

CURRENT RESIDENT

Project Summary

As part of the City of Roseville's ongoing pavement management program, streets with poor driving surfaces that have curb and gutter are being improved using a mill and overlay or a reclaim (grind to gravel) process. This process consists of grinding all or a portion of the existing surface off the roadway and replacing it with a new blacktop driving surface. As part of the process, sunken or badly deteriorated curbs and gutters are replaced.

This year's Pavement Management Project (PMP) includes more than nine miles of street repairs. The majority of the work will consist of mill and overlays, with some spot curb repair.

There will also be some minor utility improvements and curb ramp upgrades to improve accessibility. Water shutdowns, road closures and detours will be posted as needed when this work occurs.

This year's project was awarded to Bituminous Roadways. They are the general contractor for the project and will coordinate all work, including work done by subcontractors.

After Hours

If an issue arises outside of regular business hours, contact the City's 24-hour non-emergency number at 651-767-0640.

ALWAYS CALL 911 FOR EMERGENCIES

Project Schedule

The contractor is gearing up to complete major street work - removing the top layer of asphalt and paving a new layer. You will be able to drive on the new pavement shortly after it is placed.

This work is anticipated to start on the week of July 13. The contractor will work in phases by neighborhood, so you may not see them in your neighborhood right away.

Weather is always a factor when completing a project on schedule. We do our best to stick to the schedule, but we understand that the timetable may change as the season progresses. We will send newsletters with updates to the schedule, but we recommend that residents visit <http://www.cityofroseville.com/PMP> for more frequent updates.

Project Updates

Please continue to watch for additional newsletters, postcards, door hangers and signage that may have updates on the project. In addition, project updates will be posted at:

<http://www.cityofroseville.com/PMP>

Project Funding

City funds will pay for this pavement maintenance. Utility repairs are funded using utility funds. There are **no assessments** for the City work.

Private property owners who signed up for their sewer services to be replaced are responsible for those assessed costs and invoice information will be sent at the end of construction.

Construction Site Safety

We remind you to use caution around work sites. Your assistance in reminding children to stay clear of construction equipment is helpful in maintaining a safe environment. Please use extreme caution walking, biking or driving in and around construction areas. The large equipment may make it difficult to see or hear you.

Access

The contractor is required to keep the roads passable and to provide driveway access whenever possible. When construction is occurring, parking restrictions may be in place during working hours but, in most cases, parking will be allowed at night.

The construction project will be staged so that residents and emergency vehicles will be able to drive on the streets at all times. If you have special access needs, please notify Abe Al-Qudah, Project Coordinator, as soon as possible so we can make accommodations.

COVID-19

City-led construction projects will continue as planned. The City will work with project contractors to follow workplace hygiene and social distancing recommendations from the CDC and Minnesota Department of Health to slow the spread of COVID-19. Please practice social distancing with construction and field staff and contact City staff directly if you have any questions or concerns
