap – "pins"

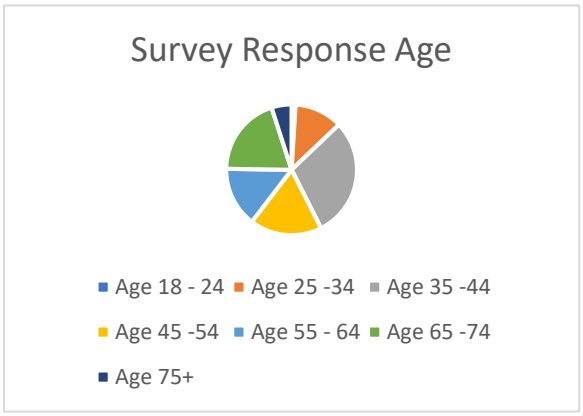

Spooktacular, engagement activity

- Safety and security
    - Reduce crime
- Education
    - Upgrade schools
    - Invest in children

Who is Responding

- Survey + HLP: About 85% residents, 15% visitors. Fair geographic coverage across the city for residents
- 30% of survey respondents age 35 – 44
- 20% of survey respondents identify as “BIPOC”
- 80% of survey respondents live in a single family home
-

Project Overview

Project objectives

Work plan

Schedule

Project objectives

- Develop a comprehensive set of community aspirations and specific outcomes for each
- Engage a diverse range of Roseville communities in the process
- Results will guide future planning efforts

Work Plan

1 DISCOVERY

- Project Management Team 3
- Demographic review
- Target community and stakeholder group list
- Equity analysis (ZEST)
- Key measures and engagement questions
- Engagement and communications plan
- Website launch
- Hello Lamp Post launch (optional)

2 VISIONING

- Project Managerment Team 3
- Hello Lamp Post canvassing
- Initial project promotions: email blast, social media, flyers, posters, etc.
- Online sirvey and interactive map
- Website update
- Community meetings
- Pop-ups and community events
- Community listening sessions and presentations
- Business engagement
- Community workshop 1
- Equity analysis update (ZEST)

3 SHARING

- Project Managerment Team 3
- Community workshop 2
- Follow-up communications: email blast, social media, flyers, posters, etc.
- Final report

Strategies and Outcomes

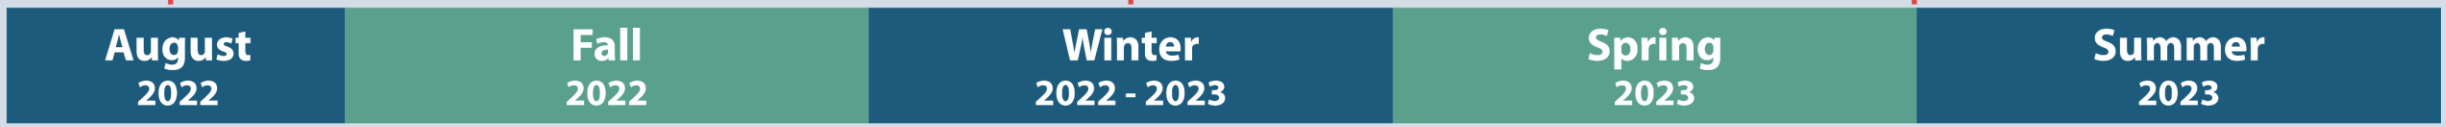

Timeline

START UP

- Develop a work plan
- Prepare engagement material
- Coordinate schedules

PHASE 2 COMMUNITY ENGAGEMENT

- Review vision and aspirations
- Prioritize outcomes

PHASE 1 COMMUNITY ENGAGEMENT

- Identify community vision
- Develop aspirations and outcomes

RESULTS

- Share the community input collected and vet conclusions
- Present community vision and celebrate!

ENVISION
ROSEVILLE

Tell us about yo

The City of Roseville is leading a community visioning project. The purpose of this project is to review, update, and develop community aspirations, and to create and prioritize outcomes that will help the city to better realize those aspirations. The existing community aspirations are as follows:

As a community, we (Roseville) aspire to be:

- Welcoming, inclusive, and respectful
- Safe and law-abiding
- Economically prosperous, with a stable and broad tax base
- Secure in our diverse and quality housing and neighborhoods
- Environmentally responsible, with well-maintained natural assets
- Physically and mentally active and healthy
- Well-connected through transportation and technology infrastructure
- Engaged in our community's success as citizens, neighbors, volunteers, leaders, and businesspeople

Which of the following best describes you

I live in Roseville | I work in Roseville but don't live here | I am visiting Roseville

If you are a resident, how long have you lived in

ENVISION ROSEVILLE

Roseville wants to hear from business owners. Do you, a friend, or family member own a business?

WE NEED YOUR HELP! The city wants to collaborate with Roseville residents and businesses to develop a vision for the city. PLEASE INVITE BUSINESS OWNERS TO COMPLETE A SURVEY to help us develop a vision for the community that reflects their values and aspirations. The survey will take about 7 minutes to complete. All responses will be anonymous and any personal information will not be shared with any outside parties.

What is a community vision?

A community vision is an aspirational guide or blueprint for the city. It provides the "North Star" or overall basis for important community decisions in areas like transportation and infrastructure, business environment, housing and neighborhood development, safety and security, schools, parks and more. To learn more, visit https://zan.mysocialpinpoint.com/envision-roseville

We are also conducting a LIMITED NUMBER OF INTERVIEWS AND FOCUS GROUPS with Roseville business. If you or someone you know may be interested in contributing time and energy to create and refine the community vision from a business perspective, please have them e-mail jking@econdevelop.com and mention Envision Roseville Business in the subject line. Thank you!

- Existing parking areas

Roadway Volume Comparison

Dale Street	
(Front Ave to Hwy 36)	7,800 to 15,700 vehicles per day
Maryland Avenue	
(I-35E to Johnson Pkwy)	15,100 to 24,500 vehicles per day
Larpenteur Avenue	
(Dale St to I-35E)	9,300 to 11,100 vehicles per day
McKnight Road	
(North of Villages on McKnight to Londin Ln)	6,300 to 9,880 vehicles per day

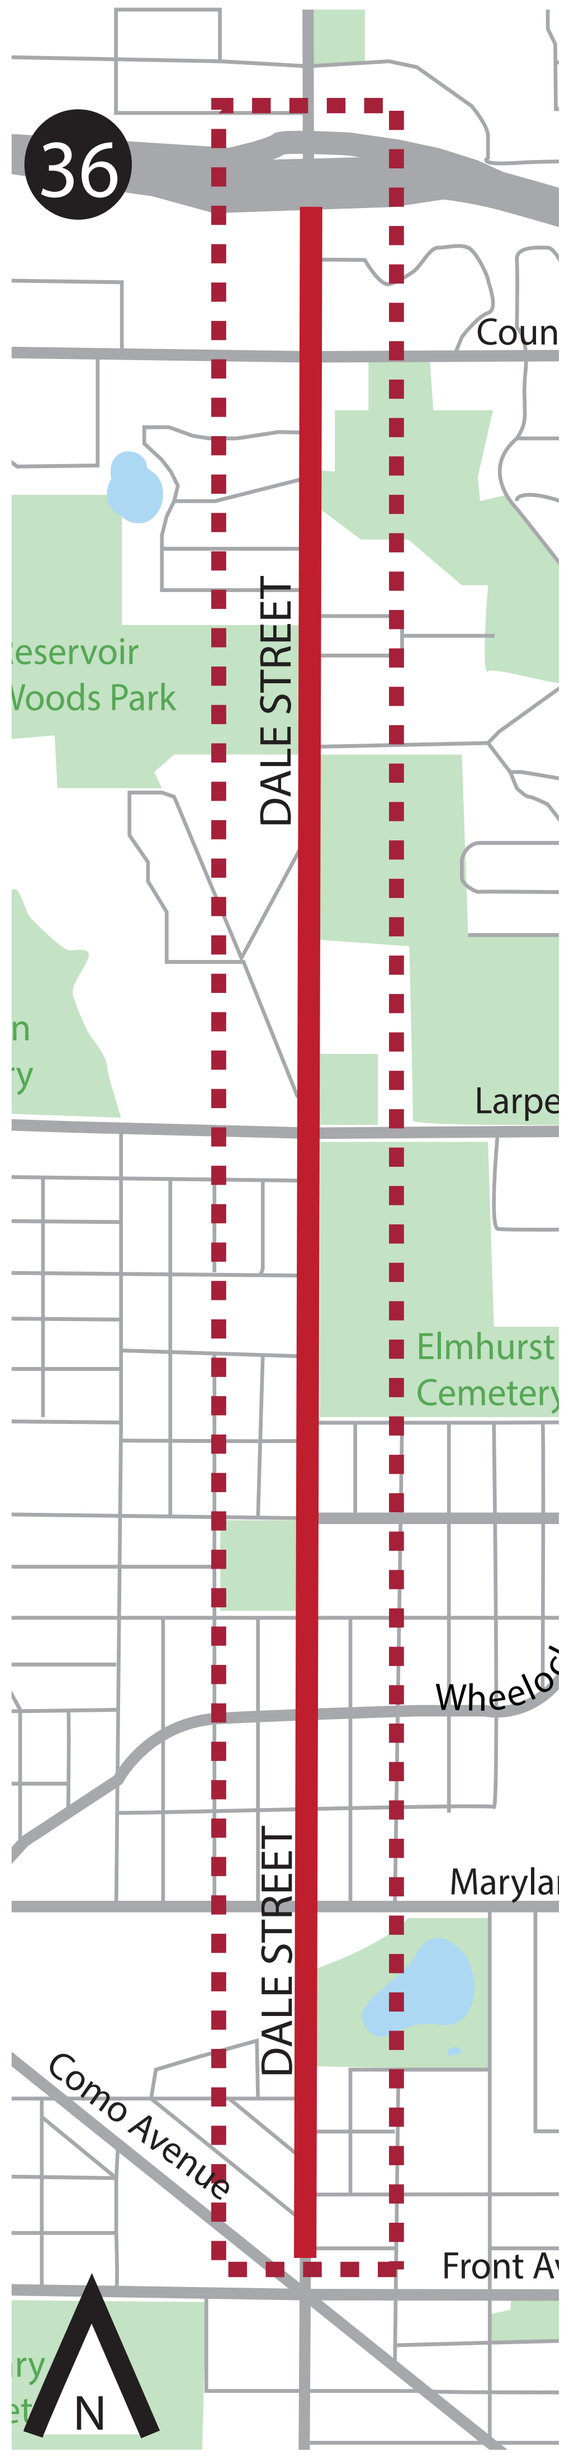

RAMSEY COUNTY
Public Works

PROJECT PURPOSE AND SCHEDULE

Project Need and Goals

Four-lane undivided roadways have a variety of issues. According to the MnDOT guidance, four-lane undivided roadways have the highest urban crash rate of any road configuration in Minnesota.

Ramsey County will implement a 4-to-3 lane conversion of Dale Street to reduce the frequency and severity of crashes occurring along this roadway. The roadway will be resurfaced, restriped and signals will be replaced or updated along the corridor.

WHY was the project chosen?

This project was identified in the 2020 Ramsey County 4-to-3 lane conversion study; per the county study, a safety conversion of Dale Street will result in a significant benefit to crash reduction.

WHERE is it happening?

This project includes Dale Street between Highway 36 in Roseville and north of Como Avenue in Saint Paul.

WHEN is it happening?

Project introduction will conclude in winter 2022/2023.
This phase will introduce the community to the Dale Street Safety Conversion Project. Efforts will include sharing information about the project and learning about the community's desires for pedestrian and bicycle improvements.

Conceptual design will conclude in spring/summer 2023.
This phase will include the development of roadway design concepts and sharing them with the community for input.

Final design will conclude in winter 2023/2024.
This phase will share the final design for Dale Street with the community and discuss construction activity that will occur in 2024.

COMMUNITY ENGAGEMENT

Engagement Approach

Engagement is an important component to the Dale Street project. Engagement on this project will include various public input opportunities including open houses, surveys and conversations with the project team.

Phase 1

The first phase of the project will begin with a project introduction where the project team will present existing conditions along the corridor and gather input that will influence conceptual design.

Engagement Goal:	Introduce the public to the project and learn about the community's desires for pedestrian and bicycle improvements.

Phase 2

During the second phase of the project, the project team will present a refined conceptual design and will seek further input from the public before advancing the concept to detailed engineering and design, at which point it is very unlikely significant changes will be made to concept.

Engagement Goal:	Share the preliminary design with the public and learn about desired refinements.

Phase 3

The third phase of the project is where the project team will present the final project concept and will inform community of next steps regarding construction and periodic project updates.

Engagement Goal:	Share the final design and introduce the construction process.

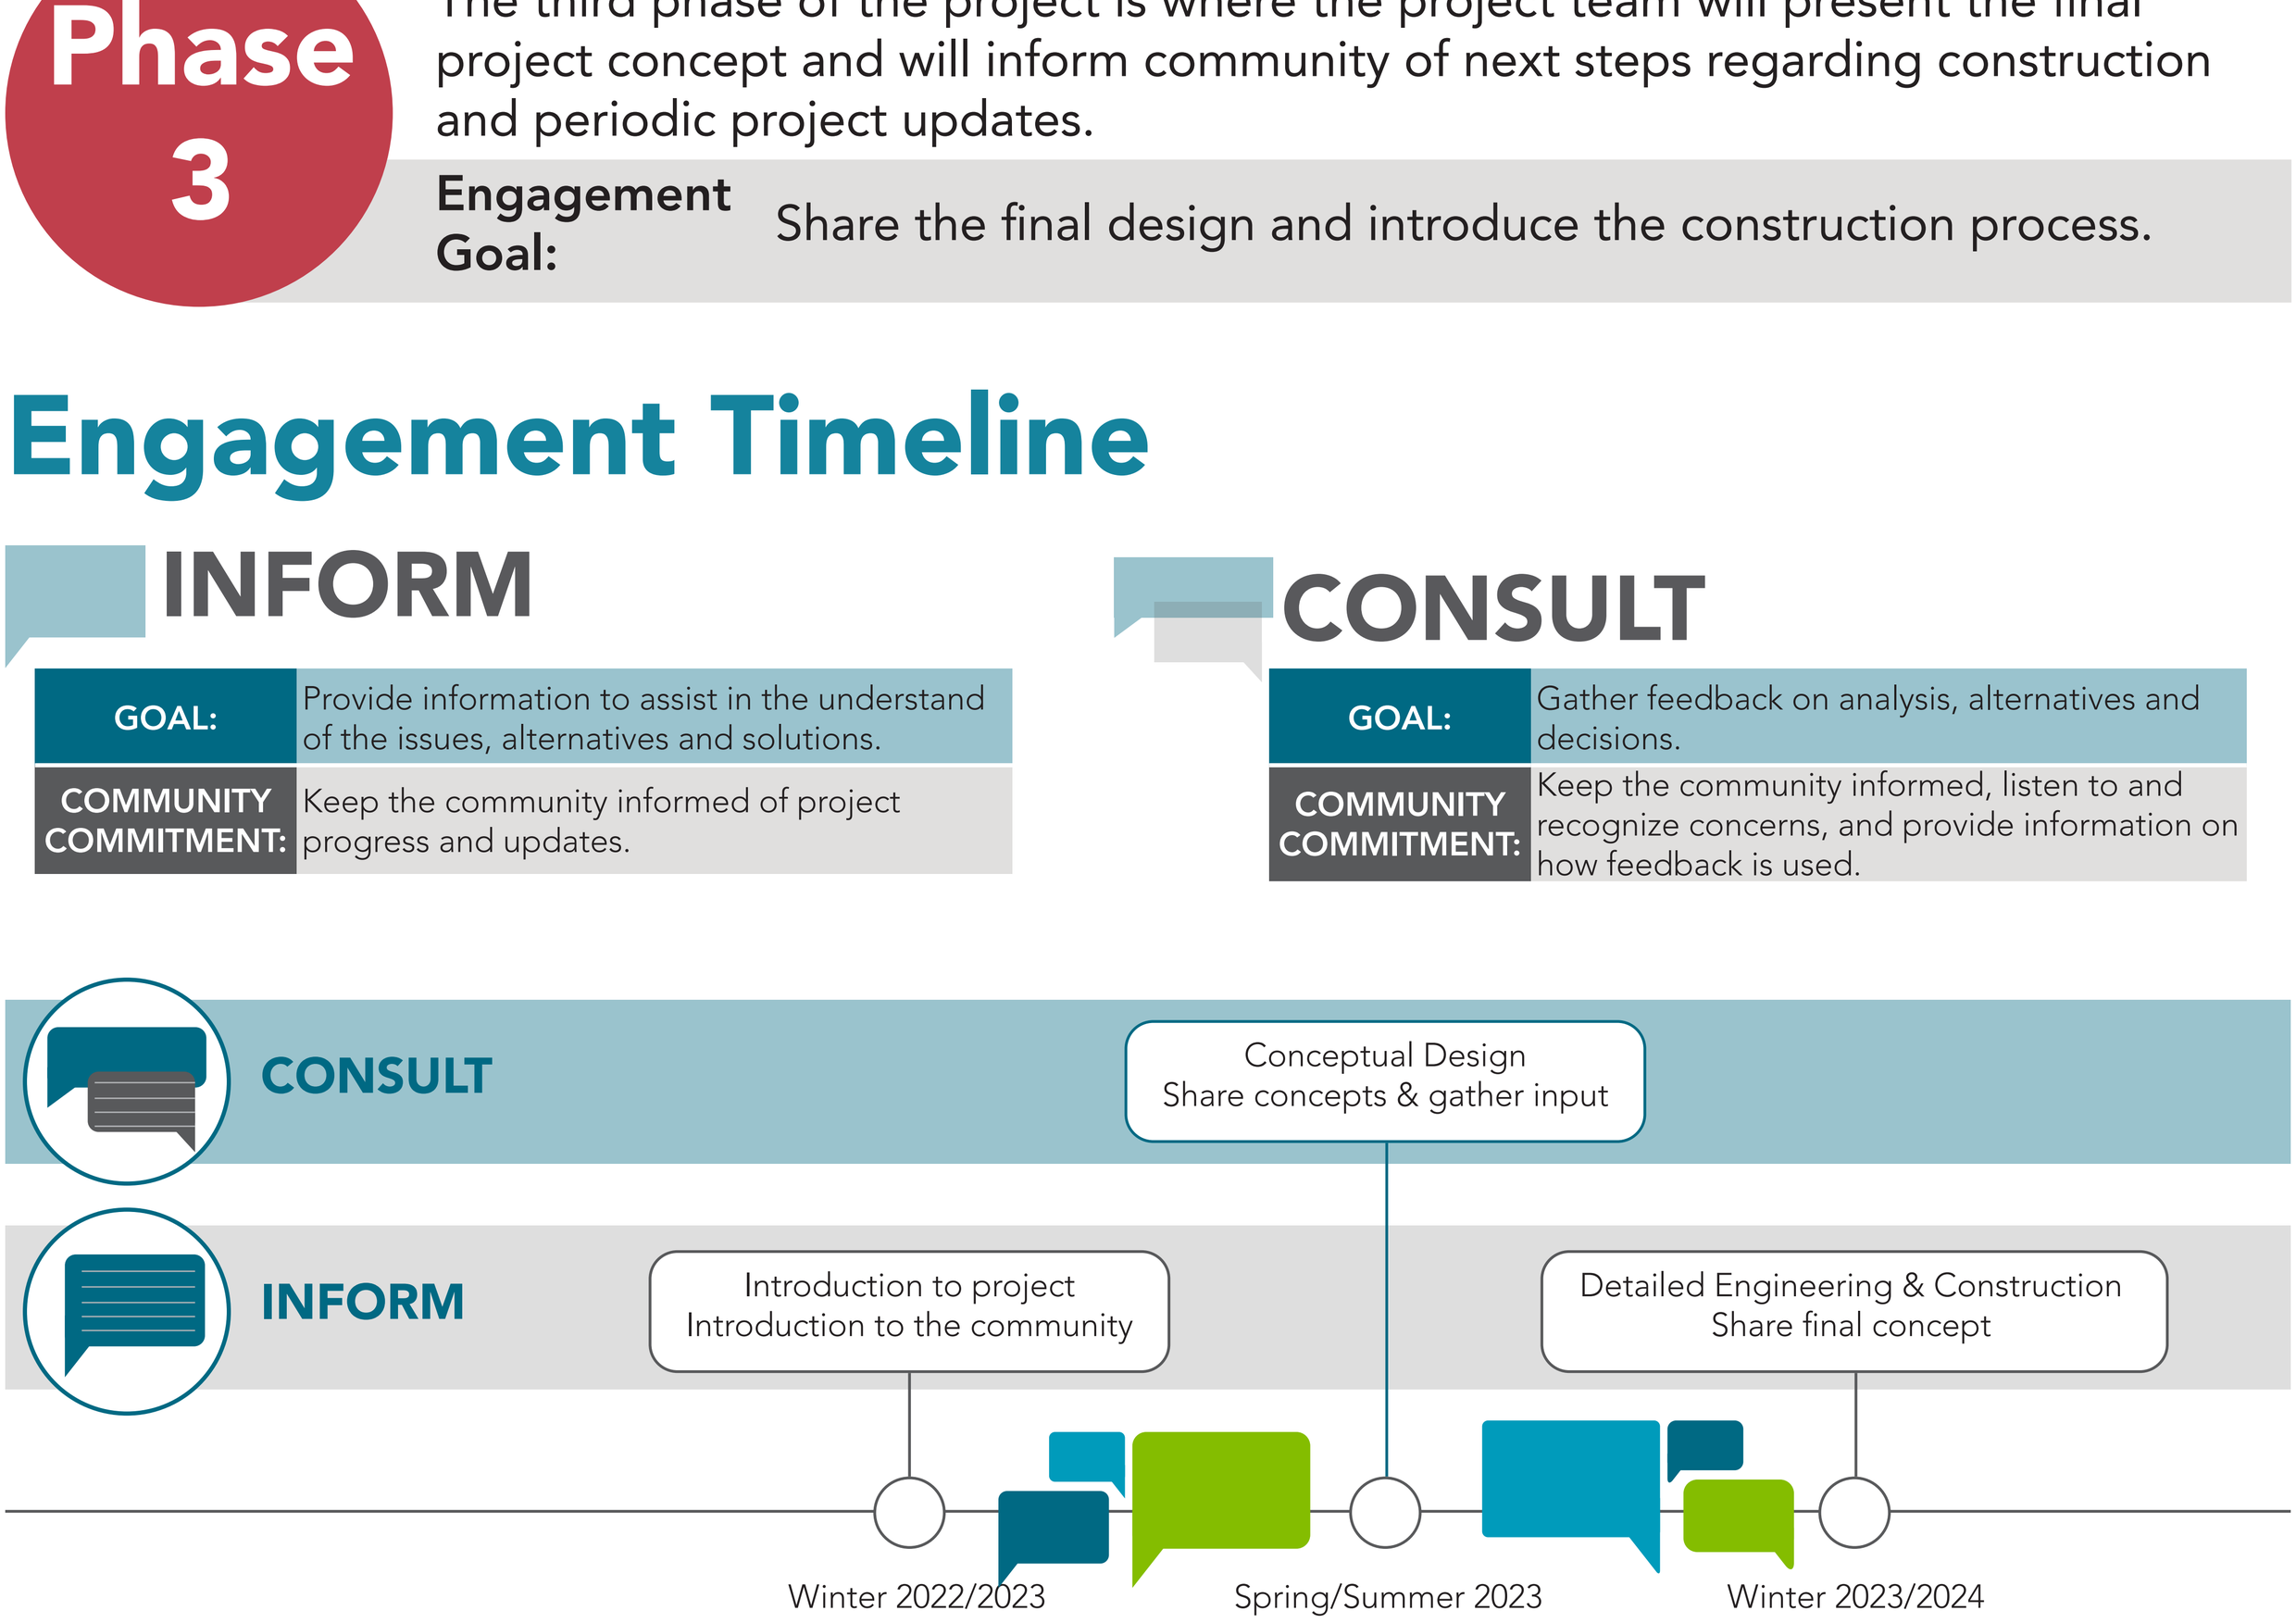

Engagement Timeline

INFORM

GOAL:	Provide information to assist in the understand of the issues, alternatives and solutions.
COMMUNITY COMMITMENT:	Keep the community informed of project progress and updates.

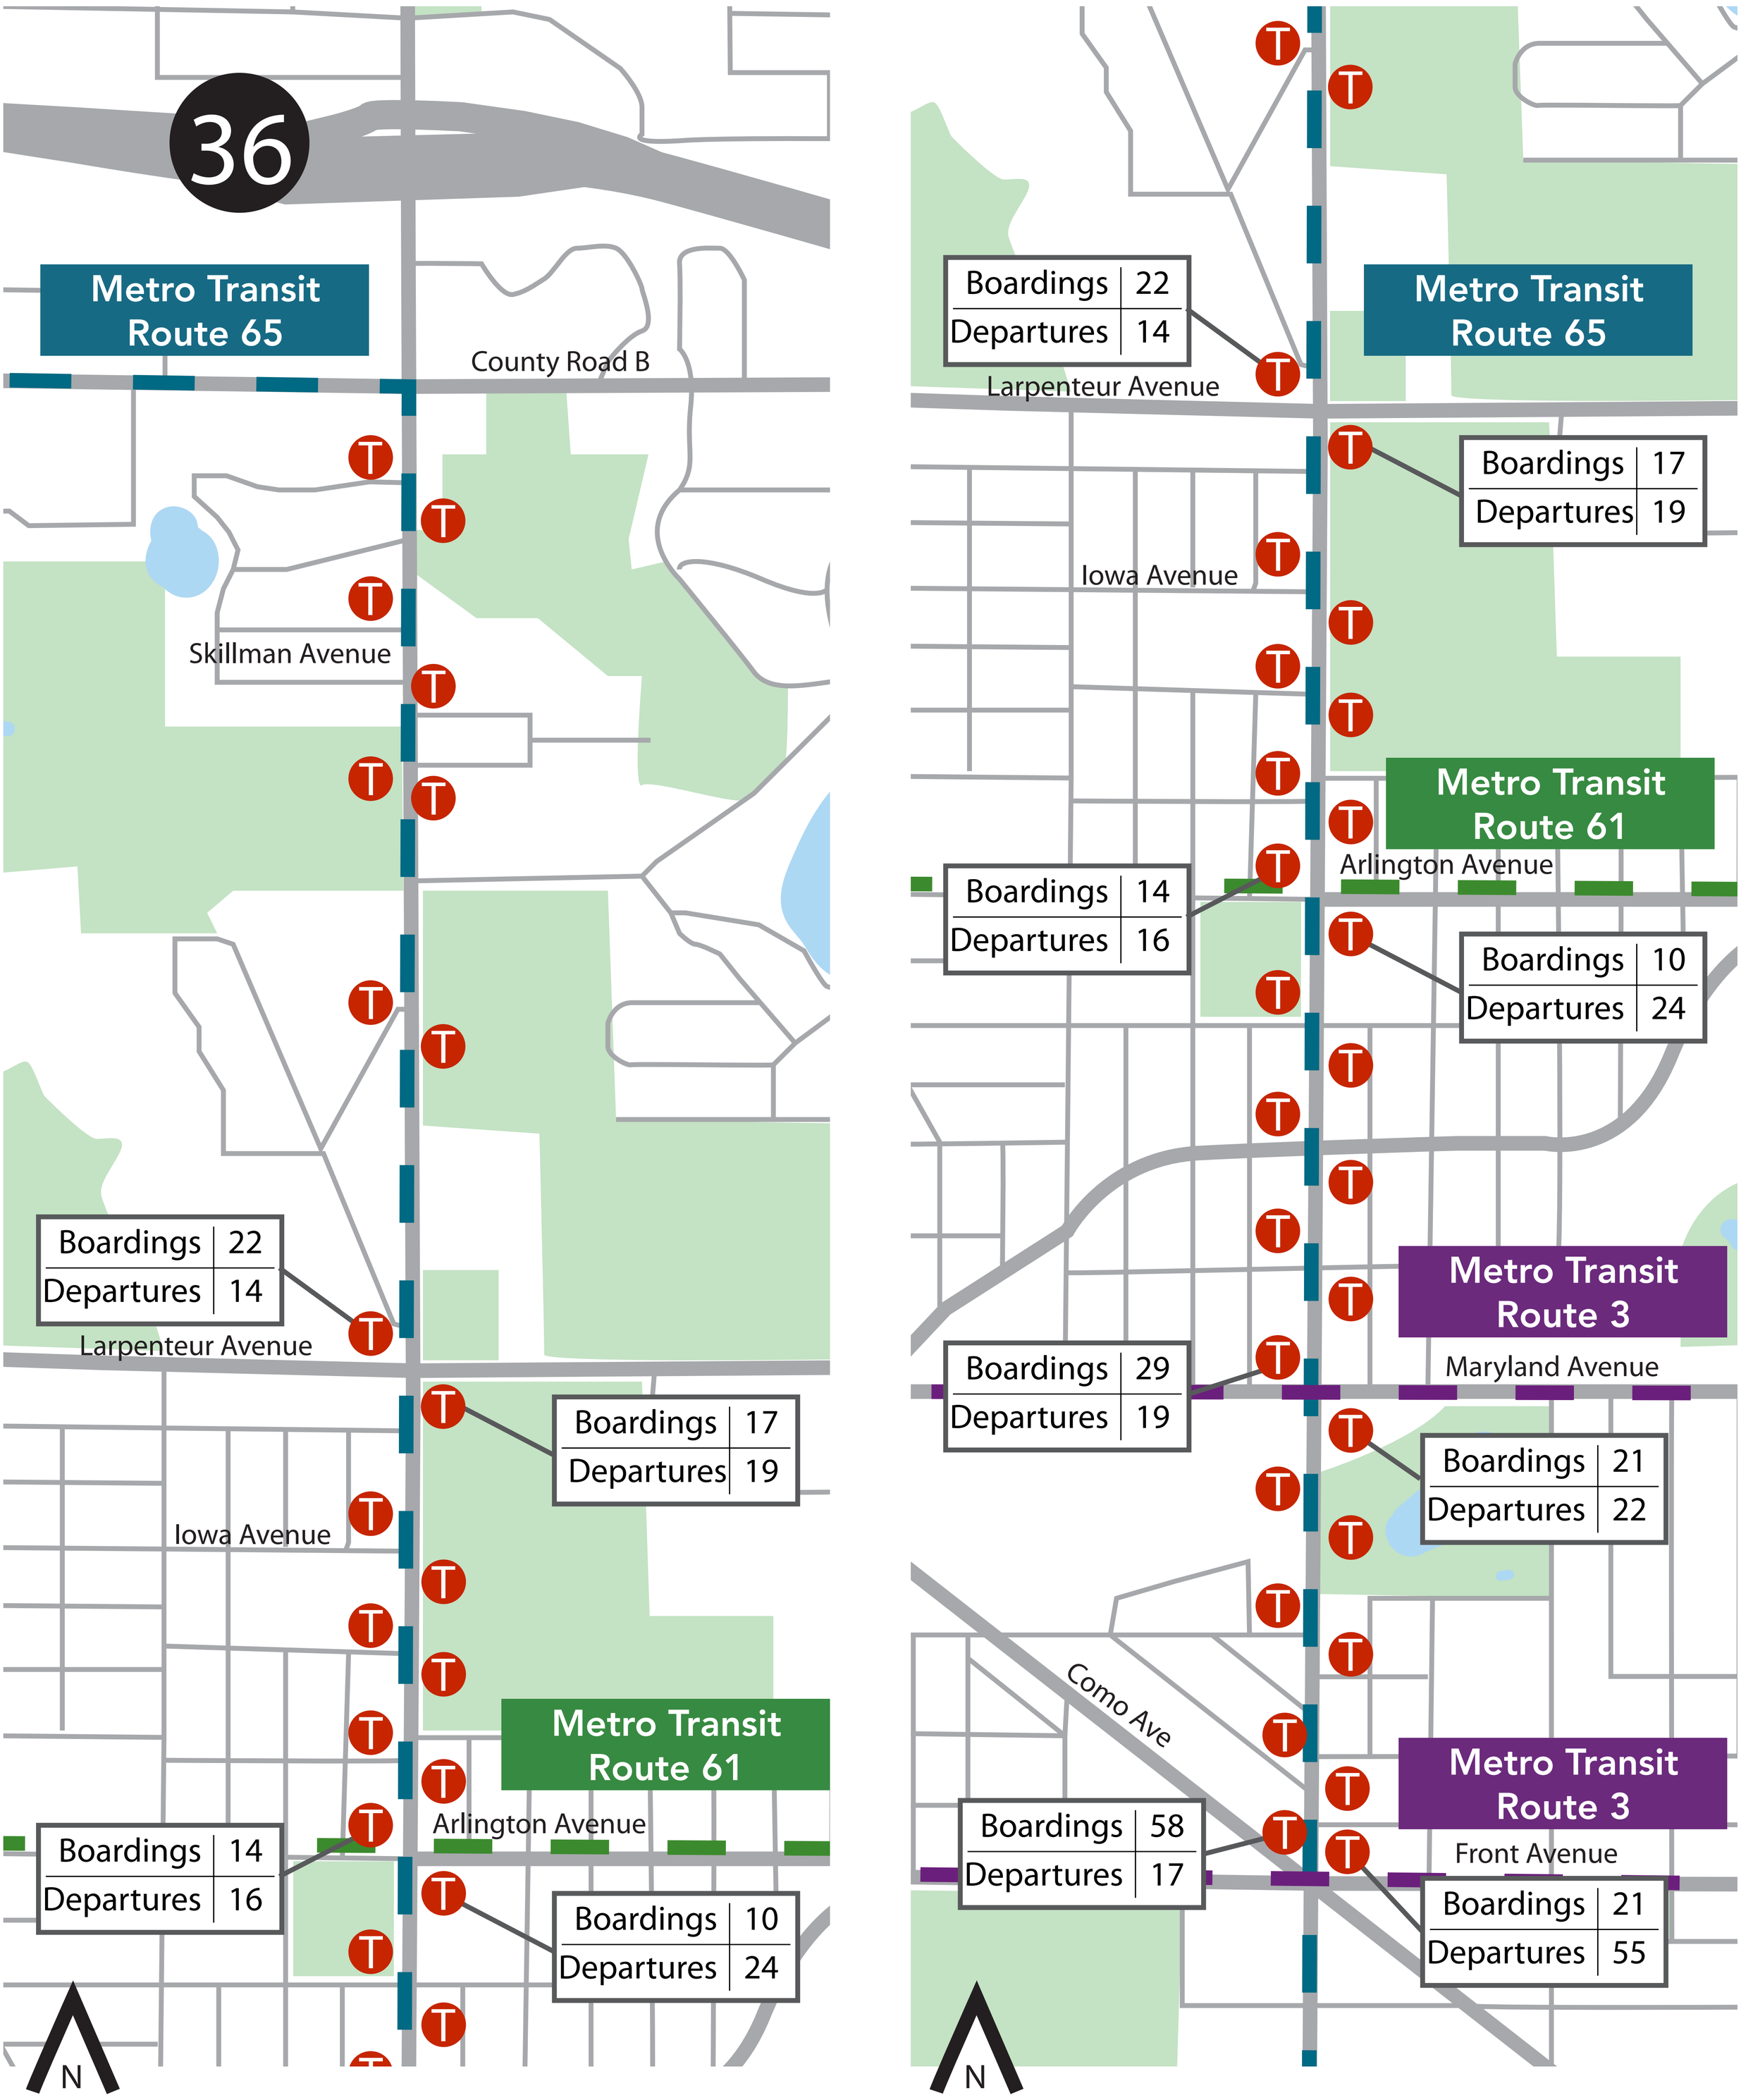

CONSULT

GOAL:	Gather feedback on analysis, alternatives and decisions.
COMMUNITY COMMITMENT:	Keep the community informed, listen to and recognize concerns, and provide information on how feedback is used.

TRANSIT INFRASTRUCTURE

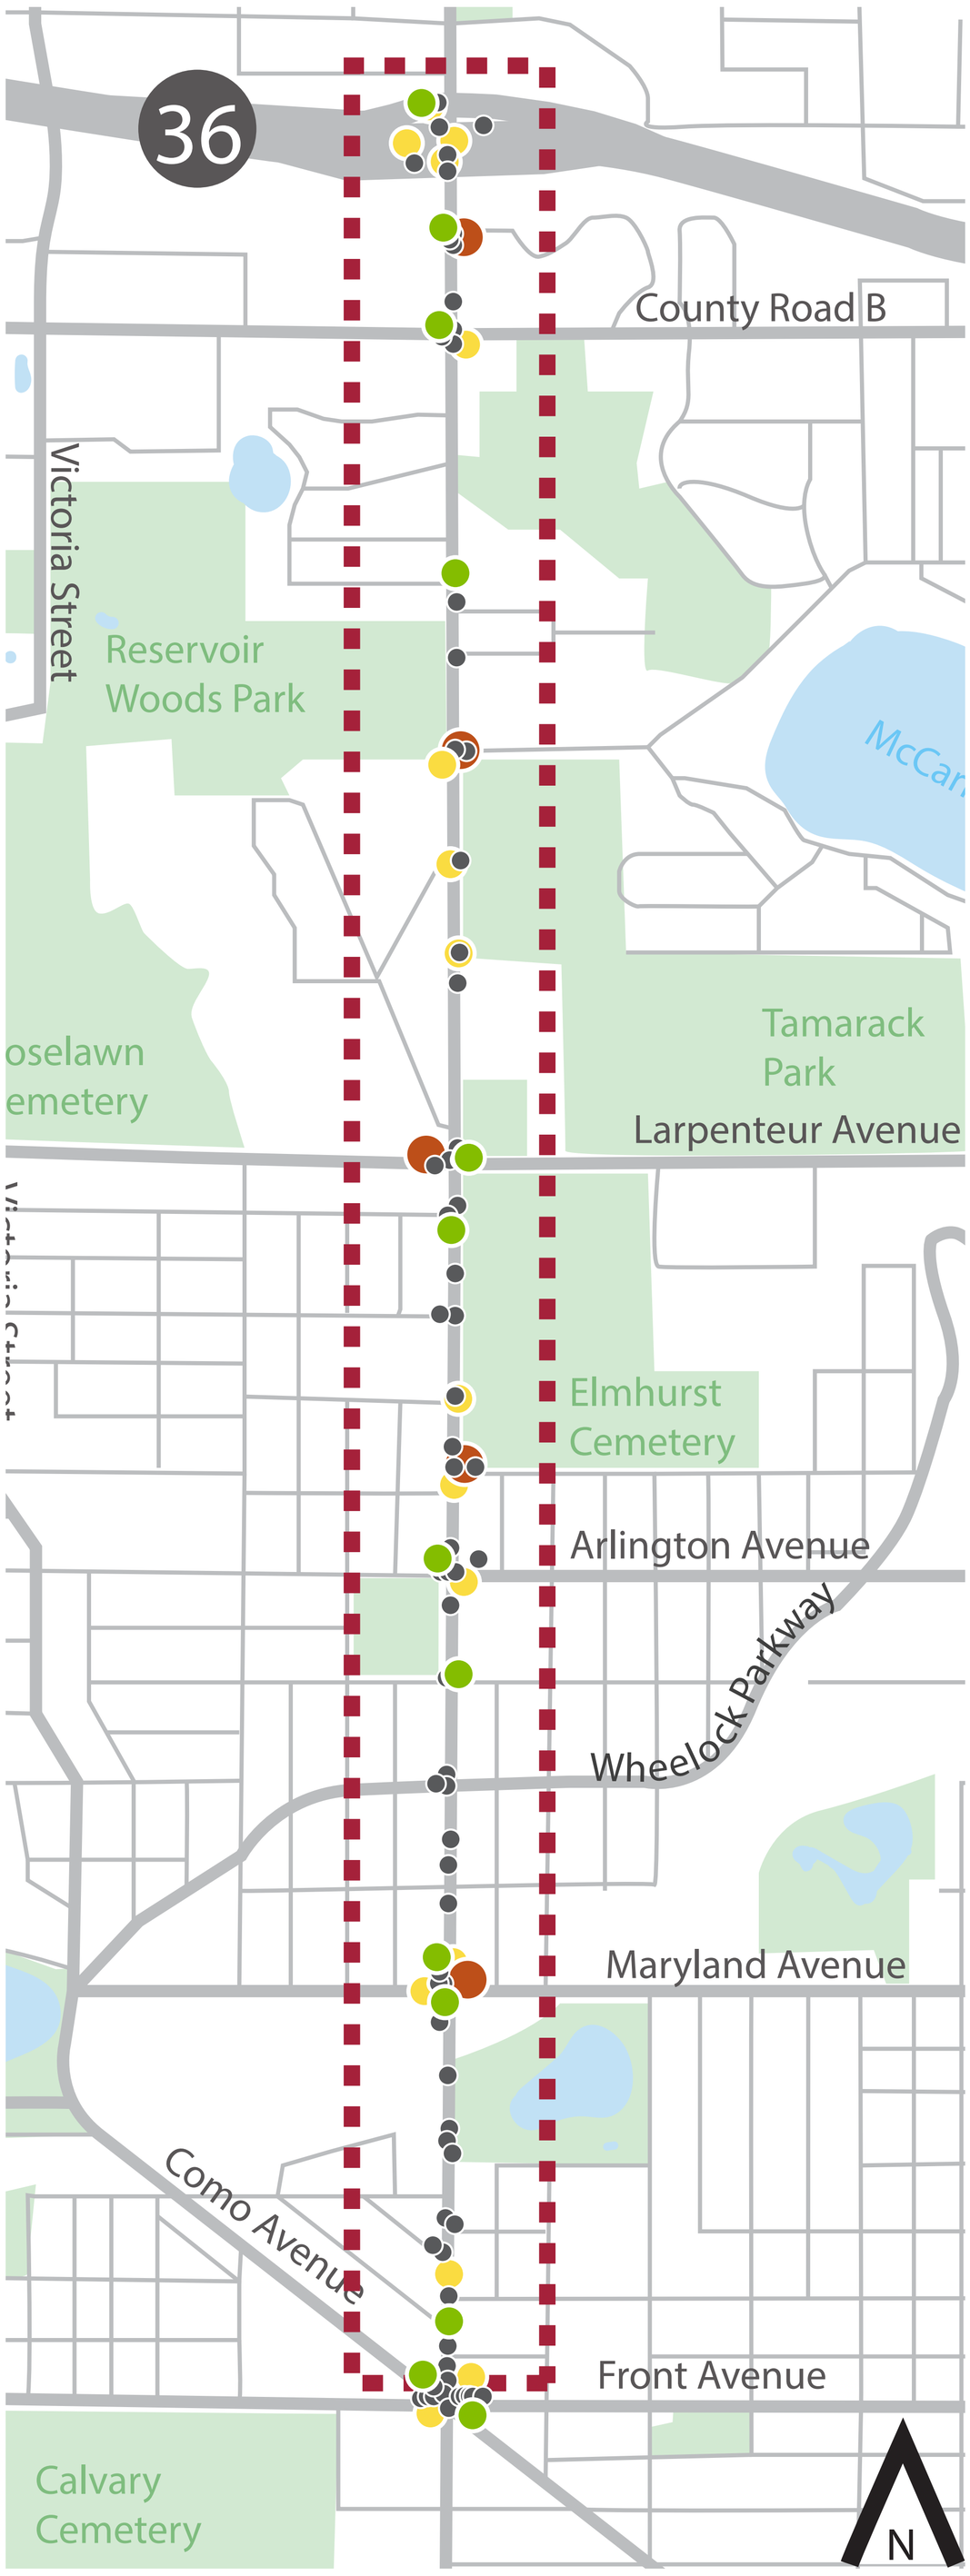

The following graphics show the existing transit infrastructure within the project area. Route 65 extends through the project area with two intersecting routes. All existing transit stops are shown with the ridership numbers for the highest used stops.

Memo

To: City Commissions

From: Rebecca Olson, Assistant City Manager

Date: February 27, 2023

Re: Update on Community Visioning Project – *Envision Roseville*

The following includes a summary of the project status for the community-wide visioning project named '*Envision Roseville*' and next steps as of February, 2023.

Overview

- The Envision Roseville project has two phases of engagement. Phase 1 was intended to capture broad themes from stakeholders relating to how they envision the future of Roseville. During Phase 2, we will share a summary of what we heard and how that feedback was considered, and conduct strategic and focused follow-up engagement activities to verity key themes and dig deeper.
- Phase 1 engagement is coming to a close in February, 2023 with Phase 2 launching in April and continuing into the summer.
- Our consultant is working on tabulating results of Phase 1 engagement. These results will be shared during Phase 2 with the community. Our engagement will be guided by the project's equity analysis as we reflect on who we have reached and who's voice is missing, and using the principles of good public participation (e.g. closing the feedback look, letting the public know how they have informed the process, etc.) and the promises we made which aligned with the IAP2 spectrum to involve and collaborate with stakeholders.

Major Milestones

- Community Survey/Wiki Map/Comment Wall/Hello Lamp Post – we have had approximately 550 online responses to date.
- Community Events - Community events and community organization meetings have been ongoing since the project began in October 2023. Events have sought to target a wide range of Roseville residents and visitors while meetings with community organizations have sought to strategically engage targeted community groups representing those who are traditionally underrepresented in public processes (e.g., BIPOC communities, people with lower incomes, people with disabilities, youth, young families, etc.). To date we have conducted more

than two dozen events and meetings, and had dozens of informal communications with community partners. The last community activity in Phase 1 is set for the last week in February 2023.
- Business Survey – this survey opened in December and will close in March 2023

Next Steps

- Phase 2 engagement is anticipated to begin in April and continue into the summer. This second phase is intended to be a very targeted engagement meant to review, vet and calibrate the results we received in Phase 1 and to dig deeper into the outcomes.
- Hello Lamp Post will again be deployed, but will be focused on the highest value locations with updated data collection questions to confirm the key themes and explore outcomes.
- In the spring we will be conducting a limited number of business focus groups.

Roseville Public Works, Environment and Transportation Commission

Agenda Item

Date: February 28, 2023 **Item No:** 5

Item Description: City Code Updates: Title 8

Background:

Community Development has been working on updates to the City Code for the past 12 months. As part of the updates, the Shoreland Ordinance (Chapter 1017) is being modified to fit the Department of Natural Resources (DNR) template. There are a few components in our existing Chapter 1017 that need to be moved to a different section to fit the DNR template. Staff is also proposing a Chapter dedicated to wetlands to better define our requirements and be more transparent.

Recommended Action:

Receive presentation and make a recommendation to the City Council.

Attachments:

A. Presentation

Attachment A

City Code Updates Title 8

Public Works Department

Public Works Environment and Transportation Commission

28-Feb-23

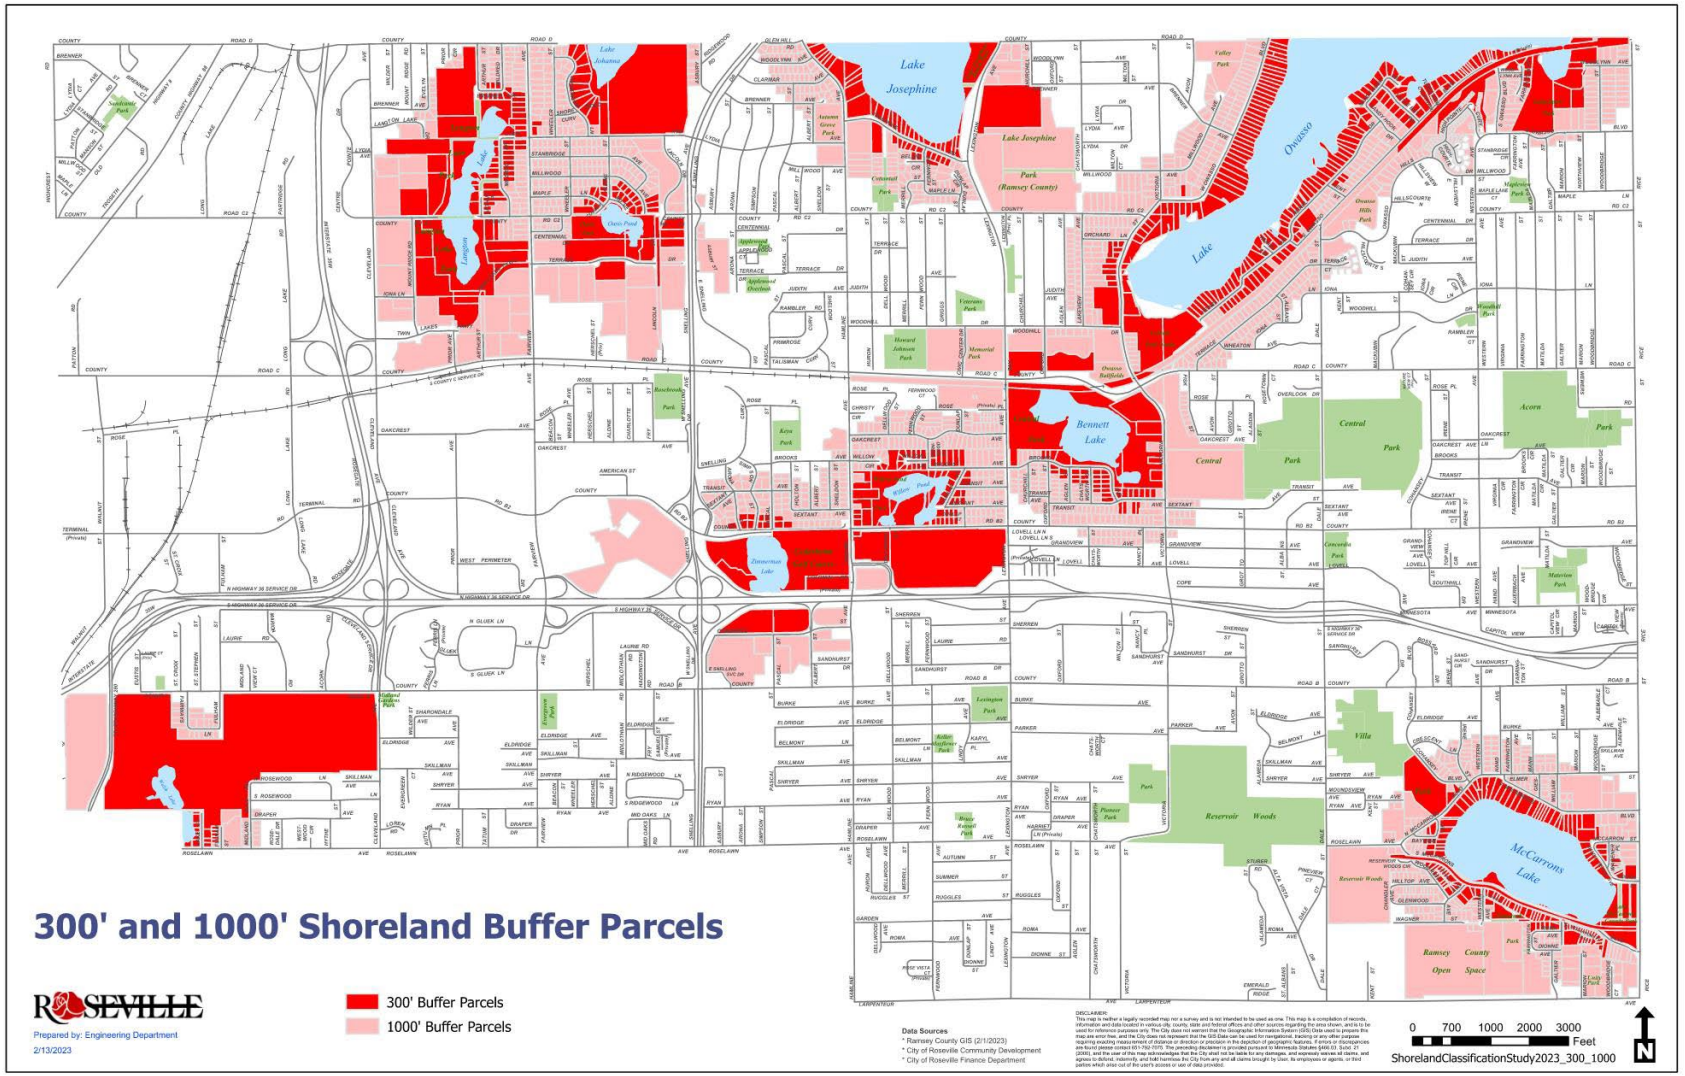

City Code Updates: Title 8

Summary

- Community Development is updating the Shoreland Ordinance (currently Chapter 1017) to match the DNR template
- Sections are being moved from Chapter 1017 to Title 8: Public Works, Chapters 803 & 804
  - Stormwater Management Overlay District: 803.05 (proposed)
    - Land within 100 ft of a stormwater pond or wetland, or land below the 100 year flood elevation of ponds or wetlands.
    - Language updates to reflect current practices and standards
  - Wetlands: 804.01 (proposed)
    - All upland within 100 ft of the delineated boundary of a wetland (no change from previous code)
    - 25% impervious surface maximum (no change from previous code)
    - Added additional/clarifying language about wetland buffers, both protection, establishment, and maintenance
- Modifying language in 803.04 Grading, Erosion, and Sedimentation Control of when a permit is required to match the existing 300’ buffer, instead of increasing the distance to match the proposed shoreland ordinance of 1,000ft.
  - Increasing the distance to 1,000 ft would impact 2,557 properties, and increase the number of properties that would need to obtain a permit for any residential improvement.

City Code Updates: Title 8

Shoreland Parcels

Shoreland Buffer Distances

- 300' (red: current)
  - 861 properties
- 1,000' (pink)
  - 3,418 properties

Increase of 2,557 properties

City Code Updates: Title 8

Wetlands

Wetlands: Wetland Buffer

- Wetland Edge: Green line
- 25' buffer (red line) with no ability to average (current code).
- Proposed Chapter 804
  - Matches the local watershed district rules and allow buffer width averaging. A minimum 12.5' buffer with an average of 25' around the wetland.
- No construction of stormwater BMPs, or impervious surfaces, would be allowed in the buffer.

Q & A

Questions?

THANK YOU

Public Works Department

Roseville Public Works, Environment and Transportation Commission

Agenda Item

Date: February 28, 2023 **Item No:** 6

Item Description: Pathway Projects

Background:

In 2021, the City amended the pathway master plan to include six new segments. The plan includes a preference list based on six scoring criteria to help determine which pathways are most needed. Although the City uses the list to help prioritize projects that are most needed, some projects are constructed earlier due to adjoining projects, grants funds available or other circumstances.

Staff will provide an update on pathway projects that are in the current capital improvement plan and status of other projects. Staff would like feedback to help staff determine which projects to apply for grant funding or cost share funding. Ramsey County will be opening up cost share fund applications later this spring.

Recommended Action:

Receive presentation and provide feedback on project prioritization.

Pathway Projects Update & Pathway Prioritization

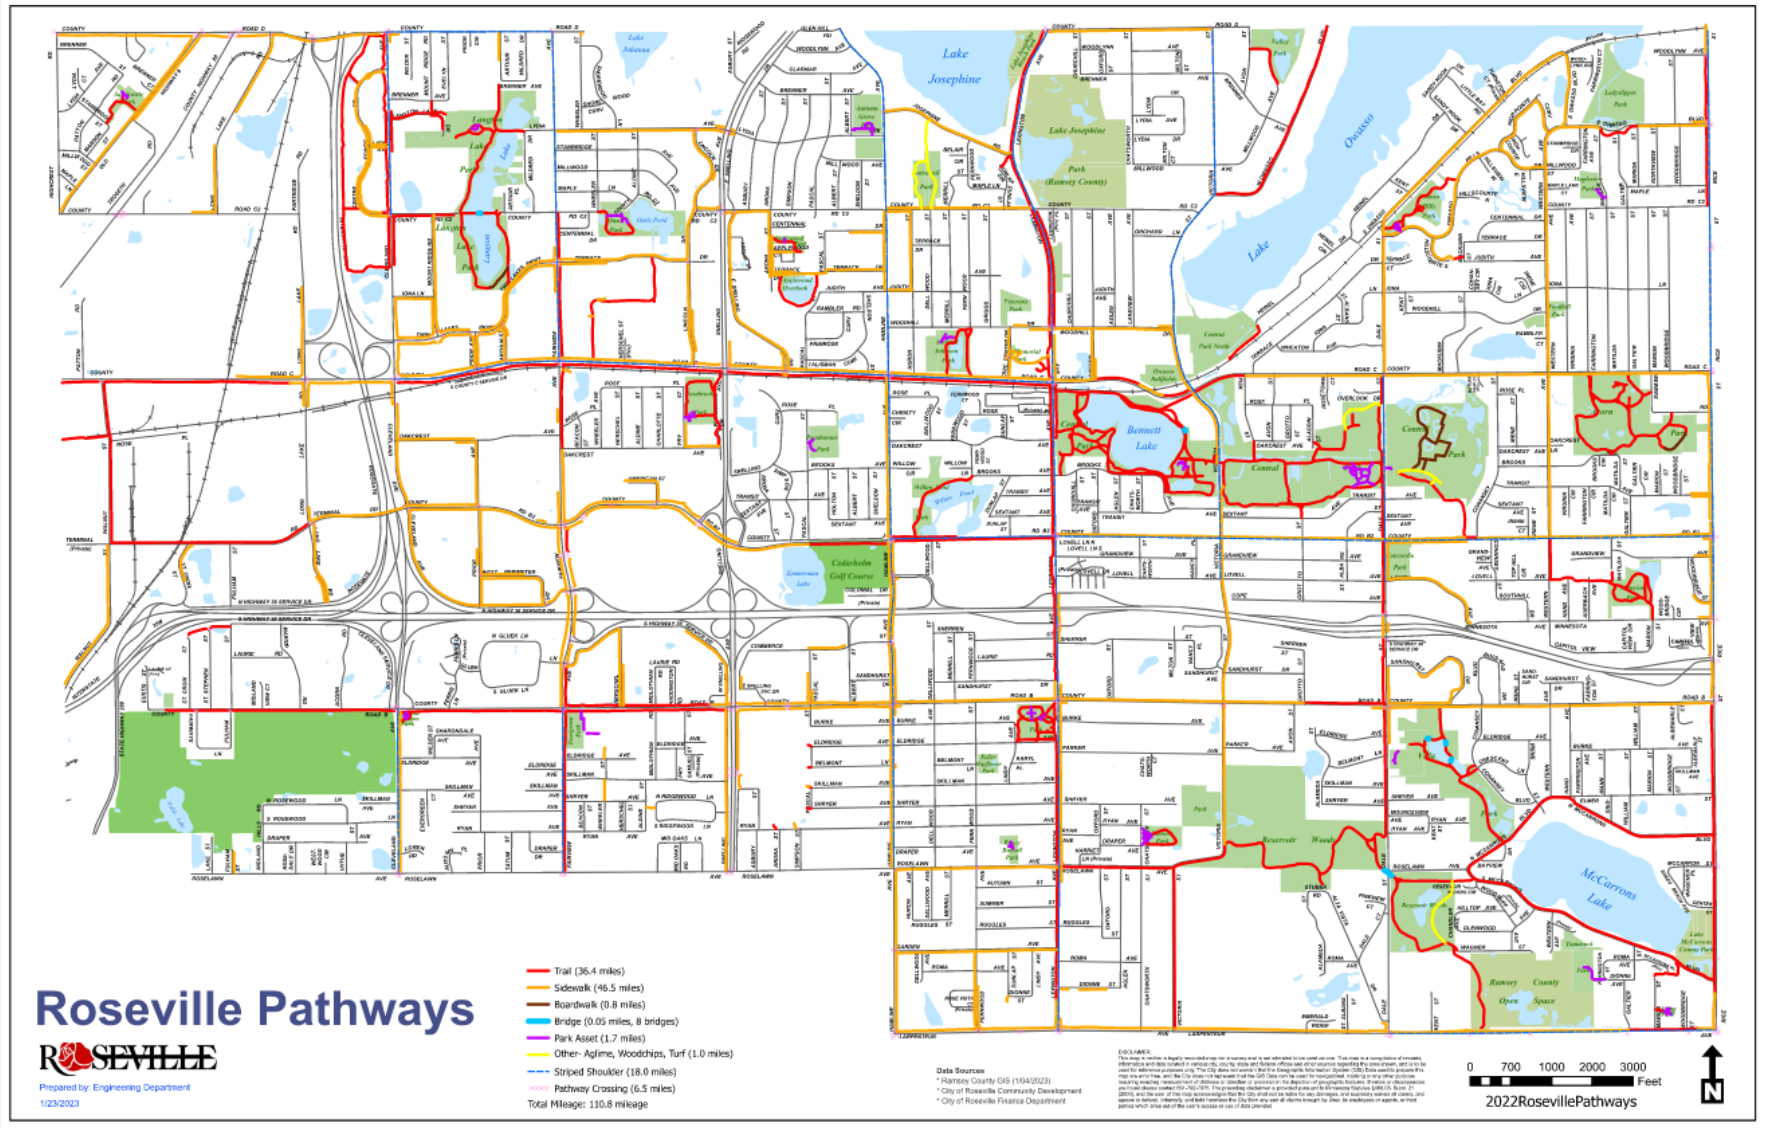

Public Works

ROSEVILLE

Roseville Pathway System

Background

- Existing Pathways
  - 36.4 miles of sidewalk
  - 46.5 miles of bituminous trails
- Design Standards
  - Preference to install 8’ bituminous pathway
  - 2nd option to install 6’ sidewalk

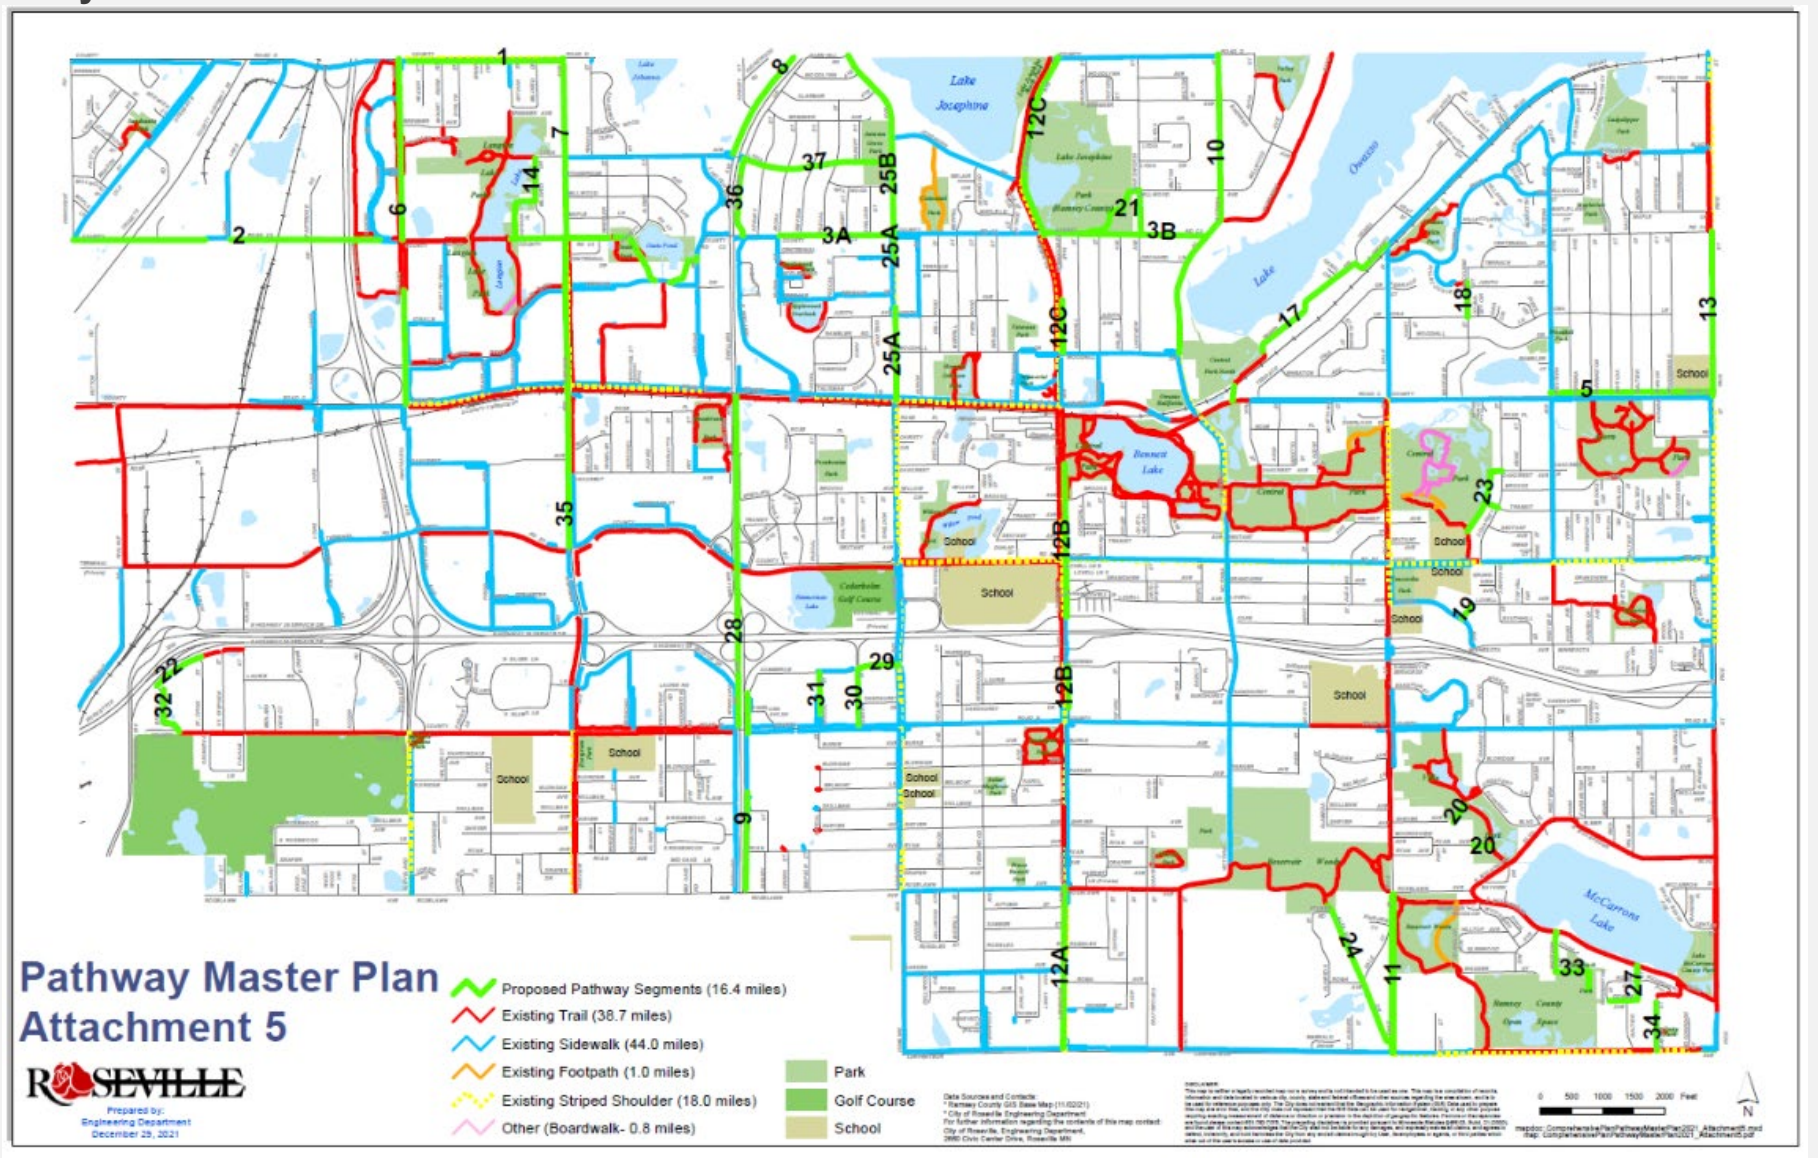

Roseville Pathway System

Background

- Funding of Pathways
  - New Pathways
    - No dedicated funding source for new pathways
    - Have Municipal State Aid (MSA) (Gas Tax)
      - Can only be used on MSA, CSAH and MnDOT roads.
  - Maintenance
    - Pathway maintenance fund
    - ~$180,000 annually
- Maintenance of Pathways
  - Parks & Recreation does winter maintenance for pathways on city property or adjacent to residential
    - Adjacent property owners maintain pathway in commercial & industrial areas
  - Parks & Recreation does vegetation maintenance
  - Public Works perform surface maintenance
    - Replacement, patching, crack sealing, etc.

Preference List

- Based on statistical analysis and is not subjective
- 6 Criteria (max 27 points)
    1) Connects Multiple Destinations (0-5)
    2) Volume of Usage (0-6)
        a) Based on volume of employment and population within ¼ mile
    3) Connects to Regional System (1-3)
        a) Constellation Links get 2 points
    4) Addresses a gap or barrier in the transportation network (1-5)
    5) Connects to Transit (1-3)
    6) Connects High-Density Residential to Transit or Parks (0-5)

Map Ref.	Project Name	Description	Connects Multiple Destinations	Volume Usage - Population	Volume Usage - Employment	Connects to Regional System	Addresses a Gap or Barrier in the Transportation System	Connects to Transit	Connects Highy Density to Transit or Parks	Total Points	Pathway Master Plan and Parks Constellation Plan Rank
Pathway Master Plan Segment on Arterial Roadway with more than 4,000 ADT, with no pathway on either side of the roadway.											
Parks and Recreation Master Plan Constellation Link											
28	Snelling Avenue*	Develop off road pathway between County Road B and County Road C	5	1	3	3	5	3	5	25	1
4A	County Road C (A)	Construct an on-road pathway from Lexington Avenue to Victoria St.	5	1	1	3	4	4	5	23	2
9	Snelling Avenue South of Highway 36	Complete pathways along Snelling Avenue for improved access to A-BRT transit stations.	2	1	3	2	5	4	5	22	3
16	Rosedale to HarMar Connection	A pedestrian bridge across Highway 36 and pathway connection between Rosedale and HarMar Mall.	2	1	1	2	5	6	5	22	3
12C	Lexington Avenue (C)	Complete off-road pathway on the east side of Lexington Avenue from County Road C to County Road D.	4	1	1	3	4	4	5	22	3
12A	Lexington Avenue (A)	Complete off-road pathway on the east side of Lexington Avenue from Larpenteur Avenue to County Road B	5	2	1	3	4	1	5	21	6
12B	Lexington Avenue (B)	Complete off-road pathway on the east side of Lexington Avenue from County Road B to County Road C.	5	1	1	3	4	1	4	19	7
4B	County Road C (B)	Construct an on-road pathway from Victoria St to Dale St.	5	1	0	3	4	1	5	19	7
3A	County Road C-2 (A)	Complete both on- and off-road pathways within the County Road C-2 alignment from Snelling Avenue to Hamline Ave	5	2	1	3	1	1	5	18	9
4C	County Road C (C)	Construct an on-road pathway from Dale St to Western Ave.	4	1	0	3	4	1	5	18	9
4D	County Road C (D)	Complete both on- and off-road pathways within the County Road C alignment from Western Ave to Rice St.	4	1	1	3	4	1	4	18	9
6	Cleveland Avenue	Complete off-road pathway segments between County Road C and County Road D.	3	0	3	2	3	4	2	17	12
13	Rice Street	Complete an off-road pathway from County Road C to the north City boundary.	3	1	1	3	3	1	5	17	12
25A	Hamline Avenue A	An off-road trail from County Road C to County Road C-2.	3	1	1	3	3	1	5	17	12
10	Victoria Street (north of C)	Develop an on- road and off-road pathway from County Road C to County Road D.	6	1	1	2	3	1	2	16	15
CC-3	Constellation Link C3	Develop a constellation link pathway along Woodhill Drive between Hamline Avenue and Civic Center Drive to connect to Howard Johnson Park	5	1	1	2	1	4	2	16	15
36	*Snelling Service Dr E*	Develop an off road pathway along the east side of the East Snelling Service Drive	5	1	2	1	1	1	5	16	15
2	County Road C-2 West of Snelling	Develop both on-and off-road pathways within the County Road C-2 alignment from the west City Boundary to Snelling Avenue. This corridor would include a pedestrian bridge across I-35W.	2	1	3	2	1	1	5	15	18
8	TH 51 connection to Old Snelling (Arden Hills)	Work with Arden Hills to develop a regional pathway connection along Snelling Avenue to Old Snelling Avenue in Arden Hills connecting Roseville to Mounds View High School, Valentine Hills Elementary School, Bethel College, Lake Johanna Park and County Road E2 commercial businesses.	5	1	1	2	4	1	1	15	18
25B	Hamline Avenue B	An off-road trail from County Road C-2 to County Road D.	3	1	1	3	3	1	3	15	18
3B	County Road C-2 (B)	Complete an off-road pathway within the County Road C-2 alignment from Lexington Ave to Victoria St.	3	1	1	3	1	1	5	15	18
CD-1	Constellation Link D1	Develop a constellation link pathway along Oxford Street between Woodhill Avenue pathway and County Road C2.	5	1	1	2	1	1	4	15	18
27	Tamarack Park Connection*#	Install a pathway connection from South McCarron's Blvd to Tamarack Park.	4	1	0	2	1	1	5	14	23
CC-2	Constellation Link C2	Develop a constellation link pathway along Griggs Street beween Veterans Park and County Road C2.	5	1	1	2	1	4	0	14	23
CK-2	Constellation Link K2	Develop a constellation link pathway along Aldine Street/Midlothian Road between Roselawn Pathways and County Road B pathways.	4	1	1	2	1	3	2	14	23
35	*Fairview Ave, west side B2 to C2*	Develop an off road pathway along the west side of Fairview Avenue from County Road B2 - C2	3	1	3	3	3	1	0	14	23
29	Commerce Street*	Develop a pathway connection between Albert St and Hamline Ave	5	1	1	1	1	4	0	13	27
CF-3	Constellation Link F3	Develop a constellation link pathway along Minnesota Avenue between Lovell Avenue pathways and Materion Park.	5	2	1	2	1	1	1	13	27
CI-1	Constellation Link I1	Develop a constellation link pathway along Oakcrest Avenue between Fairview Avenue pathways and Rosebrook Park.	5	1	3	2	1	1	0	13	27
37	*Lydia Avenue*	Develop and off road pathway on Lydia Avenue between Snelling Avenue and Hamline Avenue	5	1	1	2	2	1	1	13	27
5	County Road C Sidewalk	Construct a sidewalk on the north side of County Road C from Western to Rice Street.	2	1	1	2	3	1	2	12	31
7	Fairview Avenue C (north of B-2)	Development of off-road pathways between County Road C2 and County Road D.	5	1	0	3	3	0	0	12	31
31	Pascal Street*	Develop a pathway connection between County Road B and Commerce Street	5	1	1	1	1	3	0	12	31
CC-1	Constellation Link C1	Develop a constellation link pathway along Arona/Lydia between County Road C2 and Autumn Grove Park.	5	1	0	2	2	1	1	12	31
CF-2	Constellation Link F2	Develop a constellation link pathway along Galtier Street and Matilda Street to connect County Road B2 pathways to Acorn Park.	5	1	2	2	1	1	0	12	31
18	Judith to Iona Connection#	Develop a pathway connection between Judith Ave and Iona Lane.	1	1	0	2	1	1	5	11	36
CA-1	Constellation Link A1	Develop a constellation link pathway along Maple Lane between Highcrest Road pathway and Old Hwy 8 pathway.	3	1	1	2	1	3	0	11	36
CH-1	Constellation Link H1	Develop a constellation link pathway along Oakcrest Avenue and Fernwood Street between Hamline Avenue pathways and Willow Pond Park pathways.	4	1	1	2	1	1	1	11	36
CHI	Constellation Connection H to I	Develop a constellation connection between Consellation H and I across Snelling Avenue between County Road B2 and County Road C.	5	0	0	2	1	3	0	11	36
CN-1	Constellation Link N1	Develop a constellation link pathway along William Street between the pathway on N McCarrons Boulevard and the pathway along County Road B.	2	1	1	2	1	4	0	11	36
1	County Road D	Develop pathway facilities, both on- and off-road, between Cleveland and Fairview Avenue.	3	0	1	2	3	1	0	10	41
11	Dale Street South	The construction of an off-street pathway from Reservoir Woods Park to Larpenteur Avenue.	1	1	0	3	4	1	0	10	41

Current Projects

Pathway Projects

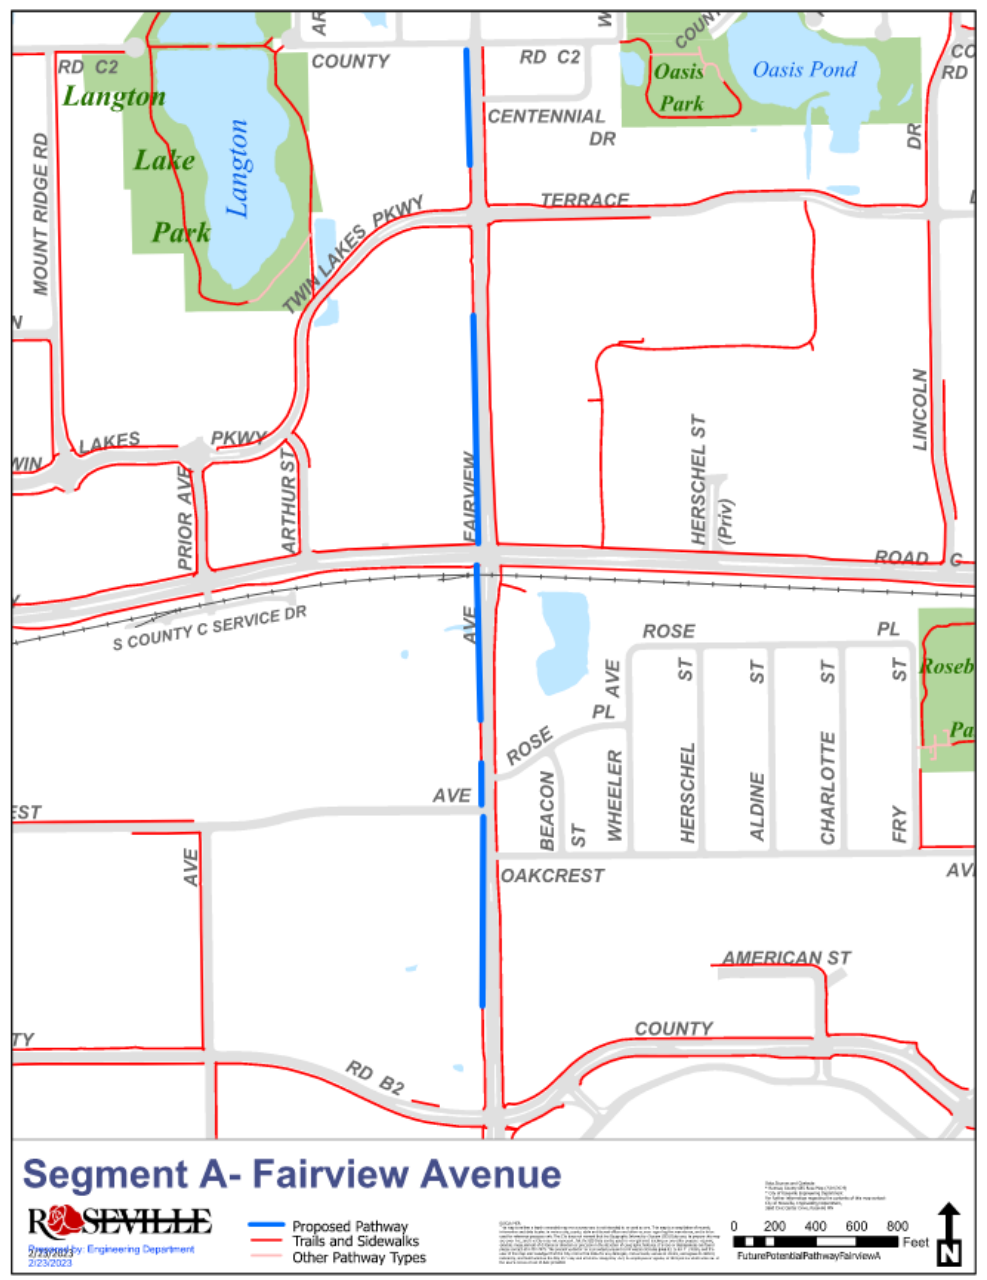

Potential Projects/Opportunities

Pathway Projects

Potential Projects/Opportunities

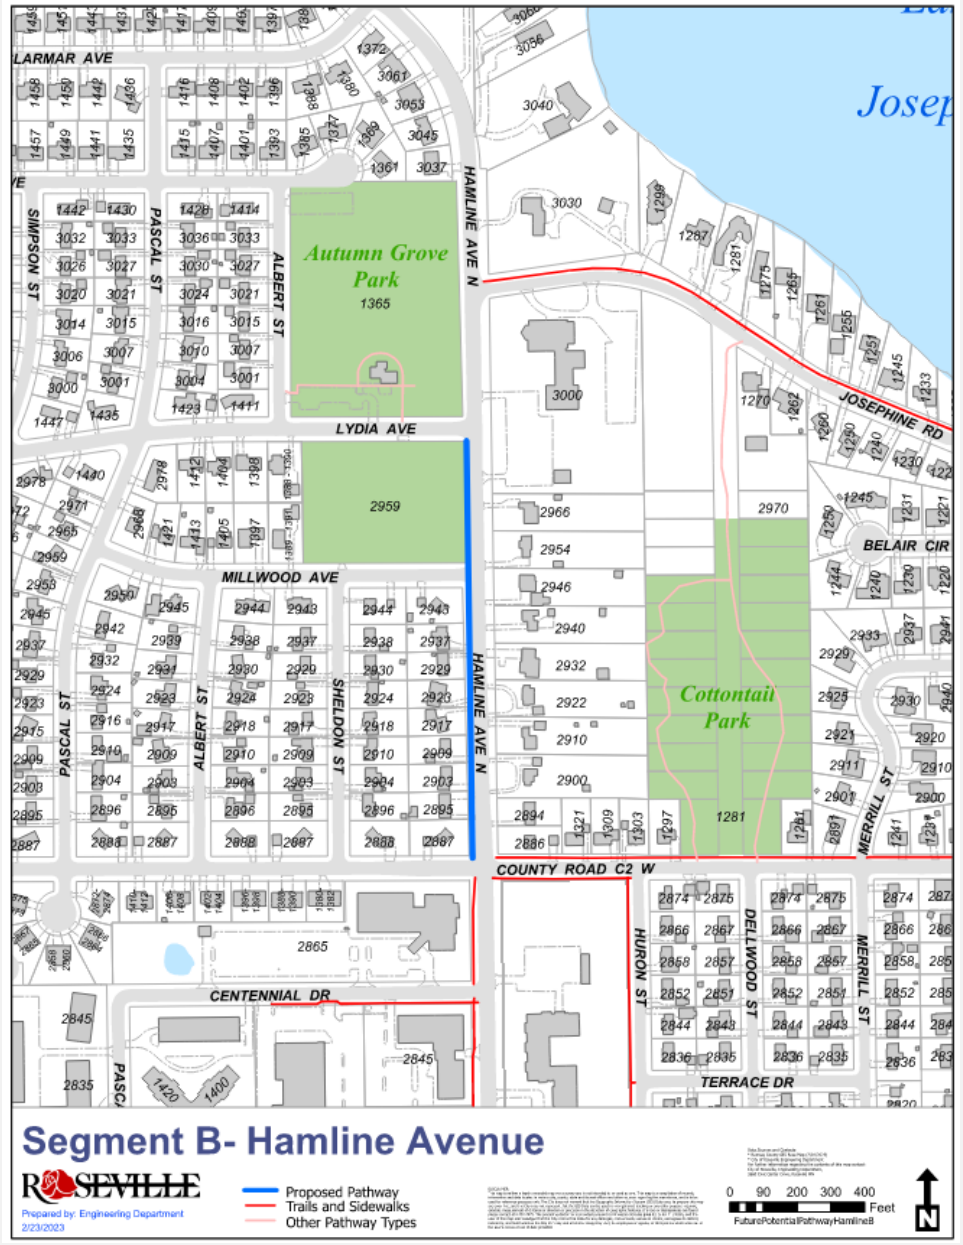

- A– Fairview Pathway
  - Ramsey County Roadway
  - Install pathway to complete missing segments on west side of roadway
  - No projects identified
  - Pathway Master Plan Segment 35
    - Points – 14
    - Preference Rank - 23

Pathway Projects

Potential Projects/Opportunities

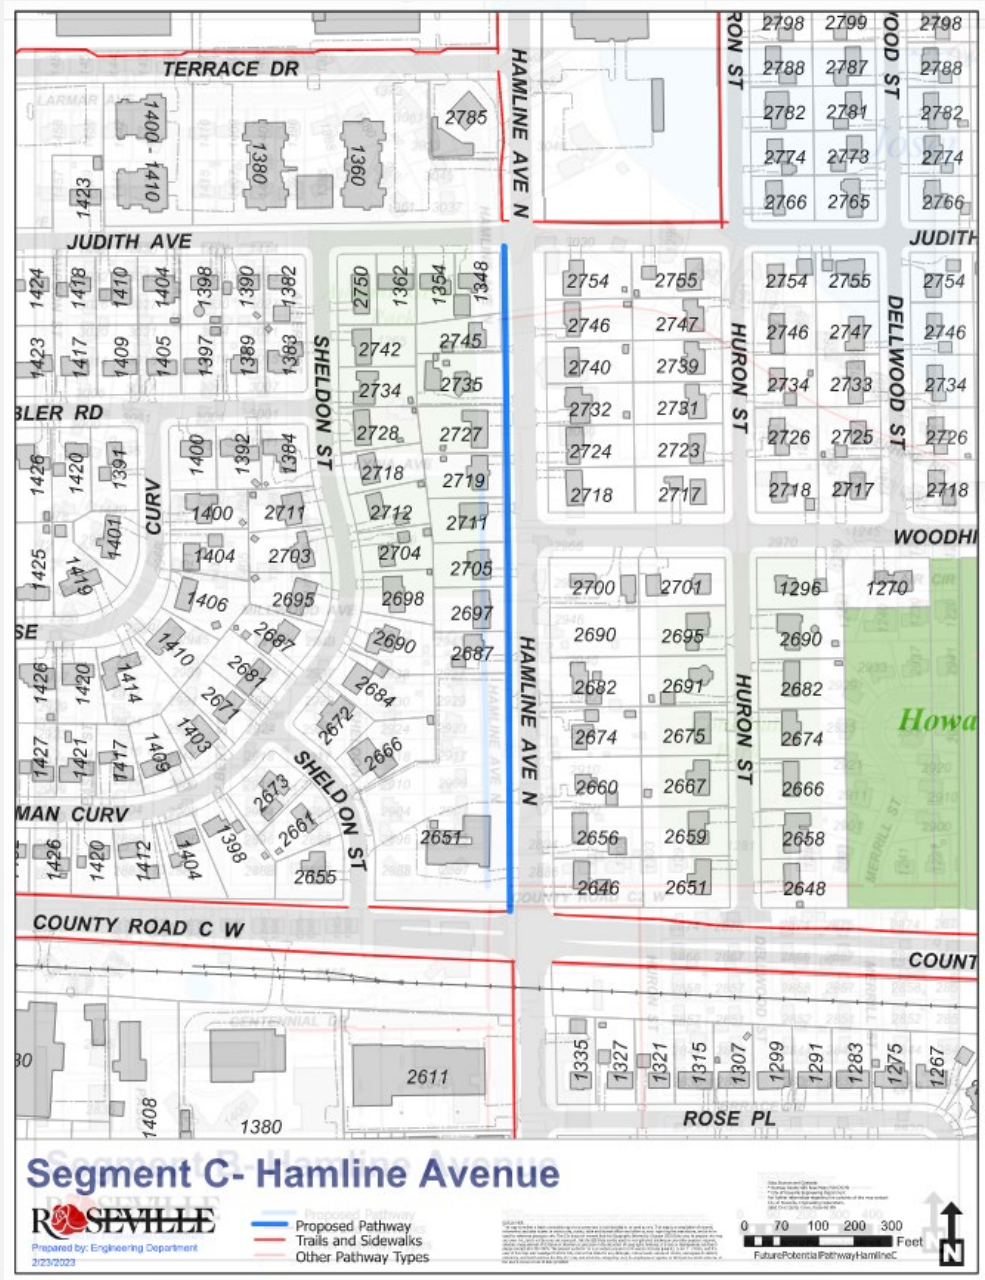

- B – Hamline Avenue, County Road C2 – Lydia (Autumn Grove Park)
  - Ramsey County Roadway
  - Install new pathway on west side
  - Mill and Overlay planned in 2024
  - Pathway Master Plan Segment 25B
    - Points – 15
    - Preference Rank - 18

Pathway Projects

Potential Projects/Opportunities

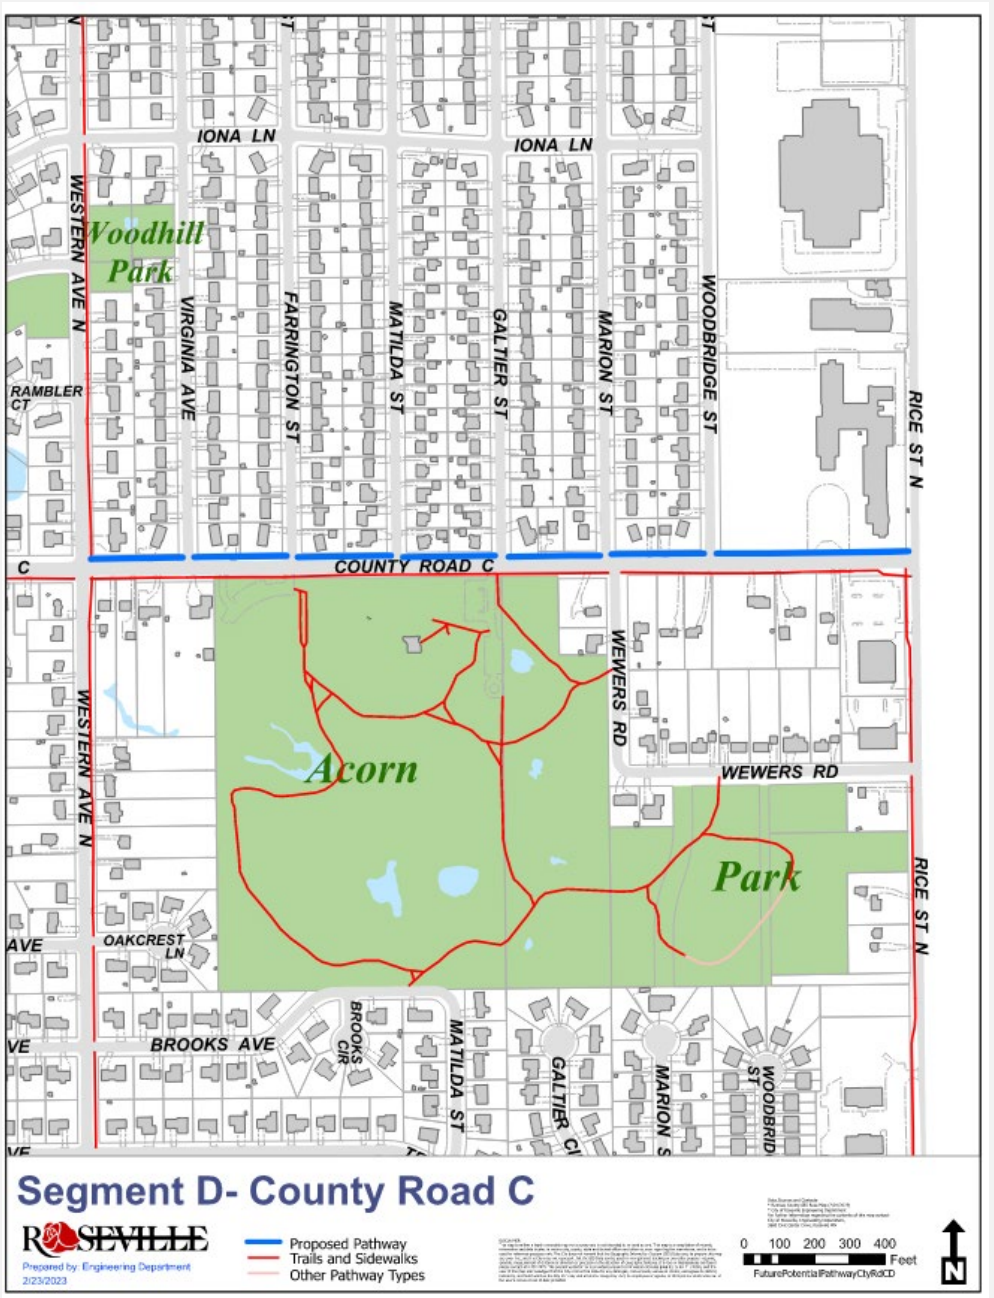

- C – Hamline Avenue, County Road C – Judith
  - Ramsey County Roadway
  - Install new pathway on west side
  - Mill and Overlay planned in 2024
  - Pathway Master Plan Segment 25A
    - Points – 17
    - Preference Rank - 12

Pathway Projects

Potential Projects/Opportunities

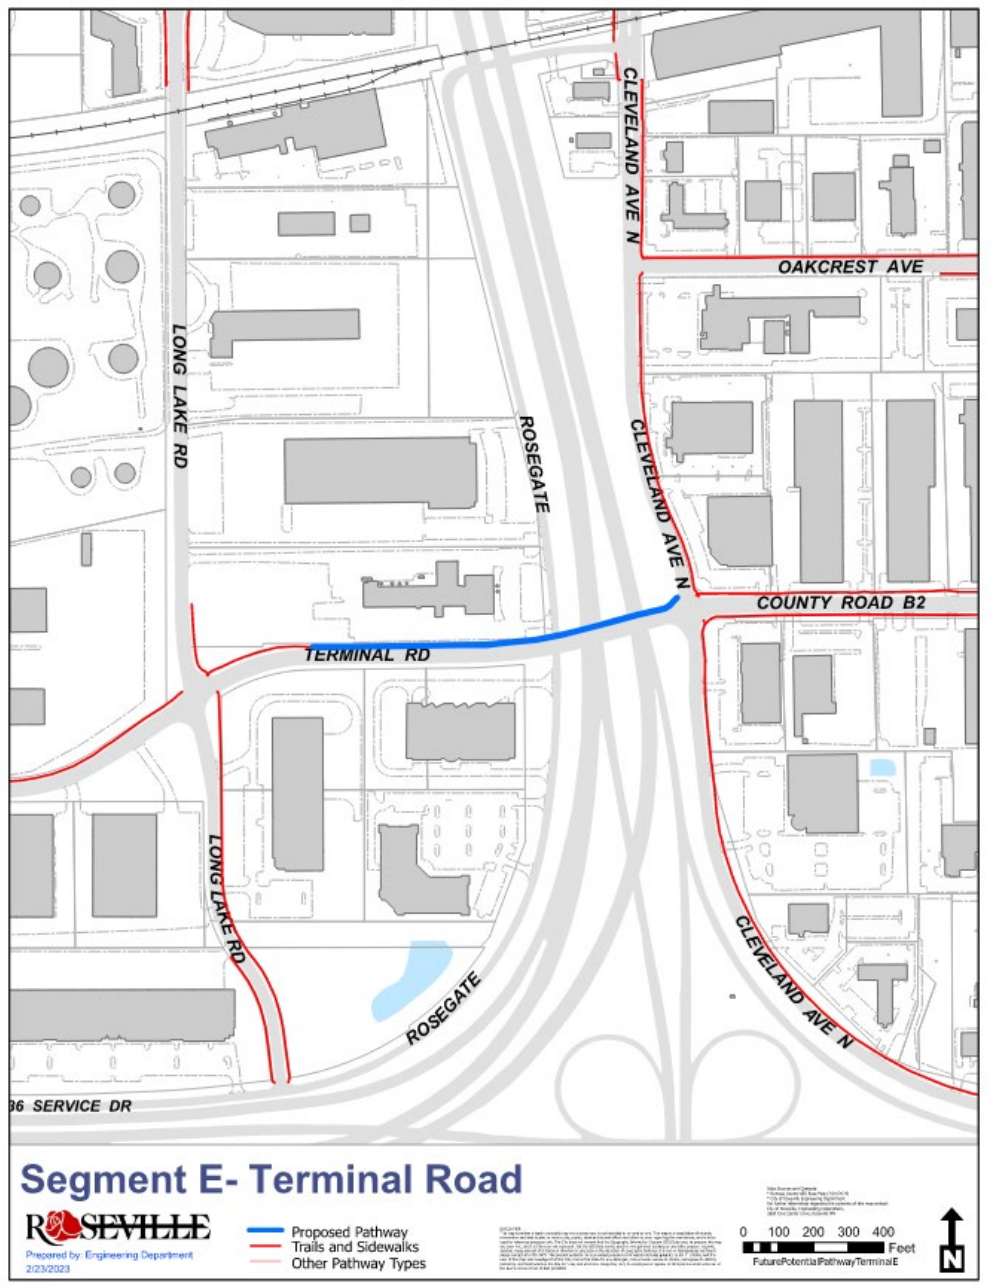

- D – County Road C, Western to Rice
  - Ramsey County Roadway
  - Install new pathway on north side
  - Ramsey County has plans to mill and overlay and convert to 3 lane roadway in 2026
  - Pathway Master Plan Segment 5
    - Points – 12
    - Preference Rank - 31

Pathway Projects

Potential Projects/Opportunities

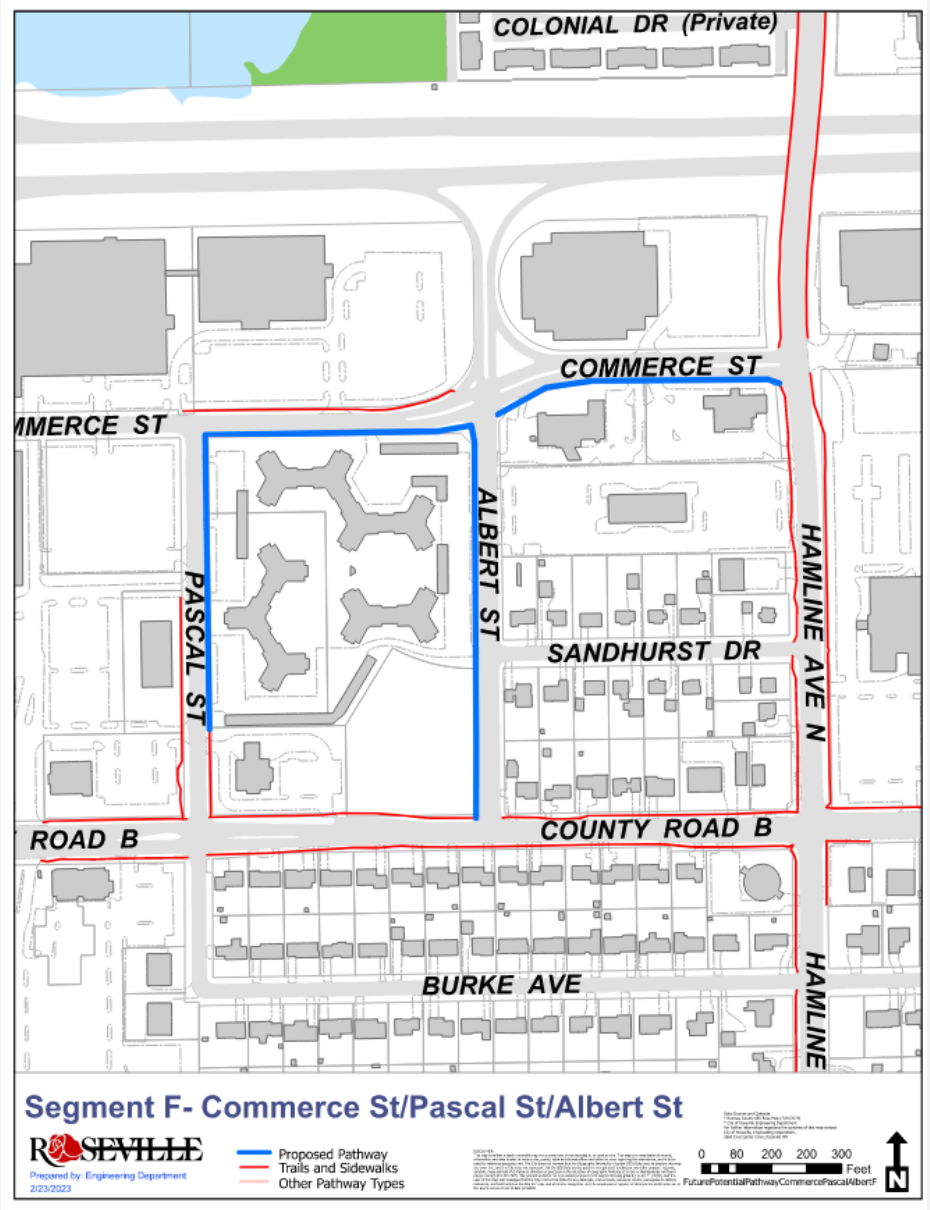

- E – County Road B2 Bridge
  - MnDOT Bridge/Ramsey County Roadway
  - Upgrade 6’ concrete walk to minimum 12 ‘ trail.
  - No joint projects identified
  - Existing pathway so not on pathway master plan.

Pathway Projects

Potential Projects/Opportunities

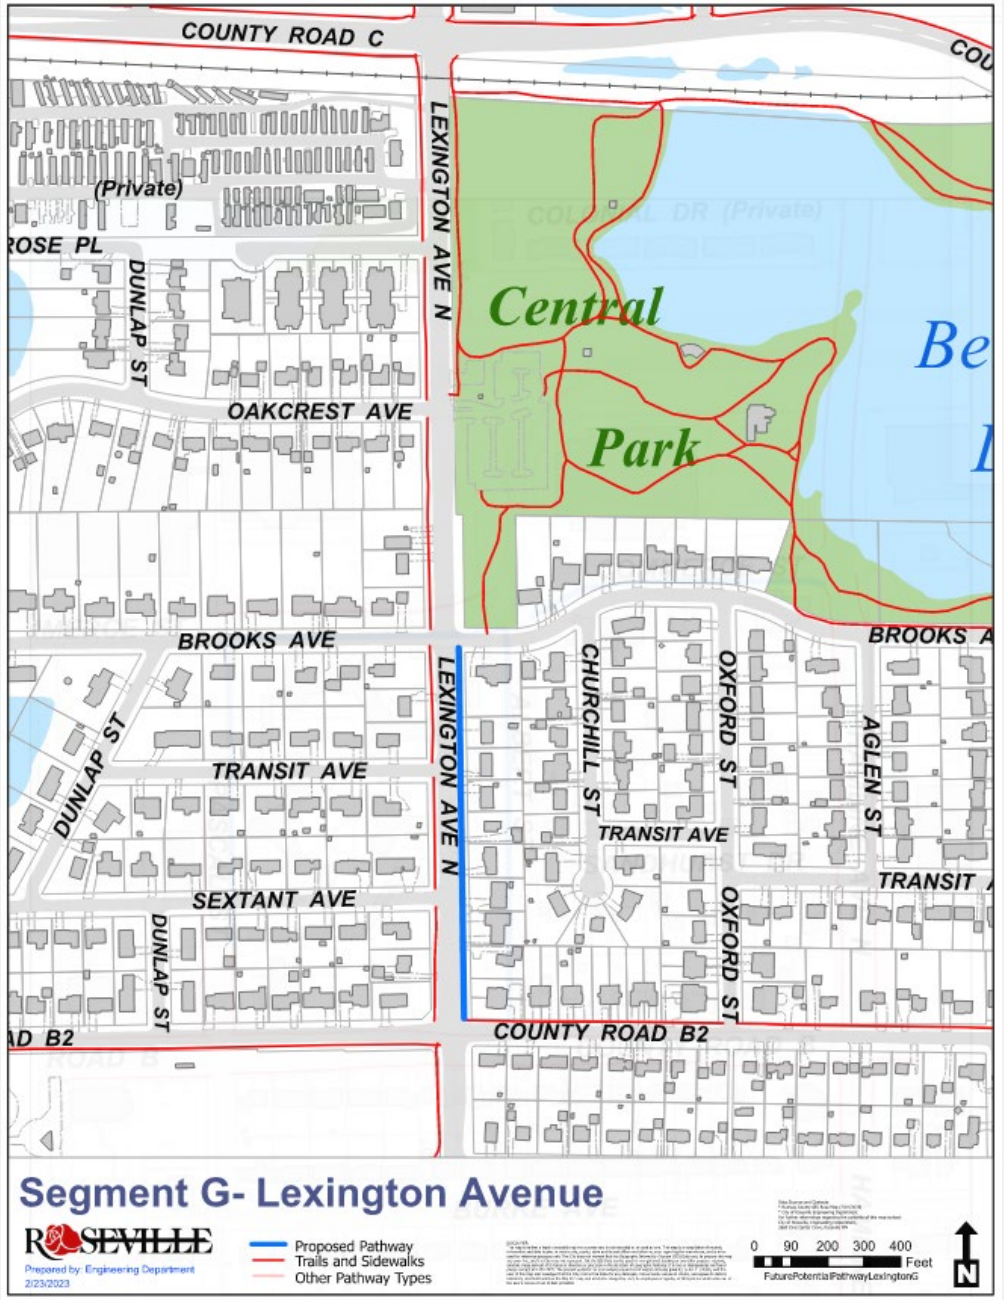

- F – Commerce Albert Area
  - Municipal State Aid/Local Roadway
  - Install pathway to complete missing segments
  - Potential private development Albert/CR B in 2023/2024
  - Pathway Master Plan Segments 29, 30, 31
    - Commerce -29
      - Points – 13
      - Preference Rank - 27
    - Albert -30
      - Points – 10
      - Preference Rank - 41
    - Pascal -31
      - Points – 12
      - Preference Rank - 31

Pathway Projects

Potential Projects/Opportunities

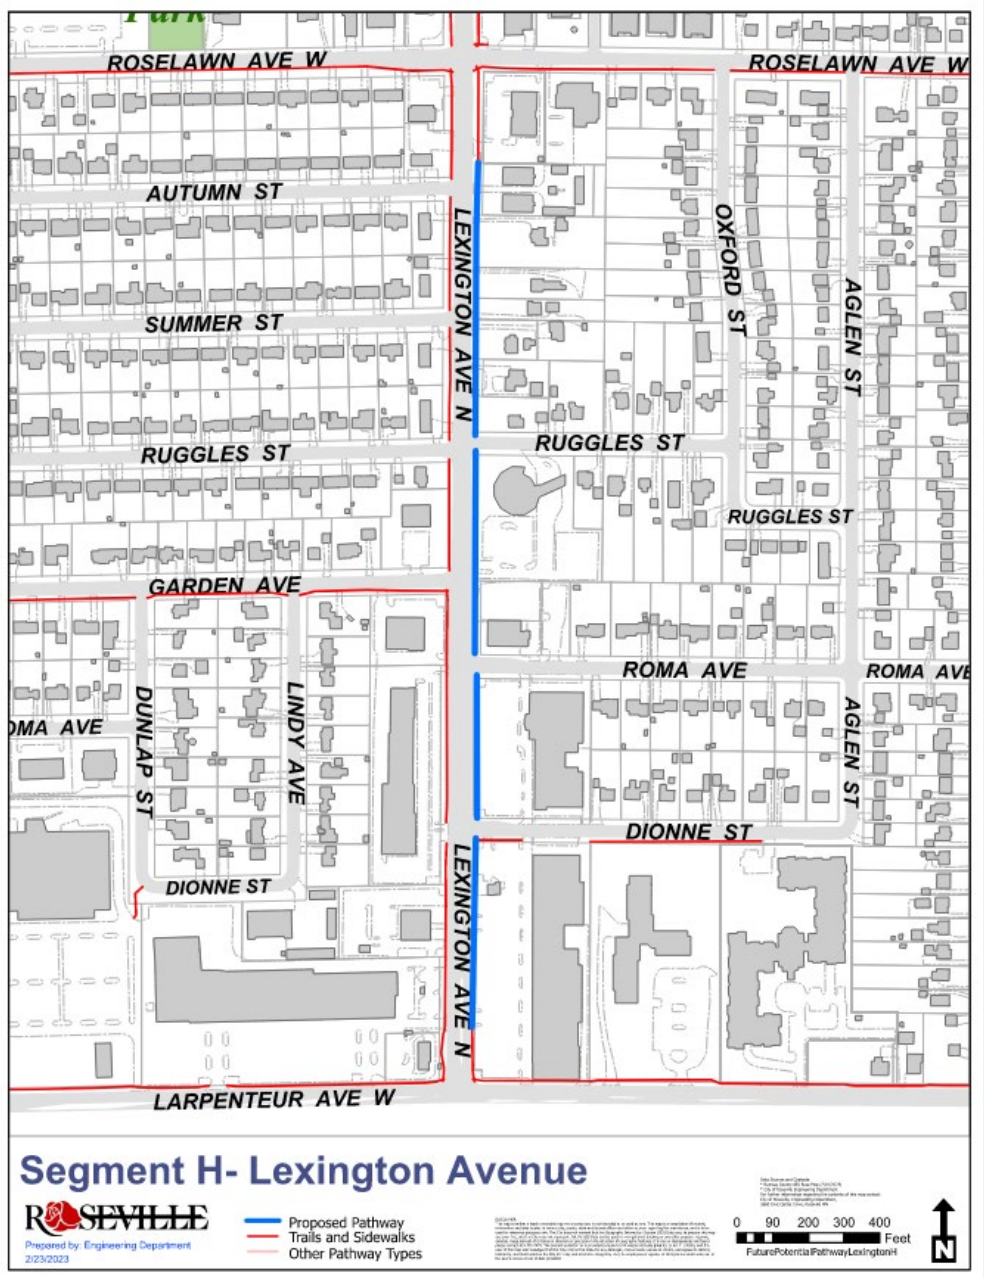

- G – Lexington Avenue, County Road B2 – Brooks (Central Park)
  - Ramsey County Roadway
  - Install new pathway on east side
  - Pathway south of B2 will be installed in 2023
  - Pathway Master Plan Segment 12B
    - Points – 19
    - Preference Rank - 7

Pathway Projects

Potential Projects/Opportunities

- H – Lexington Avenue, Larpenteur - Roselawn
  - Ramsey County Roadway
  - Install new pathway on east side
  - No joint projects identified
  - Pathway Master Plan Segment 12A
    - Points – 21
    - Preference Rank - 6

Pathway Projects

Potential Projects/Opportunities

- Miscellaneous Projects
  - County Road C Bridge
    - Upgrade Pathway
    - County Applying for Bridge Replacement funds
  - Victoria Street, County Road C – Arbogast
    - County applied for federal funding potentially for 2026/2027
  - Other potential segments?

City of Roseville, Minnesota
PATHWAY MASTER PLAN
Amended October 11, 2021

ROSEVILLE

This page intentionally left blank

PATHWAY MASTER PLAN

Pathway Master Plan includes the following information:

1. Introduction
2. Process
3. Background
4. Issues
5. Policies and Standards
6. Preference List of Pathway Segments
7. Recommendations
8. Attachments

1. INTRODUCTION

In the City of Roseville, pathways are defined as facilities that serve non-motorized users (pedestrians, bicyclists, in-line skaters, etc.) commonly within the public right-of-way. There are many different types of pathways throughout the city as further described in this document, and they can be both on-road (i.e., shoulder, bike lane) or off-road (i.e., sidewalks, trails, footpaths). The development of a pathway network in the City of Roseville, as well as, in the entire metropolitan area continues to have the support of Roseville residents. This desired network of pathways is essential in moving people to and from various destinations as well as providing additional recreational opportunities. The City currently has about 114 miles of pathways that provide some alternative to driving but are mostly used as recreational paths. This is a good start but if we as a City want to continue to provide a desirable place to live and work we need to pursue the construction of pathways in an organized and progressive manner.

In 1992, the City invited residents to participate in Vista 2000 -- a series of forums designed to bring together citizens, city officials and business, education and civic groups to create a vision for our community's future. One of the outcomes of Vista 2000 was the creation of the Roseville Pathway Master Plan (1997). This plan was instrumental in the development of almost 30 miles of pathways over the last 20 years.

In 2006, the City Council spearheaded a community visioning process entitled: Imagine Roseville 2025. The results of the visioning process demonstrated that the community continues to support the development of a more extensive pathways system that will link the current pathways system to itself, the neighboring community's paths, and the regional system creating a network that will function in the same fashion as our

vehicular transportation system.

The City of Roseville also has an adopted Parks and Recreation System Master Plan which was adopted in 2010. That plan discusses the concept of Constellations and Sectors within the Park system. The following excerpt is quoted from that Master Plan document:

As an evolution from the 1960 Parks and Recreation Plan, and through the process of developing this Master Plan, we envision an organizational structure that better serves the parks and recreation needs and desires of a nearly fully developed community. Sectors and constellations organize Roseville into four sectors (formed by Snelling Avenue and Highway 36) and 15 constellations (formed by a combination of factors, primarily significant roads and a ½ mile walking radius centered in a neighborhood). Sectors and constellations are enhanced by green park-like connections that emphasize pedestrian and biking paths between parks in each constellation, which links to nearby constellations and sectors. While some park components or services are best delivered on a community-wide basis, others are better delivered to smaller segments of the community. With sectors and constellations, each part of Roseville and every neighborhood will be afforded the parks and recreation opportunities it needs, with each park playing a role that balances immediate neighborhood needs with those of the broader community. In this approach, parks within walking distance of a neighborhood are organized to serve a majority of the neighborhood's park and recreation needs.

A map showing the identified constellations and sectors is included in Attachment 7 of this Plan.

In 2017, the City initiated an update of its comprehensive plan to guide direction of the city in policy implementation and infrastructure efforts through the 2040 planning horizon. The following transportation goals were developed for the 2040 Comprehensive Plan:

City of Roseville 2040 Transportation Goals

1. Coordinate transportation decisions with other government entities and coordinate planning efforts to ensure connectivity of regional routes.
2. Create a sustainable transportation network by encouraging more efficient use of existing roadways and limiting the need for future roadway expansion.
3. Create a safe and efficient roadway network, able to accommodate the existing and projected demand for automobile capacity and to reduce roadway congestion.
4. Promote the use of transit as a reasonable alternative to driving automobiles during both congested and non-congested time periods through land-use and transportation decisions.

5. Encourage the use of non-motorized transportation by providing and supporting development of a high-quality network of both off-road and on-road pathways, and ensure that bicycle and pedestrian routes are safe, efficient and attractive.

During the public involvement process for the 2040 Comprehensive Plan, continued pathway development and resident access to a safe and connected bicycle and pedestrian system continued to be a common theme.

This Pathway Master Plan is an update of the 2018 plan. The intent of this document is to provide guidance for the future development of pathways in the City of Roseville and to build upon current and previous planning efforts intended to improve and enhance the City's pathway system.

Purpose

Imagine every Roseville resident being within short walking distance of a pathway network that links them to numerous local and metro-wide destinations. Places like; schools, libraries, parks, stores, friends or work could be easily accessed just getting on the pathway network and walking, biking or skating there. A successful network would mean that people living in the Langton Lake neighborhood could safely walk or bike to Rosedale for lunch and a movie and then over to HarMar to pick up some new books. A student from the Lake Owasso area could bike to morning class at the University of Minnesota. Someone who's out for some exercise could bike around Bennett Lake on their way to Lake McCarrons, then off to the Gateway Trail to explore the northeast suburbs. Or a homeowner near Lake Josephine could bike to their job in downtown Minneapolis. The opportunities are limitless if we develop a safe network of pathways that connect to our neighboring communities.

Pathways are not a new concept, they are found throughout the metropolitan area. Numerous communities are developing pathways with every new development or redevelopment. Roseville alone has about 114 miles of on and off-road pathways. The sidewalk, once a lost idea, has made its way back into suburban development because it connects neighborhoods creating a healthier and more livable community.

The need is for a congruent system that links the existing pathways with each other creating a grid not unlike the street network. The goal is to provide a safe alternative to the automobile that can provide access as conveniently and efficiently as that allowed for the automobile. Every street within the City should have a facility that provides safe travel for pedestrians, cyclists and in-line skaters, whether it's a shared on-road facility or separated off-road facility.

The purpose of this document, the Roseville Pathway Master Plan, is to provide a set of guidelines for use in the development of a pathway network for our community. These guidelines provide policies and standards for the planning, design, construction, maintenance, promotion and regulation of the community's pathway facilities. This plan is not intended to define interior park paths, those will be defined on an individual basis as the parks are planned and developed, although, the guidelines will provide

some of the necessary elements for proper design and development as well as provide some guidance and preference to meet the Parks and Recreation System Master Plan goal of connecting constellations and segments. The recommendations provided in this plan focus not only on the physical facilities, but also on education and enforcement as important components of a general program to promote safe pathway use. Once the master plan is adopted as part of the Roseville Comprehensive Plan it will serve as a planning tool to assist the City Council on decisions regarding pathway issues.

Benefits

There are many factors that make up the perceived quality of life for a community; education, diverse recreation opportunities, strong economy, clean and healthy environment and convenient transportation are just a few. A successful pathway network can help make a community a better place to live, work, play or visit by improving the quality of life. Creating places for pedestrians and bicyclists means more than just special trails, though those might certainly be an important part of an overall plan. Creating an active community environment means taking a look at the broader scope of where there are, and aren't, opportunities to safely connect to destinations. It involves land use design, retrofitting the transportation infrastructure, funding and much more.

Of all the benefits that pathways can provide for a community, the most obvious are recreation and social. A growing urban population with increasing amounts of leisure time, combined with an overall surge in health consciousness, has led to an increasing demand for outdoor activities such as jogging, walking, biking and in-line skating.

Encouraging the development and use of alternative modes of transportation can benefit the community as well as the individual. Some benefits are:

1) **Safety**
    a) Pathways provide people, young and old, a designated space for accessing area destinations.
    b) Pathways create safe alternatives to the school-busing program.
    c) Pathways direct people to safe street crossings.
2) **Social**
    a) Pathways promote strong neighborhood connections creating a more livable community.
    b) A pathways network can provide access and mobility to users of any age or ability.
3) **Economic**
    a) Bicycling and in-line skating, as well as walking, are an affordable and low maintenance alternative to automobile use.
    b) Pathways, because of their size and construction, are less costly to develop and maintain than roadways.

c) Surveys have indicated that the value of a home goes up an average of 6% as a result of its close proximity to a trail.

4) Transportation

a) A pathways system provides an increased convenience for non-motorized transportation to access local and regional destinations.

b) Pathway use, as an alternative, assists in the relief of roadway congestion and frees up parking spaces.

c) Pathways provide another level of service in the desired multi-modal transportation system by providing connections to transit.

5) Health

a) Users of pathways, whether they walk, bike or in-line skate, improve their physical fitness and reduce personal stress.

b) Pathway trips, when utilitarian, add fitness into one's daily routine.

6) Environmental

a) Using pathways as an alternative to motorized vehicles reduces air and noise pollution.

b) Bicycling and in-line skating are energy efficient.

c) Pathway use does not consume fossil fuels.

This page intentionally left blank

2. PROCESS

Alongside the development of the 2040 Comprehensive Plan Update and the corresponding 2040 Transportation Plan Update, the Public Works, Environment, and Transportation Commission (PWETC) led the update of the Pathway Master Plan. Over the course of three PWTEC meetings, the PWETC discussed the current plan, reviewed and identified modifications to the policies and standards, discussed remaining pathway gaps, and provided an updated scoring and ranking criteria process in order to ensure a quantified scoring system for preferred pathway segments. City staff's role was to provide support and guidance by setting up meetings, gathering information, answering questions, editing the plan, and otherwise assisting the PWETC as needed.

3. BACKGROUND

History of Roseville's Pathways

Trail development in Roseville started during the early 1970s with a small loop in Sandcastle Park which led to the construction of the very popular Central Park system, the 1995 construction of the County Road C pathway, and the 1997 expansion of the Acorn Park trails. In 1975, a comprehensive plan for trails was developed similar to the network that is being proposed with this document. The desire was to have an integrated system of paths that connected residents to area parks. The intent was mainly recreational.

The City's first pathway plan created a surge of development in the 1970s locating pathways mainly in the parks. City code was changed later to dictate that developers were responsible for providing pedestrian accommodations to their new facility, so sidewalks started to sprout up in commercial and industrial areas. Outside funding sources became more available in the 1980s, which also increased the development of pathways including a growing interest in basic pathway facilities for bike commuters.

As a follow-up to Vista 2000, on September 11, 1995 the City Council appointed a volunteer advisory committee to work with staff to develop a comprehensive pathway master plan. The advisory committee was made up of fourteen Roseville residents and three staff members. This plan was approved by City Council in 1997 and updated in 2003. The main focus of the 2003 update was to re-prioritize the list of pathway project that were identified within the 1997 plan, eliminating the ones that had been constructed and creating new priorities. A similar process occurred in 2008 as part of the last Pathways Master Plan Update.

Current Conditions

Demographics

The 2015 American Community Survey (a five-year average of general population characteristics) indicates that Roseville has a stable population; this is mainly due to limited developable land. Some additional demographic information is provided below:

- Roseville's population was 33,690 in 2000. In 2015, the population was 34,948. This is approximately an increase of four percent since 2000.
- The City's forecasted 2040 population is expected to remain near current levels.
- The percent of the population over the age of 50 has continued to increase. However, Roseville is seeing an increase in younger residents and families as the percentage of residents in the 20 to 34 age group has also increased between 2000 and 2015.
- The overall age of Roseville is notably older than the county and the region. The 2015 median age of Roseville's population was 40.8 years. This compares with 34.6 years for Ramsey County and 36.9 years for the region.

- The aging resident stability indicates that Roseville is a desirable place to live and most are staying in the community.

The data indicates that seniors and empty nesters occupy most of the households. These demographics define the need for the creation of a pathway network that allows seniors the means to exercise and make short utilitarian trips.

The fact that the city is nearly developed also indicates that pathway construction and location will be somewhat restricted due to previously defined corridors and limited space.

Land Use

Roseville is virtually 100% developed. Origins, destinations and travel routes are well established. Understanding and defining land use is critical to pathways development in that these destination points are where people want to walk or bike - areas such as, major civic buildings, recreational and cultural facilities and shopping areas. See Attachment 1 for Existing Land Use Map.

Transportation System

With Roseville being completely developed, the transportation system and travel routes are well established. Because of its proximity to the core cities and its age, Roseville's development patterns have been mainly a continuation of the core grid. The major through traffic corridors that carry the bulk of the vehicles are laid out with half-mile spacing. These arterial roads are designed to carry the majority of the traffic and do it quite well. For the same reasons they also serve well as corridors for non-motorized transportation, providing commuter cyclists with an efficient means to their destination be it work, school or the store. But in the past they had not been designed to accommodate bicycle and pedestrian traffic thus making most of them dangerous for such travel due to the domination of vehicular traffic.

1) **Roadways (See Attachment 2 for Roadway Functional Classification Map)**
   a) MNDOT: Major high volume roads, including Snelling, Interstate 35W, and Highway 36.
   b) County: High volume roads that make up the 1/2 mile roadway grid pattern in Roseville.
   c) City: Lower volume neighborhood streets and collectors.
2) **Transit (See Attachment 3 for Transit Service Map) Ninety percent of the City's population lives within a 1/2 mile of a bus route. Here is a brief description of the transit system that serves Roseville:**
   a) Transit Centers: Rosedale & Little Canada (Rice Street at Little Canada Road)
   b) Park and Rides: Roseville Skating Center, Grace Church, & I-35W and County Road C
   c) High-Frequency bus service: The A-Line provides bus rapid transit (BRT) high-frequency service every 15 minutes or better along Snelling Avenue from the

Rosedale Transit Center south into St. Paul and ending at 46th Street Green Line light rail transit (LRT) station in Minneapolis.

d) Fixed route bus service: Metropolitan Council provides 16 fixed routes.

e) Non-fixed routes: There are transit options offering door to door service at reasonable rates. Each program has eligibility requirements. These services are provided by Metro Mobility and Roseville Area Senior Program.

3) Pathways (See Attachment 4 for Existing Pathways Map) The City of Roseville currently has approximately 114 miles of both on and off-road pathways.

a) County: There are some on-road striped shoulders that meet the minimum standards as stated in the definitions. There are approximately 29 miles of on-road pathways.

b) State: Currently there are no State pathway facilities in Roseville. The closest facility is the Gateway Trail south and east of the City.

c) City: This system consists of the park interior pathway system and some connecting routes between destinations along major roads. There are approximately 81 miles of city owned and maintained off-road sidewalk and trail pathway facilities.

Described below are the major paths that make up the majority of the City's existing pathway system.

Central Park Pathways

The pathway system in Central Park has always been popular because of its proximity to attractive and diverse natural amenities, its connection to numerous recreational areas and its size, which provides multiple access points and lengthy paved paths. The Central Park paths are heavily used and provide a very good trail experience for recreational users and a good thoroughfare for utilitarian users.

County Road C Pathway

The pathway in the County Road C corridor was constructed in 1995 with funding assistance from ISTEA. This path provides an essential central spine through the City, connecting users to a number of City amenities like commercial/retail centers, Central Park, Acorn Park, City Hall and the Lexington Avenue pathway.

County Road B2 Pathway

This off-road trail provides access from the Lexington Avenue trail through the Rosedale Mall shopping area. It was expanded, using federal funds, in 2005 to extend from Rosedale to the west city boundary where it connects up to the Minneapolis Diagonal Trail. This corridor is a major connector for students within the walking area for Roseville Area Schools, providing connections to Roseville High School, Central Park Elementary, and Roseville Middle School.

County Road B Pathway

This corridor consists mainly of off-road concrete sidewalks providing access to and from residential areas, HarMar shopping area, Parkview Elementary and Lexington Avenue pathway. This sidewalk, from Rice Street all the way to Cleveland Avenue, provides an east/west pedestrian corridor.

Dale Street Pathway

This corridor is mainly an off-road bituminous pathway connecting County Road C to Larpenteur Avenue. This pathway briefly merges with the Roselawn/ Reservoir Woods Trail at Roselawn. The pathway was identified in the 1997 plan and constructed in 2000 using Federal funds. The segment of Dale Street from Roselawn to Larpenteur does not have an off-road pathway. The connection to Larpenteur Avenue is achieved through Reservoir Woods Park.

Larpenteur Avenue Sidewalk

Four segments of this sidewalk have been constructed along Larpenteur Avenue since the development of the 1997 plan. The segments are Hamline to Oxford (2000), Galtier to Rice Street (2001) and Oxford to Reservoir Woods (2003). The segment of Larpenteur between Reservoir Woods Park and Galtier was completed in 2017.

Lexington Avenue Pathway

This is the main north/south spine of the City. The corridor consists of both bituminous path and concrete sidewalk running from Larpenteur Avenue north through Roseville and into Shoreview. Shoreview's development of this pathway corridor provides a wonderful opportunity to create a regional north/south link.

Roselawn/ Reservoir Woods/ McCarrons Pathway

This off-road trail was identified in the 1997 plan and constructed in 2000 using Federal funds. It follows Roselawn from Lexington Avenue through Reservoir Woods Park under Dale Street to McCarrons Blvd. This pathway then continues along both North and South McCarrons Blvd to connect to Rice Street.

Rice Street Pathway

This is an important north/south link from Roseville to St. Paul. The corridor has a bituminous path of varying width and condition. This is a critical feeder to the Trout Brook County Trail at McCarrons Park. The Trout Brook Trail connects to the Gateway State Trail.

4) User Groups

Users differ widely in their means of travel, ability and preference for travel environment. Some will place importance on their ability to get from one place to another, keeping their trip time short and not concerning themselves with the conditions around them. Others will favor traveling in a pleasant environment, even going out of their way to experience scenic and natural amenities. This plan

for a linked pathway network will accommodate all user groups in some capacity. The major types of users are:

a) Commuter Bicyclists – desire to travel safely at higher speeds with minimal stops.
b) Recreational Bicyclists – desire a safe and scenic corridor with occasional rest areas
c) Pedestrians - Walkers, joggers, students, strollers, in-line skaters, skate boarders, people with disabilities, young bicyclists and tri-cyclists – desire a smooth surface, a safe facility, and scenic corridor
d) Cross-country skiers, snowshoers – desire a natural, scenic corridor, groomed snow
e) Skate-boarders – desire a smooth and often challenging surface

Pathway Types

On-Road Pathways: On-road paths are a paved portion of the roadway that provides space for the use of bicycle and some limited pedestrian activities. See Attachment 4 for Existing Pathways Map.

Bike Route: A shared right of way located on roadways designated with appropriate signage to encourage bicycle use and connectivity. (none in Roseville)

Bike Lane: A bike lane is a portion of the roadway or shoulder designated for exclusive or preferential use by people using bicycles. Bicycle lanes are distinguished from the portion of the roadway or shoulder used for motor vehicle traffic by striping, marking, or other similar techniques. (none in Roseville)

Striped Shoulder: A portion of the edge of a paved road surface that is contiguous with the road surface and separated by striping at least 4 feet wide. (Approximately 29 miles)

Shared lane: Low traffic roads that have no additional space provided for bicyclists or pedestrians but that can be shared between automobiles, bicyclists, and pedestrians because of low traffic volumes and localized activity. Shared lanes are not designated as pathways although they do provide good access routes to other pathways.

Off-Road Pathways: While a community's streets and roadways typically provide the best means of accessing a variety of destinations by bicycle, off-road pathways can enhance the primary transportation system. Pathways that are separated from the motor vehicle traffic can be excellent transportation routes for bicyclists and pedestrians, especially users not comfortable with riding alongside vehicle traffic, and in many instances, can provide pathway users with linkages not available to motor vehicles.

Trail: An off-road pathway that is generally 6-12 feet wide and has a paved bituminous or similar hard surface. Trails are typically located within dedicated right of way, within road right of way separated by a curb and or boulevard, or within parks. The surface type and width accommodate multiple users, including pedestrians, bicyclists, and in-line skaters. (Approximately 36 miles)

Sidewalk: Concrete sidewalks, usually within the road right of way, generally 4-6 feet wide and running parallel to the road, intended for use by pedestrians. (Approximately 45 miles)

Foot Path: Wood chip trails, ag-lime trails, and turf trails are not considered part of the pathway network because they are exclusive to parks. This document is not about park pathways. They are mentioned for inventory purposes only. (Approximately 2 miles)

Other: Boardwalks are not considered part of the pathway network because they are exclusive to parks. This document is not about park pathways. They are mentioned for inventory purposes only. (Approximately 1 mile)

Supplemental Facilities

Bicycle and pedestrian facilities include more than just the paths themselves. Secure and appropriate bicycle parking and locker facilities, comprehensive maps of Roseville's pathway network, mass transit integration, rest areas, and trailheads are key components of a complete pathway network. Roseville has few supplemental facilities for pathway users. They consist mostly of:

1) **Bicycle parking and lockers**
   a) bike racks of obsolete design that are sporadically placed in some parks and public buildings
   b) occasional bike racks located at commercial buildings
   c) few if any, bike lockers
   d) current city code does not address the issues of bicycle parking
2) **Pathways Map**
   a) comprehensive pathways map showing all types of facilities within the City

b) partnering with Active Living Ramsey County on comprehensive County pathway mapping

3) Trail Heads and Rest Area

a) utilizes existing parks w/ restrooms, picnic areas, recreational areas, drinking fountains

b) need intermittent rest stops with benches between destinations

4) Transit Accommodations

a) abundant transit opportunities

b) limited and often unsafe pedestrian access to transit stops and park and rides

c) bus shelters at bus stops along high traffic roads

d) bus benches at many bus stops

Current Operation & Maintenance Practices

Off-Road Pathways

The Parks and Recreation Department and its maintenance staff has the responsibility of making sure routine maintenance operations are completed. On occasion they will request assistance from the street maintenance staff.

Listed below are the maintenance operations performed for the City's off-road pathways.

- Plowing: Remove any accumulation promptly and continuously until cleared. Accumulation of two inches or more shall be removed within 24 hrs.
- Sweeping: Sweep three times annually, spring, summer and fall, or when safety is of concern.
- Sealing/ Patching: Fill cracks or holes as they occur.

On-Road Pathways

The Public Works Department and its maintenance staff are responsible for the maintenance of the on-road pathway facilities on City of Roseville streets. Listed below are the maintenance operations performed for the City's on-road pathways.

- Plowing: When there is an accumulation of two inches or more of snow it will be removed within 24 hrs.
- Ice control: apply ice control when ice or snow adheres to the pathway.
- Sweeping: Sweep three times annually, spring, summer and fall, or when safety is of concern.
- Sealing/ Patching: Fill cracks or holes as they occur.

On-Road pathways located on County Roads are maintained by Ramsey County.

Trail Management Program

Since 1999 the Public Works Department has had the responsibility to implement a long-term reconstruction and major maintenance program. The Trails Management Program (TMP) is modeled after the Pavement Management Program and consists of: Inspection/Evaluation, Maintenance, Sequential Planning and Financial Planning. The TMP utilizes state of the art pavement tools to help identify and prioritize pathway maintenance and rehabilitation. All of the pathways are broken down into segments that are surveyed approximately every 5 years and actual pavement distresses are measured and entered into a computer database. The measured distresses are used to determine the pavement condition index (PCI). The PCI is a numerical rating between 100, a new pavement, and 0, a completely failed pavement. This methodology was originally developed by the US Army Corps of Engineers and later revised by the Minnesota Local Road Research Board. It has become a standard method to evaluate pavement condition. A computer program that utilizes pavement research findings to predict the degradation of pavement with time then analyzes the pathway data. The rate of degradation has been calibrated to match our actual experience. In addition, the program allows us to model different maintenance strategies to gauge their impact on the overall system and budget. The program is quite flexible and allows us complete discretion in choosing the most appropriate maintenance technique.

As of the 2017 PCI survey, the average PCI rating for bituminous pathways was 62. The average PCI rating for concrete pathways was 89.

4. ISSUES

Over the last two decades, the City has continued to expand and enhance the pathway system. But it still lacks some important elements that will meet the needs of its users over the next two decades. These are the types of elements that come with time and public support and demand for a complete network. Periodic updates of this master plan is an important step in identifying and monitoring issues that can provide the City with a complete pathway network consistent with current demands and anticipated future needs. The following is an updated list of issues relevant to Roseville.

1) Safety

a) Provide transportation facilities for all ages and abilities (children, senior citizens, people with disabilities, pedestrians, and bicyclists).
b) Improve the ability to safely travel from one location to the next.

2) Connectivity

a) Use of the pathway system for transportation-related trips as an alternative to the automobile.
b) Enhance access to transit service and stops, and especially the A-Line BRT stations along Snelling Avenue.
c) Provide linkages between major destinations and to the rest of the metropolitan area.
d) Connecting to regional bikeways and the regional trail network.
e) The continuation of bikeways into Roseville being developed by the City of St. Paul and Ramsey County along major north-south roadways including Rice Street, Dale Street, Lexington Avenue, and Cleveland Avenue.
f) Coordination of pathway connections with the Connected Ramsey Communities Network map.
g) Provide neighborhood access to the City's pathway system.
h) Complete pathway connections to City parks.
i) Complete links within and between park constellations.
j) Support connections to neighboring community's pathways.
k) Provide pathway facilities along regional transportation corridors.
l) Overcome barriers that deter pathway use:
    i) Highway 36, Snelling Avenue, Interstate 35W, arterials,
    ii) Narrow bridge decks and underpasses,
    iii) Poorly defined crosswalks at intersections, and
    iv) Major intersections that have high traffic volumes and deter pedestrian activity.

3) Maintenance

a) Maintain funding for equipment and personnel to support the City's pathway system.
b) Meet the needs of a demanding traveling public during all four-seasons.
c) Continue to preserve the current pathway facilities.

4) Education and Promotion

a) Promote the pathway system using signage, maps, and on-line resources to increase pathways use and build public support.

b) Continue to update the Pathway Master Plan and monitor its progress.

c) Public and stakeholder engagement in the development of new pathways.

5. POLICIES AND STANDARDS

The policies (bold) and standards were developed to guide the City in the development of Roseville's pathway network. They are detailed statements that aid in the resolution of the previously defined pathway issues. The intent of this section is to define the minimum standards for pathway facilities in Roseville. In certain instances it may be necessary to increase the standards in order to provide a safe and efficient facility for the community. *Standards that were left undefined in this document are defined by MNDOT pathway guidelines.*

The various types of pathways include, but may not be limited to the following:

Bicycle Lane: A portion of a roadway designed for exclusive use by people using bicycles. Bike lanes are distinguished from the portion of the roadway used for motor vehicle traffic by physical barrier or striping and pavement markings. The widths of these lanes vary between 5-10 feet, depending on speed and Average Daily Traffic on the road.

Shared Lane: Any roadway upon which a bicycle lane is not designated and which may be legally used by bicycles whether or not such facility is specifically designated as a bikeway. The standard driving lane is to be shared between vehicles and light traffic.

Wide Outside Lane: Any roadway upon which a bicycle lane is not designated and which may be legally used by bicycles whether or not such facility is specifically designated as a bikeway. A widened outside driving lane, 14 feet or greater, is to be shared between vehicles and bicycles.

Trail: An off-road pathway that is 8-12 feet wide that is generally shared use, designed for the use of bicycles, in-line skaters and pedestrians.

Sidewalk: An off-road pathway that is 6-8 feet wide that is generally designed for pedestrian use, although state law does allow the use of bicycles on these facilities outside of defined business districts.

Striped Shoulder: A portion at the edge of a paved road surface that is contiguous with the road surface and separated by striping at least 4 feet wide.

LOCATION

1) **Inventory and acquire rights-of-way that have become available.**
   a) Where possible use available rights-of-way first.
   b) Use shared rights-of-way second.
   c) Purchase private rights-of-way last.
   d) Sharing pathway rights-of-way with underground utilities will be allowed as long as there is no interference with the function of the pathway.
2) **Provide pathway facilities along all roads.**

a) Develop a pathway along all arterial roads where equal alternate parallel routes are not available. For example, an adjacent parallel trail located within park boundaries but offset from the roadway corridor.
b) Strive to complete pathways along arterial roads and regional trail corridors on both sides of the roadway.
c) For standalone pathway projects, prioritize completing pathways along roadways where no pathway exists prior to completing pathways along both sides of the roadway.
d) As part of road reconstruction projects, explore the feasibility of adding or upgrading pathway facilities (both on-road and off-road as appropriate).
e) Pathways parallel to roads are preferred in zoned residential areas to ensure continuity of design and minimize overall impact to property.
f) Develop pathways using the following recommended standards as guidelines:

Pathway Design Selection for Urban (curb and gutter) cross section roads							
Motor Vehicle ADT (2 lane)		<500	500-1000	1,000-2,000	2,000-5,000	5,000-10,000	>10,000
Motor Vehicle ADT (4 lane)		N/A	N/A	2,000-4,000	4,000-10,000	10,000-20,000	>20,000
Motor Vehicle Speed	25 mph	SL	WOL	WOL	WOL	BL = 5 ft or T = 8 ft	N/A
	30 mph	SL w/ sign	WOL	BL = 5 ft or T = 8 ft	BL = 5 ft or T = 8 ft	BL = 6 ft or T = 8 ft	BL = 6 ft or T = 8 ft
	35-40 mph	WOL	BL = 5 ft	BL = 5 ft or T = 8 ft	BL = 6 ft or T = 8 ft	BL = 6 ft or T = 8 ft	BL = 6 ft or SS = 8 ft
	45 mph and greater	BL = 5 ft	BL = 5 ft	BL = 6 ft or T = 8 ft	BL = 6 ft or T = 8 ft	BL = 6 ft or SS = 8 ft	T or SS = 10 ft
BL = Bicycle Lane, SL = Shared Lane, WOL = Wide Outside Lane, T = Trail, SS = Striped Shoulder ADT = Average Daily Traffic							

Pathway Design Selection for Rural (shoulder and ditch) cross section roads							
Motor Vehicle ADT (2 lane)		<500	500-1000	1,000-2,000	2,000-5,000	5,000-10,000	>10,000
Motor Vehicle ADT (4 lane)		N/A	N/A	2,000-4,000	4,000-10,000	10,000-20,000	>20,000
Motor Vehicle Speed	25 mph	SS = 4 ft or SL	SS = 4 ft or SL	SS = 4 ft or WOL or T = 8 ft	SS = 4 ft or T = 8 ft	SS = 4 ft or T = 8 ft	N/A
	30 mph	SS = 4 ft or SL	SS = 4 ft or WOL	SS = 4 ft or T = 8 ft	SS = 4 ft or T = 8 ft	SS = 6 ft or T = 8 ft	SS = 6 ft or T = 8 ft
	35-40 mph	SS = 4 ft or SL	SS = 4 ft or WOL	SS = 6 ft or T = 8 ft	SS = 6 ft or T = 8 ft	SS = 6 ft or T = 8 ft	SS = 8 ft or T = 8 ft
	45 mph and greater	SS = 4 ft	SS = 4 ft	SS = 6 ft or T = 8 ft	SS = 8 ft or T = 8 ft	SS = 8 ft or T = 8 ft	T or SS = 10 ft
BL = Bicycle Lane, SL = Shared Lane, WOL = Wide Outside Lane, T = Trail, SS = Striped Shoulder ADT = Average Daily Traffic							

3) Develop pathways around lakes, to and in every park and open space.

a) Pathway development around lakes will be designed to provide, at minimum, views to the lake.

b) Pathways in parks and open spaces will be developed consistent with their individual park master plans.

c) Develop pathways consistent with the Parks & Recreation System Master Plan Trails and Parks Constellation Link Map.

d) Cross-country and snowshoe locations will be designated by the Parks and Recreation Department.

e) Snowmobiles and other unauthorized motorized vehicles will not be allowed on off-road or paved surface pathways.

f) Loop pathways will be designated, measured and signed in coordination with the Parks and Recreation Department.

g) Where possible, develop continuous pathway loops that are unbroken by street crossings and other obstructions.

4) Develop a pathways system that is accessible from all areas of the city.

a) The pathways system should be designed to provide an unobstructed connection no further than 1/4 mile to a pathway from any given property. Where the 1/4 mile distance is not feasible, the resulting connection distance should be as close to 1/4 mile as reasonably possible.

CONNECTION

5) **Provide a safe network of pathway linkages for pedestrians and cyclists to and between educational facilities, churches, business centers, transit stops, parks and open space.**
   a) Business centers shall have pathways connecting to the public pathway network.
   b) Schools shall have off-road connections to the pathways network.
   c) Parks, open space and transit stops shall have a pathway connecting them to the pathways network.
   d) Develop pathways consistent with the Parks & Recreation System Master Plan Trails and Parks Constellation Link Map.
   e) Include school property for possible pathway loops and linkages to the greater pathways network.
   f) Provide public access to school facilities.
6) **Provide access around/through major obstacles.**
   a) Major obstacles include Highway 36, Snelling Avenue and Highway 35W.
   b) When bridge reconstruction takes place, bicyclist and pedestrian accommodations shall be integrated into the design.
   c) Connections across major obstacles shall be provided at controlled intersections or be grade separated (pedestrian bridges and tunnels).
7) **Provide pathway linkages for bicyclists and pedestrians to the regional pathway system.**
   a) To complete major linkages to the regional pathway system; utilize grade separations (pedestrian bridges and tunnels) to overcome major obstacles.
   b) Signage shall be utilized to inform and direct users of regional trail linkages.
8) **Provide a pathway system that promotes a sense of community through the connection of neighborhoods.**
   a) Utilize existing or purchase new easements to construct pathways between neighborhoods.
9) **Provide a pathway system that connects to local and regional commercial destinations.**
   a) Provide pathway access from neighborhoods to commercial uses for consumers and employees.

IMPLEMENTATION

10) **Coordinate planning and design of pathway connections with neighborhood groups, civic organizations, school districts, business districts and other governing agencies.**
   a) Make the Pathway Master Plan publicly available through multiple means and mediums.

b) When projects are implemented, stakeholders and impacted groups will be notified and provided an opportunity for input before plans are finalized.
c) Allow for phasing of some pathways to see them through stages of implementation and funding.
d) Develop landscape standards for enhancing existing pathways and developing new pathways.

11) Consider alternative pathway types, suitable to intended use.

a) Pathways intended for wheeled uses shall be paved.
b) Pathways in ecologically sensitive areas shall be designed to minimize their impact.
c) Pathways intended for winter activities will not have their snow removed.
d) Non-paved pathways will be limited in use (walking, hiking, etc.).

12) Pathways shall be designed to avoid user conflicts.

a) High use areas with multiple user groups (bicyclists, pedestrians, in-line skaters, etc.) may require separate pathways for separate uses.
b) In areas of potential or known conflict, pathways shall be signed for their intended use.
c) Direction of traffic flow, on high use pathways, will be defined and signed or marked.
d) Significant space, barriers or delineation shall be provided between pathways and conflicting adjacent uses.
e) Pathways where conflicts with speed occur shall have defined speed advisories that are properly signed.
f) Pathways shall be designed to provide for adequate visibility based on MNDOT standards for pathway facilities.
g) Best practices shall be considered when designing pathways on-road or adjacent to roadways to minimize conflicts between motorized vehicles and bicyclists and pedestrians.

13) Develop a consistent palette of design elements.

a) Design elements shall consist of signage, trail markings, curb cuts, driveway crossings, medians/dividers, intersections/crosswalks, furniture, lighting, walls, and typical pathway and roadway sections.
b) Develop a design goal to provide a boulevard between pathways and roadways that lends itself to civic beauty and traffic calming.

14) Establish a formal review process for new and renovated public and private development projects that addresses pedestrian and bicycle issues.

a) City staff will utilize the City Plan Review Process to ensure consistency with the Pathway Master Plan.
b) Staff will use a checklist to aid in the plan review process that shall be required to complete prior to plan approval.

15) Pathways shall be part of roadway design and construction.

a) The City shall consider pathways as part of the transportation system.
b) The City recognizes that residents adjacent to the pathways may not be the only beneficiaries.

16) Seek ways to encourage businesses to address bicyclist and pedestrian issues through the redevelopment of their property.

a) Consider incentives (low interest loans) for Roseville businesses to redevelop their property with improvements for pedestrians and bicyclists.

MAINTENANCE

17) Pathways will be kept in good repair and useable.

a) During winter, the highest use pathways shall be cleared of snow to bare pavement.
b) During winter, the medium use pathways shall be cleared of enough snow to allow passage.
c) During winter, the low use pathways will not be cleared of snow.
d) Pathways will be cleared within 24 hours after a snowfall.
e) All paved pathways shall be swept once during the spring and once during late summer.
f) Vegetation encroaching in a pathway corridor shall be trimmed to allow safe passage according to MnDOT standards.
    i) Per City Code, 706.09.D; Duties of Private Land Owners, Private property owners shall properly prune trees and vegetation to sufficient height and width to allow free passage of pedestrians and vehicular traffic (9 feet over sidewalks and two (2) feet horizontal distance)
g) All pathways and their related facilities shall be inspected annually. Inspection data shall be entered into a management system to help guide the maintenance and replacement decisions.

18) Maintenance responsibilities will be assigned based on function and use of the facilities.

a) The City will be responsible for all pathway maintenance under City jurisdiction.
b) Per City Code, 407.03.P; all properties with off-the–road, non-motorized pathways, except nontax exempt Low Density Residential properties, are required to clear snow from “non-motorized pathways” within 12 hours after snow and ice have ceased to be deposited thereon.” (City Code 407.03)

19) The City will develop and implement maintenance practices that will minimize the burden on adjoining properties.

a) City will minimize property damage during pathway maintenance practices.
b) City will reestablish turf damaged as a result of pathway maintenance.
c) City will replace or repair mailboxes on City streets damaged by direct contact by City snow removal machinery.

d) No more snow will be deposited on private driveways and sidewalks then would be typically deposited by street snow removal.
e) City will make efforts to schedule snow removal to minimize double shoveling.

EDUCATION/INFORMATION/REGULATION

20) The City shall regularly update this Plan.
a) The Pathway Master Plan will be adopted by reference into the City's Comprehensive Plan.
b) The Plan should be reevaluated once every three years.

21) Utilize pathway projects to educate the community about the benefits of a well-planned pathways system.
a) Staff will report successes in pathway projects by using all communication devices available by the city as an educational and promotional practice.

22) Provide proper signage for a safe, user-friendly pathway network.
a) Regulatory and warning signs for pathway users and for roadway users adjacent to pathways shall be placed and designed to current national and state regulations and standards.
b) Promote the use of wayfinding devices (including on-line mapping resources) and signage to better orient users to the Roseville system and encourage pathway etiquette.

23) Develop regulations for pathway use and enforcement.
a) Staff will develop pathway regulations to be published and posted to further improve pathway usability.

24) Develop and provide events that promote non-motorized modes of travel.
a) Add a pathway safety program to the Safety Camp.
b) Continue to promote Roseville's pathway facilities with events like the Rosefest "Tour de Roses."

25) The City will develop a promotion and education plan.
a) Provide a "safe biking" class in the Community Education program.
b) Encourage area cycling shops to support and promote the City's pathway network.
c) Utilize the OVAL for cycling events both competitive and educational.
d) Gather and/or develop educational and promotional videos for use at schools, promotional events or local cablecasts.
e) Collaborate with school officials on ways to educate students on pathway safety and use.
f) The City will widely circulate pathways plan and maps.
g) The City will encourage citizen volunteers to aid in pathway maintenance and improvements.

h) Utilize the City's webpage to educate, inform and promote alternative modes of travel and the Roseville pathway network.

6. Preference List of Pathway Segments

Previous versions of the Pathway Master Plan included a list of priority projects and ranking based on qualitative evaluation criteria as defined by the Pathway Advisory Committee (a defunct group of citizens that served as a steering committee for the Pathway Master Plan). Committee members identified the list of priority projects and individually scored them based on the evaluation criteria. The scores were then weighted and added up to provide a composite score and rank for each project. While the ranking process was beneficial, there was concern that scoring system provided inconsistent results, and that future updates could result in different ranking results.

As part of the 2017 Pathway Master Plan update, the PWETC revised the scoring system and evaluation criteria for use in this plan. The updates were intended to be simplified, quantitative, and easily replicated for future use. The PWETC assessed and consolidated the 10 previous evaluation criteria down to 6 criteria. The PWETC then modified the scoring for each criterion and established quantifiable measurement tools using readily available GIS data and City maps. In addition, the PWETC revised the list of projects for evaluation to eliminate previously completed pathway segments and divide up longer segments to reduce the potential for over-scoring due to project length. Based on the updated evaluation criteria, City staff utilized GIS data to apply the scoring system to the updated list of preferred projects.

The following evaluation criteria were used by the PWETC to rank projects based upon the applied scoring system.

Evaluation Criteria

1) Connects multiple destinations.

Provides safe and convenient access to businesses, schools, churches, work, parks and other community amenities and destinations.

Add one point for each type of destination within 1/4 mile of pathway

- 1-Each-Institutional use (school, university) within 1/4 mile
- 1-Each-Park/Open Space use within 1/4 mile
- 1-Each-Public facilities within 1/4 mile
- 1-Total-Industrial/Office use (employment centers) within 1/4 mile
- 1-Total-Commercial use within 1/4 mile

Measurement tool: City's Future Land Use Map

2) Volume of usage.

The pathway corridor has shown a consistent need for facility development based on its ability to serve the surrounding population and employment base.

Total population within 1/4 mile of pathway

- 3-Population is 3,000 or greater

- 2-Population is 2,000 to 2,999
- 1-Population is 500 to 1,999
- 0-Population is less than 500

AND

Total employment within 1/4 mile of pathway

- 3-Employment is 3,000 or greater
- 2-Employment is 2,000 to 2,999
- 1-Employment is 100 to 1,999
- 0-Employment is less than 100

Measurement tool: US Census Block Dataset

3) Connects to regional system.

Provides linkage to the larger network of pathways that extend beyond Roseville. The pathway serves longer trips within Roseville and into neighboring cities.

- 3-Regional corridor (county road, regional/state trail, RBTN route)
- 2-Local pathway that directly connects to regional corridor or Parks & Recreation System Master Plan Trails and Parks Constellation Link.
- 1-Pathway provides local connection only

Measurement tool: City's Pathway map and regional bikeways mapping

4) Addresses a gap or barrier in the transportation network.

Addresses a pathway network gap along the transportation network and/or crosses a major barrier. Eliminates a major barrier or safety concern in the pathway network that may inhibit bicycle or pedestrian travel.

- 5-Provides enhanced safe crossing (grade separated or improved intersection) of major highway (I-35W, TH 36, Snelling Avenue) or railroad
- 4-Completes pathway along A-Minor Arterial roadway
- 3-Completes pathway along Other Arterial roadway
- 2-Completes pathway along Major Collector roadway
- 1-Completes pathway along a Local roadway

Measurement tool: City's Roadway Functional Classification Map

5) Connects to Transit

Connects bus stops, transit hubs, or provides a connection to other transit.

- 3-Transit Center or park and ride within 1/4 mile of pathway
- 2-A-BRT Station within 1/4 mile of pathway
- 1-Bus stop within 1/4 mile of pathway

Measurement tool: GIS, transit routes and stops

6) Connects High-Density Residential to Transit or Parks (Max 5 Points)

Improves access for densely populated areas to the City's transit and park facilities.

- 2-Per 100 units-Pathway connects multi-family residential or mixed use area to transit stop or park within 1/8 mile walking distance
- 1-Per 100 units-Pathway connects multi-family residential or mixed use area to transit stop or park within 1/4 mile walking distance

Measurement tool: GIS, City's Existing Land Use Map, transit routes and stops

Scoring Results

The following table shows the cumulative results of scoring the preference list of pathway projects using the evaluation criteria established by the PWETC. See Attachment 6 for a more detailed Project Preference List and Scoring Results. Segments with * next to the project name are new segments added to the plan. Segments with # next to the project name are segments that are shown on the Parks & Recreation System Master Plan Trails and Parks Constellation link.

Segments that are highlighted in green are pathway segments on arterial roadways with volumes greater than 4,000 ADT which do not have a pathway on either side of the roadway.

The results of the scoring exercise will be used by the City to assist in prioritizing future pathway projects as part of the annual capital improvement program update. However, it is important to note the list of preferred projects will not be implemented based on the ranking results, as this list is intended to be updated periodically. In addition, there are several factors that can affect the timing and cost of developing pathway projects. These factors include coordination with planned roadway improvements (when it may be most feasible to construct new pathway segments), the availability of right-of-way, utilities, constructability, and magnitude of project in terms of both length and cost. For example, if a proposed pathway project is located along a roadway that is programmed for reconstruction, then coordinating the pathway improvements with the road improvements is the best opportunity to implement the project (regardless of project ranking). Likewise, the ability for a proposed pathway project to obtain external funding could also accelerate the development of such a project.

7. RECOMMENDATIONS

The following recommendations are intended to continue supporting the City's efforts in developing an appropriate and well-guided pathway network for the community.

1) **Formally adopt the Roseville Pathway Master Plan as part of the City of Roseville's Comprehensive Plan to guide the City in all pathway-related issues.**
2) **Support the effort to maintain a growing system of pathways through proper funding of equipment, personnel or contracted services.**

   With the recommended promotion and continued development of pathway facilities in Roseville should come the dedication and support to maintain the facilities as highly beneficial recreation and transportation amenities. Through the commitment of improved operational maintenance, the City is assuring, for the future of Roseville, a well-maintained transportation and recreation pathway network.

3) **Demand conscientious development through strict policies and standards defining the City of Roseville's goal for pathways and pathway related issues.**
4) **Continue implementing a funding program for the development, management and maintenance operation recommendations laid out in this document. Pursue external funding sources to support the development of new pathway segments.**
5) **Re-evaluate the Pathway Master Plan at least every three years to review the impact of the Roseville Pathway Master Plan. This will ensure that the plan remains consistent with the community's goals.**
6) **Continue working with neighboring cities, Ramsey County, MnDOT, and other regional agencies to support development of the regional bikeway network and local connections to and from the City's pathway system.**

Project Preference List

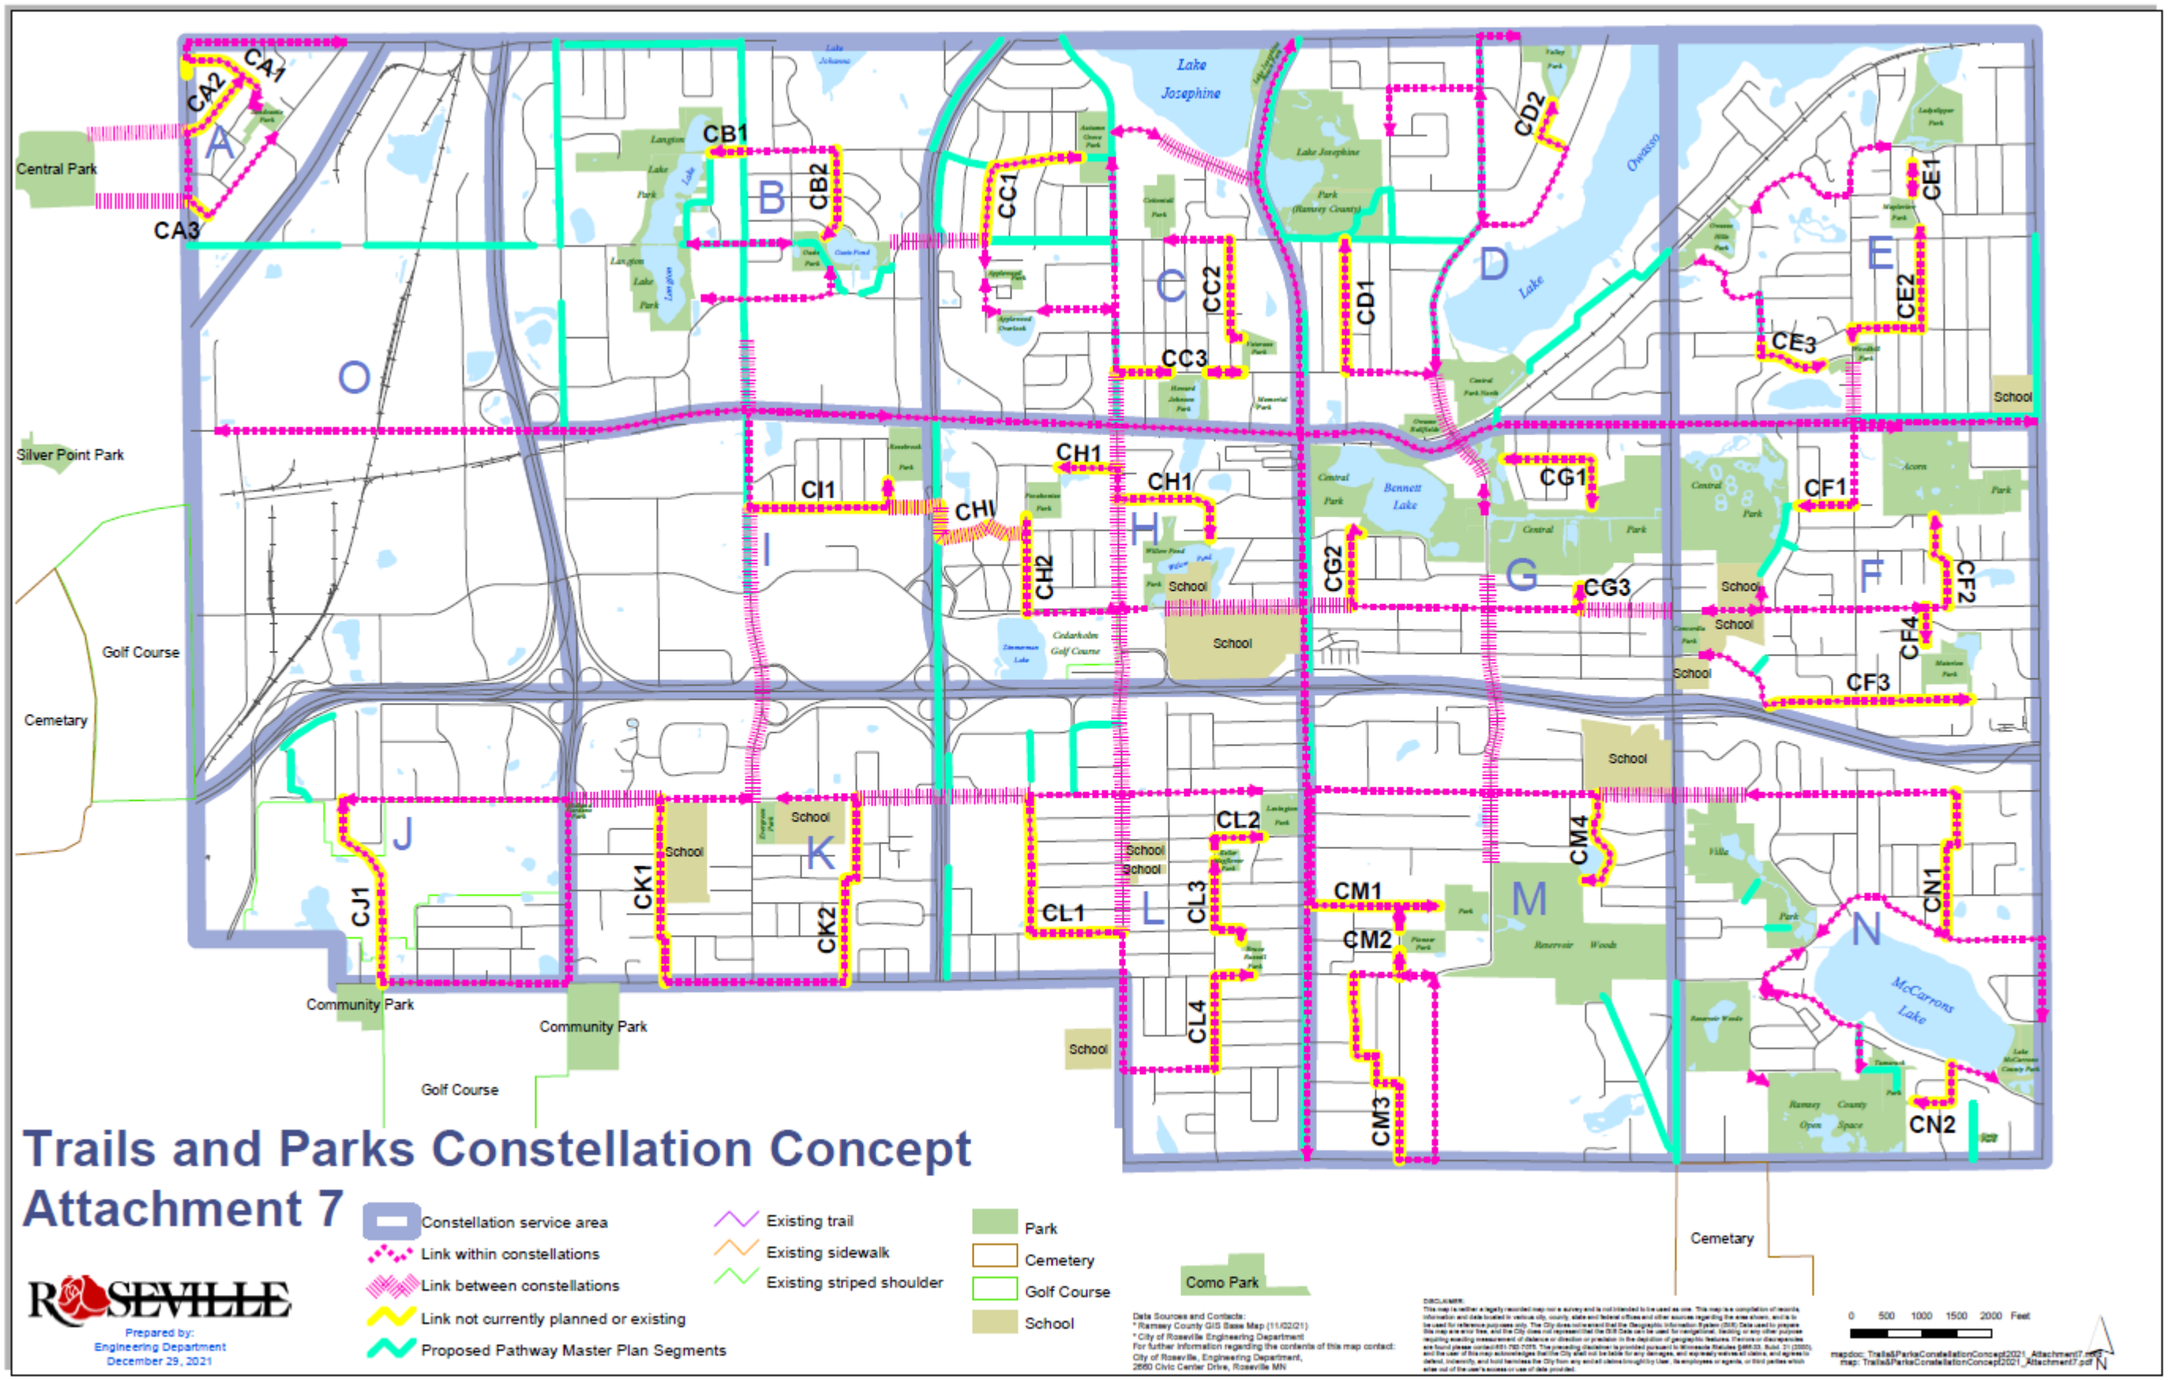

Thursday, July 1, 2021

Map Ref.	Project Name	Description	Connects Multiple Destinations	Volume Usage - Population	Volume Usage - Employment	Connects to Regional System	Addresses a Gap or Barrier in the Transportation System	Connects to Transit	Connects Highly Density to Transit or Parks	Total Points	Pathway Master Plan and Parks Constellation Plan Rank
Pathway Master Plan Segment on Arterial Roadway with more than 4,000 ADT, with no pathway on either side of the roadway.											
Parks and Recreation Master Plan Constellation Link											
28	Snelling Avenue*	Develop off road pathway between County Road B and County Road C	5	1	3	3	5	3	5	25	1
4A	County Road C (A)	Construct an on-road pathway from Lexington Avenue to Victoria St.	5	1	1	3	4	4	5	23	2
9	Snelling Avenue South of Highway 36	Complete pathways along Snelling Avenue for improved access to A-BRT transit stations.	2	1	3	2	5	4	5	22	3
16	Rosedale to HarMar Connection	A pedestrian bridge across Highway 36 and pathway connection between Rosedale and HarMar Mall.	2	1	1	2	5	6	5	22	3
12C	Lexington Avenue (C)	Complete off-road pathway on the east side of Lexington Avenue from County Road C to County Road D.	4	1	1	3	4	4	5	22	3
12A	Lexington Avenue (A)	Complete off-road pathway on the east side of Lexington Avenue from Larpenteur Avenue to County Road B	5	2	1	3	4	1	5	21	6
12B	Lexington Avenue (B)	Complete off-road pathway on the east side of Lexington Avenue from County Road B to County Road C.	5	1	1	3	4	1	4	19	7
4B	County Road C (B)	Construct an on-road pathway from Victoria St to Dale St.	5	1	0	3	4	1	5	19	7
3A	County Road C-2 (A)	Complete both on- and off-road pathways within the County Road C-2 alignment from Snelling Avenue to Hamline Ave	5	2	1	3	1	1	5	18	9
4C	County Road C (C)	Construct an on-road pathway from Dale St to Western Ave.	4	1	0	3	4	1	5	18	9
4D	County Road C (D)	Complete both on- and off-road pathways within the County Road C alignment from Western Ave to Rice St.	4	1	1	3	4	1	4	18	9
6	Cleveland Avenue	Complete off-road pathway segments between County Road C and County Road D.	3	0	3	2	3	4	2	17	12
13	Rice Street	Complete an off-road pathway from County Road C to the north City boundary.	3	1	1	3	3	1	5	17	12
25A	Hamline Avenue A	An off-road trail from County Road C to County Road C-2.	3	1	1	3	3	1	5	17	12
10	Victoria Street (north of C)	Develop an on- road and off-road pathway from County Road C to County Road D.	6	1	1	2	3	1	2	16	15
CC-3	Constellation Link C3	Develop a constellation link pathway along Woodhill Drive between Hamline Avenue and Civic Center Drive to connect to Howard Johnson Park	5	1	1	2	1	4	2	16	15
36	Snelling Service Dr E	Develop an off road pathway along the east side of the East Snelling Service Drive	5	1	2	1	1	1	5	16	15
2	County Road C-2 West of Snelling	Develop both on-and off-road pathways within the County Road C-2 alignment from the west City Boundary to Snelling Avenue. This corridor would include a pedestrian bridge across I-35W.	2	1	3	2	1	1	5	15	18
8	TH 51 connection to Old Snelling (Arden Hills)	Work with Arden Hills to develop a regional pathway connection along Snelling Avenue to Old Snelling Avenue in Arden Hills connecting Roseville to Mounds View High School, Valentine Hills Elementary School, Bethel College, Lake Johanna Park and County Road E2 commercial businesses.	5	1	1	2	4	1	1	15	18
25B	Hamline Avenue B	An off-road trail from County Road C-2 to County Road D.	3	1	1	3	3	1	3	15	18
3B	County Road C-2 (B)	Complete an off-road pathway within the County Road C-2 alignment from Lexington Ave to Victoria St.	3	1	1	3	1	1	5	15	18
CD-1	Constellation Link D1	Develop a constellation link pathway along Oxford Street between Woodhill Avenue pathway and County Road C2.	5	1	1	2	1	1	4	15	18
27	Tamarack Park Connection*#	Install a pathway connection from South McCarron's Blvd to Tamarack Park.	4	1	0	2	1	1	5	14	23
CC-2	Constellation Link C2	Develop a constellation link pathway along Griggs Street beween Veterans Park and County Road C2.	5	1	1	2	1	4	0	14	23
CK-2	Constellation Link K2	Develop a constellation link pathway along Aldine Street/Midlothian Road between Roselawn Pathways and County Road B pathways.	4	1	1	2	1	3	2	14	23
35	Fairview Ave, west side B2 to C2	Develop an off road pathway along the west side of Fairview Avenue from County Road B2 - C2	3	1	3	3	3	1	0	14	23
29	Commerce Street*	Develop a pathway connection between Albert St and Hamline Ave	5	1	1	1	1	4	0	13	27
CF-3	Constellation Link F3	Develop a constellation link pathway along Minnesota Avenue between Lovell Avenue pathways and Materion Park.	5	2	1	2	1	1	1	13	27
CI-1	Constellation Link I1	Develop a constellation link pathway along Oakcrest Avenue between Fairview Avenue pathways and Rosebrook Park.	5	1	3	2	1	1	0	13	27
37	Lydia Avenue	Develop and off road pathway on Lydia Avenue between Snelling Avenue and Hamline Avenue	5	1	1	2	2	1	1	13	27
5	County Road C Sidewalk	Construct a sidewalk on the north side of County Road C from Western to Rice Street.	2	1	1	2	3	1	2	12	31
7	Fairview Avenue C (north of B-2)	Development of off-road pathways between County Road C2 and County Road D.	5	1	0	3	3	0	0	12	31
31	Pascal Street*	Develop a pathway connection between County Road B and Commerce Street	5	1	1	1	1	3	0	12	31
CC-1	Constellation Link C1	Develop a constellation link pathway along Arona/Lydia between County Road C2 and Autumn Grove Park.	5	1	0	2	2	1	1	12	31
CF-2	Constellation Link F2	Develop a constellation link pathway along Galtier Street and Matilda Street to connect County Road B2 pathways to Acorn Park.	5	1	2	2	1	1	0	12	31
18	Judith to Iona Connection#	Develop a pathway connection between Judith Ave and Iona Lane.	1	1	0	2	1	1	5	11	36
CA-1	Constellation Link A1	Develop a constellation link pathway along Maple Lane between Highcrest Road pathway and Old Hwy 8 pathway.	3	1	1	2	1	3	0	11	36
CH-1	Constellation Link H1	Develop a constellation link pathway along Oakcrest Avenue and Fernwood Street between Hamline Avenue pathways and Willow Pond Park pathways.	4	1	1	2	1	1	1	11	36
CHI	Constellation Connection H to I	Develop a constellation connection between Consellation H and I across Snelling Avenue between County Road B2 and County Road C.	5	0	0	2	1	3	0	11	36
CN-1	Constellation Link N1	Develop a constellation link pathway along William Street between the pathway on N McCarrons Boulevard and the pathway along County Road B.	2	1	1	2	1	4	0	11	36
1	County Road D	Develop pathway facilities, both on- and off-road, between Cleveland and Fairview Avenue.	3	0	1	2	3	1	0	10	41
11	Dale Street South	The construction of an off-street pathway from Reservoir Woods Park to Larpenteur Avenue.	1	1	0	3	4	1	0	10	41
19	Lovell to Minnesota Connection	Develop a pathway connection between Lovell Ave and Minnesota Street.	3	1	1	1	1	0	3	10	41
21	Millwood to County Road C2 Link	Develop a pathway connection that creates a link between the corner of Millwood and Chatsworth through the Ramsey County open space to County Road C2.	2	1	1	1	1	1	3	10	41
24	Alta Vista Drive	Develop a pathway connection along Alta Vista Drive between Larpenteur Avenue and Reservoir Woods Park.	1	1	1	3	1	1	2	10	41
30	Albert Street*	Develop a pathway connection between County Road B and Commerce Street	5	1	1	1	1	1	0	10	41
CB-2	Constellation Link B2	Develop a constellation link pathway along Aldine St between Oasis Park and Lydia Avenue pathway.	5	1	1	2	1	0	0	10	41
CG-1	Constellation Link G1	Develop a constellation link pathway along Rose Place and Aladdin Street to connect Fisk Street with Central Park (Dale Street Soccer Fields)	5	1	0	2	1	1	0	10	41
CG-2	Constellation Link G2	Develop a constellation link pathway along Oxford Street between County Road B2 pathways and Central Park pathway off Brooks Street.	4	1	1	2	1	1	0	10	41
CH-2	Constellation Link H2	Develop a constellation link pathway along Pascal Street between County Road B2 pathways to Pocahontas Park.	4	1	1	2	1	1	0	10	41
CL-1	Constellation Link L1	Develop a constellation link pathway along Shryer Avenue and the east side of the Har Mar Mall to connect the pathway on Hamline to the pathway of County Road B.	2	1	1	2	1	3	0	10	41
CL-3	Constellation Link L3	Develop a constellation link pathway along Ryan Avenue and Fernwood Street to connect Bruce Russell Park to Keller Mayflower Park.	5	1	0	2	1	1	0	10	41
CM-2	Constellation Link M2	Develop a constellation link pathway along Chatsworth Street between Roselawn and Shryer to connect to Pioneer Park.	5	1	0	2	1	1	0	10	41
CM-4	Constellation Link M4	Develop a constellation link pathway along Alameda Street between Resevoir Woods and the pathways on County Road B.	4	1	1	2	1	1	0	10	41
CN-3	Constellation Link N2	Develop a constellation link pathway along Dionne Avenue and Galtier Street to connect Tamarack Park to the pathway on South McCarrons Boulevard.	5	1	0	2	1	1	0	10	41
34	Marion Street	Develop an off road pathway along Marion Street from Larpenteur Avenue to the cul-de-sac	3	0	1	1	1	1	3	10	41

Project Preference List

Thursday, July 1, 2021

Map Ref.	Project Name	Description	Connects Multiple Destinations	Volume Usage - Population	Volume Usage - Employment	Connects to Regional System	Addresses a Gap or Barrier in the Transportation System	Connects to Transit	Connects Highy Density to Transit or Parks	Total Points	Pathway Master Plan and Parks Constellation Plan Rank
Pathway Master Plan Segment on Arterial Roadway with more than 4,000 ADT, with no pathway on either side of the roadway.											
Parks and Recreation Master Plan Constellation Link											
23	Cohansey St to HANC Connection	Develop a pathway connection between Cohansey Street and HANC.	3	1	1	1	1	1	1	9	57
CA-2	Constellation Link A2	Develop a constellation link pathway along Lydia Avenue between Highcrest pathway and Brenner Street.	3	1	1	2	1	1	0	9	57
CB-1	Constellation Link B1	Develop a constellation link pathway along County Road C2 beween Langton Lake Park and Fairview Avenue pathway.	5	1	0	2	1	0	0	9	57
CE-3	Constellation Link E3	Develop a constellation link pathway along Mackubin Street and Woodhill Drive to connect pathways to Owasso Hills Park to Woodhill Park.	1	1	0	2	1	1	3	9	57
CG-3	Constellation Link G3	Develop a constellation link pathway along Grotto Street between County Road B2 pathways and Central Park Pathways at Sextant Avenue.	4	1	0	2	1	1	0	9	57
CK-1	Constellation Link K1	Develop a constellation link pathway along Prior Avenue between Roselawn pathway and County Road B pathway/Fairview Community Center.	1	1	1	2	1	1	2	9	57
CL-4	Constellation Link L4	Develop a constellation link pathway along Fernwood Street and Roselawn Avenue to connect Garden Avenue pathways to Bruce Russell Park.	3	1	1	2	1	1	0	9	57
CM-1	Constellation Link M1	Develop a constellation link pathway along Shryer Avenue to connect Lexington Park pathways to Pioneer Park.	4	1	0	2	1	1	0	9	57
CM-3	Constellation Link M3	Develop a constellation link pathway along Chatsworth Street, Roma Avenue, Aglen Street, Ruggles Street and Oxford Street to connect the pathway on Victoria Street to the pathway on Roselawn Avenue.	2	1	1	2	1	1	1	9	57
33	Tamarack Park	Develop a pathway from Western Avenue into Tamarack Park	3	1	1	2	1	0	1	9	57
20	Villa Park Connections	Develop a pathway connection from Shryer Ave and from Ryan Ave into Villa Park.	3	1	0	1	1	1	1	8	67
CF-1	Constellation Link F1	Develop a constellation link pathway along Oakcrest Avenue between Cohansey Street and Western Avenue pathway.	2	1	1	2	1	1	0	8	67
CF-4	Constellation Link F4	Develop a constellation link pathway along Matilda Street to connec to Materion Park with County Road B2 pathways.	3	1	1	2	1	0	0	8	67
CL-2	Constellation Link L2	Develop a constellation link pathway along Fernwood Street and Eldridge Avenue to connect Keller Mayflower Park to Lexington Park.	3	1	0	2	1	1	0	8	67
17	Heinel Drive Connection	Develop a pathway connection between S. Owasso Blvd and County Road C along Heinel Drive.	2	1	0	1	1	1	1	7	71
CE-2	Constellation Link E2	Develop a constellation link pathway along Iona Street and Matilda Street to connect Woodhill Park to Mapleview Park.	2	1	0	2	1	1	0	7	71
CJ-1	Constellation Link J1	Develop a constellation link pathway through Midland Hills Golf Course between Roselawn Avenue and County Road B pathway.	1	1	1	2	1	0	1	7	71
32	Eustis Street	Develop an off road pathway along Eustis Street between County Road B and the cul-de-sac	2	1	1	2	1	0	0	7	71
14	Langton Lake Loop	Develop a pathway that goes around all of Langton Lake.	4	0	0	1	1	0	0	6	75
22	Eustis to St. Croix Connection	Develop a pathway connection between Eustis Street and St. Croix Street.	1	0	1	1	1	1	1	6	75
CE-1	Constellation Link E1	Develop a constellation link pathway along Matilda Street to connect Mapleview Park to S Owasso Boulevard pathway.	2	1	0	2	1	0	0	6	75
CA-3	Constellation Link A3	Develop a constellation link pathway along Brenner Street/Patton Road between Highcrest Road pathway and Sandcastle Park.	0	0	0	2	1	1	1	5	78
CD-2	Constellation Link D2	Develop a constellation link pathway along Millwood Avenue and Brennue Avenue to connect Valley Park to West Owasso Boulevard pathway.	1	0	0	2	1	1	0	5	78

Roseville Public Works, Environment and Transportation Commission

Agenda Item

Date: February 28, 2023 **Item No:** 7

Item Description: Water and Sewer Service Lateral Discussion

Background:

In 2016, staff presented information to the PWET Commission on water and sewer service laterals. Staff discussed ownership, issues with maintenance, types or maintenance/replacement options, and how the City helps residents with these issues.

Staff will provide an updated presentation to the commission, especially on repair options to residents. Staff will also present new options for the City to help residents. Staff would like feedback the proposed programs as we develop the 2024 budget process.

Recommended Action:

Receive presentation and provide feedback and recommendations on how the City can help residents with their private water and sewer service laterals.

Attachment A

Addressing Sanitary Sewer Services

PUBLIC WORKS ENVIRONMENT & TRANSPORTATION COMMITTEE

SEPTEMBER 27, 2016

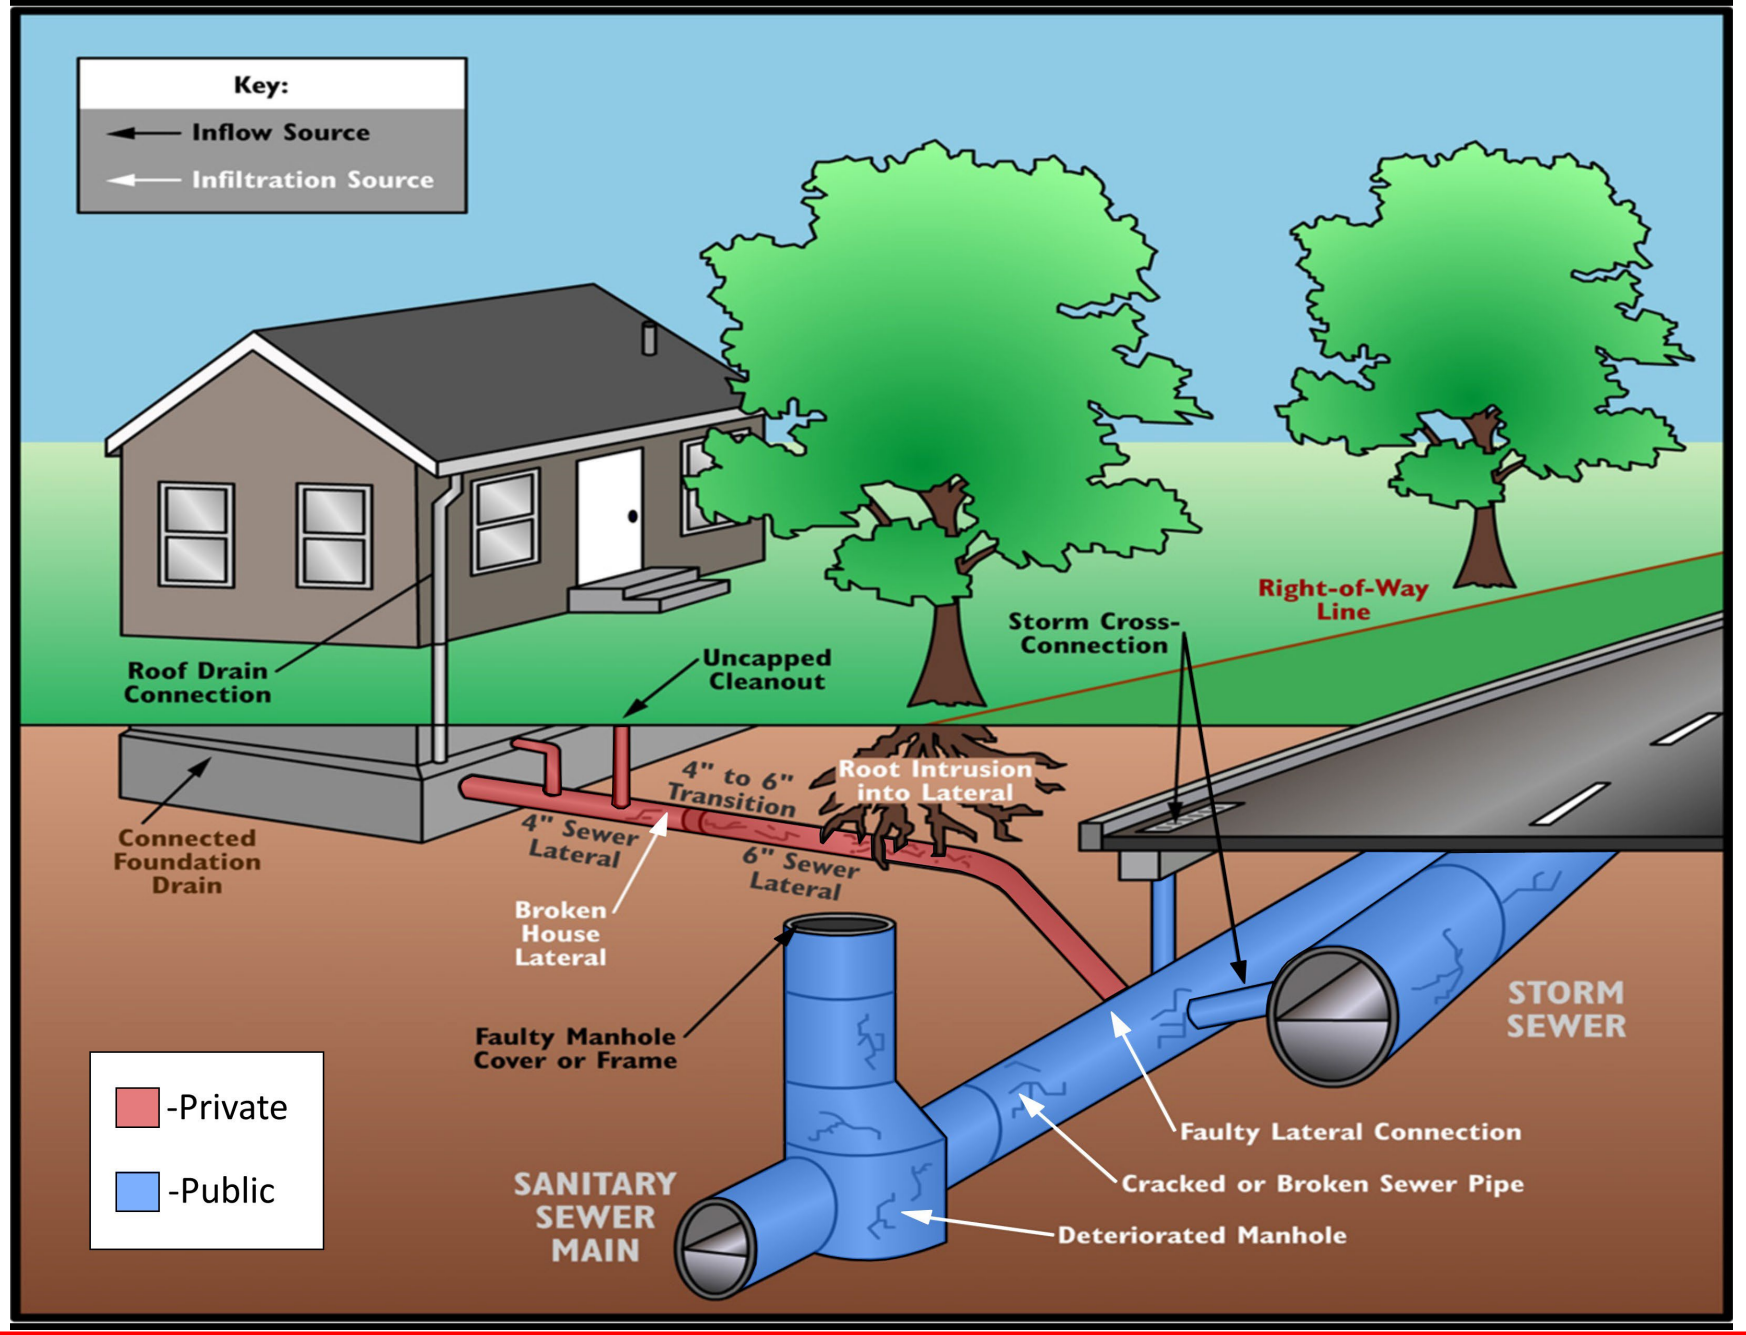

Key:
Inflow Source
Infiltration Source
Roof Drain Connection
Uncapped Cleanout
Storm Cross-Connection
Right-of-Way Line
Connected Foundation Drain
4" to 6" Transition
Root Intrusion into Lateral
4" Sewer Lateral
6" Sewer Lateral
Broken House Lateral
Faulty Manhole Cover or Frame
STORM SEWER
-Private
-Public
Faulty Lateral Connection
Cracked or Broken Sewer Pipe
Deteriorated Manhole
SANITARY SEWER MAIN

Programs to Discuss

- Point of Sale
- Inspections based upon street projects
- Inspections based upon permit applications
- City-wide inspections
- Blanket replacement

Memo

To: Public Works Environmental and Transportation Commission Members

From: Jesse Freihammer, Public Works Director

Date: February 28, 2023

Re: Look Ahead Agenda Items/Next Meeting March 28, 2023

Suggested Items:

March:

- Met Council and Metro Transit Update
- Eureka Update
- Commission Name Change

Looking Ahead:

- April 2023:
  - Speed Limits
  - Pavement Management Update
  - Envision Roseville
- May 2023
  - Tour?
- June 2023
  - MS4 Update
  - Sustainability Topic
  - Prep for Joint Council meeting in July
    - Discuss Organized Collection
- Future Topics
  - EAB/Tree update
