2660 CIVIC CENTER DR. • ROSEVILLE, MN 55113

STREET AND PATHWAY PATCHING Pricing and Notification Policy

Permanent Streets (Up to ½ Street Width)

Curb and gutter: \$1,400.00

Without curb and gutter: \$900.00

Pathway/Sidewalk

Concrete (2 panels): \$750.00

Asphalt (12' x 8'): \$700.00

This fee will be used by the city to repair the driving surface of all utility trenches and is not refundable.

Upon completion of the sewer or water connection, the Building Inspector will notify the Public Works Department at 651-792-7004. The Utility Inspector will arrive and inspect soils and compaction of the trench.

Once the Utility Inspector has approved the material and trench to back fill, the contractor will repair the trench by thoroughly compacting the suitable material in lifts of not more than one foot and prepare square edge cuts on the periphery of the disturbed surface.

Suitable materials are sand and class 5 limestone, which are available at the public works maintenance yard at 1140 Woodhill Drive. Hauling of this material is the contractor's responsibility as is the hauling and disposal of any unsuitable material. The City of Roseville does not accept or dispose of any unsuitable materials.

Any maintenance necessary to maintain the unfinished trench between the times the contractor finishes and the city completes the pavement repair is the responsibility of the contractor.
